

HOW TO JUMP-START YOUR BRAIN AND TRAIN IT TO BECOME INTELLIGENT

I also think True intelligence is a gift from JESUS GOD. Still, some lesser intelligence can come from one's environments(certain periods of growing up) and associations with living things, inanimate objects, nature, and watching animals, these things may contribute to increased intelligence. True Intelligence is the ability to grasp any technology or methodology and come close to mastering it within a short amount of time, and without any tutoring from anyone or any book, paper, cell phone, or computer, such as playing the flute, building a house, creating a computer without any previous knowledge of binary logic and do it quickly. It is also the ability to think rationally well and position combinations and patterns together to obtain coherent thinking and plausible conclusions. So true Intelligence has differential degrees of complex problem-solving and exceptionally advanced planning. I think True intelligence is a gift from JESUS GOD. Still, some lesser intelligence can come from one's environments(certain periods of growing up) and associations with living things, inanimate objects, nature, and watching animals, these things may contribute to increased intelligence.

HOW TO HAVE A SUPER INTELLIGENT BRAIN

“What you need to know to make sense of this book/paper”

This paper is very different than other standard styles of writing. It has a sort of Table of Contents (TOC), but I call it the **Brief Content** page. The **Brief Content** is on page 18, and it has **JUMP CODEs** that are just many different **subjects**, it is a list of **subjects** only in **JUMP CODE** representation, like an index, turn to page #18 if you like, or you can find the different **subjects** by thumbing through the pages, and you will find what you want. So page numbers are not needed with this style of writing.

“if you like thumbing through them by hand you will find subjects quickly”

On page #31 is where all of the real information starts related to each **subject**, going through each **JUMP CODE** that are basically subjects, and thumb through the page and find the subject you like, the Starter Page is on #31. if you like turn there.

Between pages 2 and page 18 is a lot of information that can help the reader to understand how and why we use **JUMP CODEs**, and not just a list of **subjects**. It has a lot of good information and is intended to get your mind **JUMPING** around.

INTRODUCTION

This paper is about Magnetism and Frequencies and their many applications, and how to combine Magnetic Pulses, Frequencies Waves, and Hypnosis to Simulate and Train your Brain, and to help accept positive internal/external suggestions. This paper also explores the relationship between magnetism (magnets) and frequencies, as well as their numerous relation to each other. It discusses how to combine manmade and natural magnetic pulses (frequencies) with hypnosis to also investigate brain activities, and *internal/external magnetic medicines*. Additionally, it examines other methods involving magnetic fields to create a Magnetic Entry-Point into the brain cortex (or any other part of the Human/Animal body) without any physical contact. A significant emphasis is placed on the human Eye frequencies and of course, many other subjects like “Magnetic Hypnosis” and ‘Brain Rot”, let's start with these two. “And a few fascinating subjects and Military applications are Included in this paper”

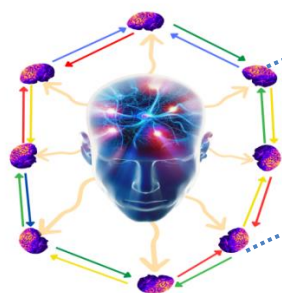

Scientists at Stanford University Hypnosis Integrated
with Functional Connectivity-targeted Transcranial Stimulation

“And hypnotherapy to have promising health benefits in the realms of pain management, mental health, addiction, and more”, from **Stanford University** “A short explanation”

“To be clear, the method — clunkily dubbed the Stanford Hypnosis Integrated with Functional Connectivity-targeted Transcranial Stimulation, or SHIFT for short — doesn't do the hypnotizing. Instead, SHIFT seeks to facilitate an individual's response to hypnosis, especially in cases where a patient was previously resistant”.

'Hypnosis isn't just a circus hustle; as The New York Times reported in 2023, several science-backed studies have shown hypnotherapy to have promising health benefits in the realms of pain management, mental health, addiction, and more. But as Stanford psychiatric researcher and lead study author Afik Faerman told The Daily Beast, "only about 20 percent" of the human population is uniquely susceptible to hypnosis — and thus, to its potential health benefits”.

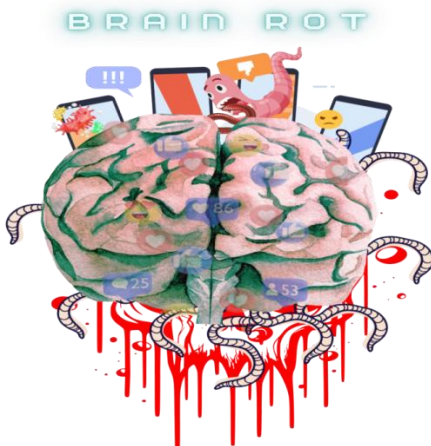

<https://mail.google.com/mail/u/0/#inbox/FMfcgzQZSsKtVGffTfMNgGPcjGVgXGbg>

Magnetic Wireless Transmitted Pulses sent into your Brain Cells, like cell phones and RF signals, that can create **BRAIN ROT**, along with 5G frequencies and beyond, and can change your thinking into a very dark place, not to mention cancer problems. The Radio Frequency Sphere (cloud) of Mental Captivity and all is Invisible to the Naked Eye, but not to the inner Cortex / Eye, and the Amazing Human Barin “optic nerve & visual cortex”, all from JESUS

What is “Brain Rot” , Is It poisoning Our Minds?

Natural and Man-Made Magnetic pulses can be Chain-Linked to other Humans, not to exclude light waves, Smells, Colors, Thermal Heat being Internal or External, and other Humans/Animals/Plants and extraterrestrial flying objects can infect all Living Things. “All Forces can enter the Human Brain and Body, and cause Brain Rot”

" Brain Rot is altering the way we perceive and respond to everything"

Brain ROT

The following is just a short definition of Hypnosis and “Brain Rot, a starter, then I get into the

It turns out that the slang “**brain rot**” may not be an inaccurate description of what's actually going on in our domes while we endlessly scroll TikTok.

As Spanish newspaper [*El País* reports](#), a growing body of scientific evidence over the past decade suggests that consuming mind-numbing content, from sources ranging from algorithmically driven social media junk to sensationalist news, can *literally* reduce the physical gray matter in our brains. That's along with wreaking other pernicious effects like shortened attention spans and weakened memory. “It is almost for a brain to make so many **JUMP** within a short amount of time, it can destroy the cells”

“The nefarious thing? These symptoms are often by design. The most infamous example is the implementation of infinite scrolling in apps, which is intended to feed our compulsive desire to endlessly consume content, or “doomscroll.”

<https://futurism.com/neoscope/brain-rot-poisoning-minds>

“**THE SUPER HUMAN BRAIN JUMP CODES**”

So what are you thinking right NOW as you read this paragraph, the brain nodes are jumping all around, a lot,(so wait ~3 seconds, think): Now let your brain be triggered by what you have just read, and let your physical body motions become real-time movements that affect your brain (move your body) (sjc). So what do you want to be, and how do you accomplish anything you want, and make it come to fruition, open your brain nodes (think, focus on thinking, and search around the inside of your brain). So while you do this simple method snap your fingers, make a sudden body movement, yell, or even make a loud bang, of course just at the right time while reading this paragraph, and if you are fortunate enough to have a Magnetic Pulses applied to the correct part in the brain, then you've just experienced a **JUMP CODE**, as a matter of fact, a **SUPER BRAIN JUMP CODE**, and in this paragraph, you just triggered many **SUPER BRAIN JUMP CODES**, “The Portal in one of your many **Brain Nodes** was opened for a short instant in time”, “Magneticly, Visually, and Hearing”, through your skin were just open, pulling in data, and sending data, and just imagine what can get into the **Brain** in/out at an instant in time, and how long is an instant (this depends on many factors)? WOW.

And as a side note: The Eyes are affected adversely in space without gravity. A spaceship needs a type of artificial gravity, and if that is not obtainable, then the blood has to be modified to accommodate and create another type of blood that will work in no or very little gravity. Say that Allines came from outer space to Earth, and they came from other planets, their blood may be different, and to live in Earths atmosphere. And possibly they would have an green type of blood to compenstat for red blood, for And as a side note: The Eyes are affected adversely in space without gravity. A spaceship needs a type of artificial Gravity, and if that is not obtainable, then the blood has to be modified to accommodate and create another type of blood that will work in no or very little gravity. Say that Allines from outer space came to Earth, and if they came from other planets, their blood may be different, and to live in our atmosphere and gravity, and possibly a green type of blood would be needed, just a guess, this is just a guess.

“How to capture **JUMP CODE** thoughts”:

When you make the following noise or physical movement (A Controlled Signal Magnetic Disruption) your brain will make what I call a **JUMP CODE** (a thought), immediately write it down on anything, and save it for later. Oh the **JUMP CODE** is a break in the chemical cells' communication and actually makes a different path (to and from Nodes) where your data is stored, the information you were thinking about is putting this DATA/INFO in many other parts of our brain, so what am I talking about, "A *Brain Portal* is open at this instant in time, a very short window"?

The Human Body *has* a covering of motions and magnetic fields all around it, in fact, we live in, and these motions and magnetic fields are created by the rotations of the planets, it is a magnetic shielding that is always around your body, we live in these motions magnetic fields. So Concerning the **Human Brain**, a **Brain Portal** entry point, it is an opening of this motions magnetic field at a certain location point in your **Brain**, and that is caused by a motion magnetic irregularity in the **Brain**, this causes a **Brain Portal** to open. "This **Brain Portal** opens and closes for many different reasons, and at some never illuminated reason", but as I alluded to before some unexplained event. "Remember this is *Magnetic Brain Portal*"

So initially we are talking about combining Magnetic Pulsation Frequencies, to help induce Hypnotic thoughts and Stimulate your Brain, and all of this is related to internal/external Suggestions and how to facilitate other Electromagnetic Wave (in the "Functional Connectivity-targeted Transcranial Stimulation, or SHIFT for short") fields to open up a *Magnetic Entry Point* (portal) into the visual cortex. Also, what are Humans thinking right NOW as they read this paragraph, (the brain is jumping all around), and (a 1-minute wait please, Think of something different): "A portal gateway into your mind and other minds, "A Multi-Portal-Gateway", so can you investigate someone's minds and dreams? "This is not impossible".

Ok, how to let your brain be activated, and let your physical body motions become abrupt movements. So what do you want to be, and how do you accomplish anything,(should be your goal)? While you are doing this a simple method of snap your fingers, or make a sudden body movement, or yell, or even make a loud bang, of course just at the right time while reading this paragraph will open a door into your brain.

When you make the following noise (Controlled Signal Disruption), your brain will make a **JUMP CODE**. Write it down immediately on anything and save it for later. The **JUMP CODE** is a break in the chemical cells' communication and actually makes a different path, and the stored information you were talking about puts this DATA/INFO in another location, or a Storage holding cell. Using some of these methods for your self-induced internal Hypnotic Trances experiences (differential state, methods) you can accomplish these transformations, thereby providing internal brain and body healing, cell manipulation, and cell modifications, either on a temporary or permanent basis and this is a critical point. Of course, mind-altering drugs can play a big part in this process (not recommended by me). This is my lead into many things related to magnetics and the different theories I propose in this paper. What I propose is how to combine magnetic frequencies and Hypnotic Waves as a tool for many applications such as medicine, Healing, and Mind Control to name a few, and all of these **JUMP CODES** are subjects and are all related to magnetics in the Human Brain/Body and other unrelated topics, but will help you to understand the total concept of my paper, so some of these unrelated topics (**JUMP CODES**) will accelerate your brain and you will not even know it, but the results of who and what you are will surface in many ways, "don't let fear stop you, and be repetitive, I do".

So the title **“HOW TO JUMP-START YOUR BRAIN AND BECOME A LIVING BIOLOGICAL SUPER HUMAN”**, has many methods to help you become a better and healthier human being, and not using drugs.

A short Narration of Hypnosis “My short version”

Overview:

Hypnosis is a changed state of awareness and increased relaxation that allows for improved focus and concentration. It also is called hypnotherapy. Hypnosis usually is done with the guidance of a health care provider using verbal repetition and mental images. During hypnosis, most people feel calm and relaxed. Hypnosis typically makes people more open to suggestions about behavior changes.

Hypnosis can help you gain control over behaviors you'd like to change. It may help you cope better with anxiety or pain. Although you're more open to suggestion during hypnosis, you don't lose control over your behavior during a hypnosis session.

<https://www.mayoclinic.org/tests-procedures/hypnosis/about/pac-20394405>

Doctors use hypnosis as a part of treatment to help people with anxiety, [depression](#), pain, or unwanted behaviors, like smoking or overeating. It's usually helpful. But in some situations, it can cause serious side effects or raise your chances for other health problems.

<https://www.webmd.com/mental-health/hypnosis-risks-side-effects>

These are My Ideas about classical hypnosis, mind control, Frequencies, and how this is all combined / accomplished, and how they are all intertwined to become a

“LIVING BIOLOGICAL SUPER HUMAN BEING ON MAGNETIC ENERGY”.

So: Classical Hypnosis Definition

What these definitions leave out is how classical hypnosis and many Voice frequencies (tones), Magnet frequencies, Mechanical Vibrations, Shape frequencies, Colors Frequencies and the rise and fall of any one of the above definitions that are disrupted will cause the Human/Animal/Plant to enter into a catatonic state, allowing for an interruption that changes the direction of the path in the cortex, and leaving it wide open for commands that override the intended original commands, thereby taking over the Conscien part of the cortex, and also affecting the subconscious. This is where real mind control happens. The interruption becomes very complex, as it can come from many different sources, as listed above in this paragraph, the key is how these interruptions are delivered by the human interrupter, natural interruption, magnetic interruption, wave frequency interruption, or by an external shock, “A critical first step in mind control and is an art administered by an expert in hypnosis”. The main point I want to make is these interruptions have to be administered at precisely the right time (timing is everything,

levels) and the physical setting, and of course other humans/animals/plants/ surrounding the subjects that are to be hypnotized. Depending on how deep the subject is under a hypnosis interruption, this can be very dangerous, because it can be temporary or permanent, once more dangerous. I want to include in this paper an overview of hypnosis from Franz Anton Mesmer and Dr. Gauld, the book (*A History of Hypnotism*. by: Gauld, Alan. Publication date: 1992. Topics: Animal magnetism -- History, Hypnotism -- History, Mesmerism) “ The is amazing, get a copy if you can”

The Overview: The start of “The History of hypnotism”

Franz Anton Mesmer arrived in Paris from Austria in February 1778 and established a medical practice which hailed him as one of the most remarkable men of his time. His skill lay in his theories and in his use of 'animal magnetism' to cure disease. Mesmer began a school of thought which spread across Europe and America, and enjoyed, at various stages, favour as a respected scientific and medical therapy, and disrepute as the tool of occultists, mystics and charlatans. Dr. Gauld has created a detailed and scholarly history of the phenomena, practice and theory of mesmerism, hypnotism and multiple personality disorder. The book traces the course of the mesmeric and hypnotic movements and gives special attention to the ideas and influence of certain leading figures. It considers the theories which developed to explain the phenomena and the uses and shortcomings of the technique in medical practice. Throughout the book, case histories and anecdotal accounts provide a fascinating insight into this controversial subject. The book also touches on the social and intellectual issues which influenced the progress and development of mesmerism and hypnotism. The work is extensively annotated and referenced. In his epilogue, Gauld discusses modern approaches to hypnotism and multiple personality disorder, and the role of hypnotism in clinical practice, and offers some ideas for understanding these intriguing phenomena. *A History of Hypnotism* is a wide-ranging and detailed history of the mesmeric and hypnotic movements and is an essential work of reference and scholarship in this field. A fascinating account, this important work will be of interest to psychiatrists, psychologists and medical historians, as well as to the general reader who wishes to learn more about this absorbing topic.

ISBN-13: 9780521483292 ISBN-10: 0521483298 Publisher: Cambridge University Press

Publish Date: March 1995

Page Count: 760 <https://archive.org/details/historyofhypnoti0000gaul/page/n9/mode/2up>

What are my concerns about hypnosis?

And why do I address these concerns about hypnosis?, because with the new Cell phones and new technologies this become a very big problem, Humans/Animals can be hypothesized and not even know it, an unbelievable way to administer mind control to control vast amounts of people, still once more a hazardous practices, this is course outlaw in some countries. “Truly Mind control can come from cell phones, an unseen Mind Control”, and the higher the frequencies of the signals from Cell towers make it even worse. "Oh yes what about cancer"

Another reason I talk about this is in many ways hypnosis can be used for many great applications, medicals, diseases, tumors, organs (in the Brain and parts of the body), Eye Retina problems, the Blood flow of Astronauts in space, and the list go on and on.

If the Brain can be controlled (A controlled interruption) the whole body can be altered or changed, this is much better than a drug or even a great weight control, so a controlled interruption of the brain can be an amazing gift from JESUS GOD.

The biological brain is a chemical-electrical-frequency-wave vision machine, and of course very complex, but what are the entry points into the Human/animal brain, of course, the Eye (is the window to the world), but there are also many other entry points, Human Skin all over the Human/animal body, The Ear, the Nose, The hairs of the Human/Animal body, (bottom of the feet overlooked a lot), and the least but not last the Magnetic Aether of the Earth and Space, (chemical waves, the locational position of the Human/Animal body, and (hold on), other humans proximity to all humans.

How can these controlled interruptions into the Cortex/Body be done/ First as an interruption occurs, (sense it by a magnetic device, Other methods also) and when the Ride/Fall and the connection happen (the thought) and interruption has to be injected into the location I described in the above paragraph, this is a tricky procedure, so it disrupts the chemical –electrical path, and this is where it gets really tricky if it is a voice type interruption this is generally through the Ear, Nose, or the EYE, if through the body it gets a little more complicated, that means it becomes a chemical-electrical pulse into the cortex or other parts of the Human/Animal body. The interruption can also be done Magnetically with a focus beam device, I have such a device. But in any case, the chemical –electrical path is being distributed, and a signal is injected. If it is a continuous signal it is a BLOCK, in some cases good or bad, depending on the application, but could also be fatal if the interruption is too long, you can start to kill cells in the Brain and of course the body. Of course a lot more details but way too much for this paper, I will proceed on, Please see the IMP PMM #43 paper. “A little complex”

Hypnotizing Your Self, or getting into a self-hypnotic Trance

In easy-to-understand terms utilizing and applying your own hypnosis to hypnotize your own brain is not recommended, because if you perform this procedure, it means you're reprogramming your own brain and you may never get it to where you first started from; back to its original state, and this almost means losing your original memory from birth, and possibly some of the functions in your brain, *once more you may never get your original brain back*. And the brain you were created with, from GOD. Your original brain may be lost forever, but still, somewhere in your Human brain it exists, the trick is how to get it back, and that will have to be accomplished by another person and a living bio-machine. It is possible that if the Human brain goes into this internally self-hypnotic trance then the human brain and body can actually become a ***totally different person***. This has many good and bad connotations and numerous implications and undertones, in reality, you have a “Living Biological Machine Brain, and you become a different person in almost all aspects of who you were (mind & body) the living person we used to know is not the same person. (ccwb) “Just my thinking”

It also may be possible to create a modified body, that has changed some of your outward appearance, and it may be somewhat far-fetched but still possible. And of course, All matter (humans/animals) is comprised of frequencies and that also means if a magnetic machine is added to the equation that changes the magnetic frequencies (blood) in your physical body, that also means there are absolutely no limitations on what a Human would look like, “Let the NSA,

FBI, CIA, try and get a facial recognition patterns from a Creature (Human-Animal-Plant) with all the technologies I just described, that would be impossible, or highly improbable.

<https://health.clevelandclinic.org/self-hypnosis> More info in my IMP PMM #43 Book/Paper

So as an additional note and some fundamental theories related to hypnosis and all cells in the Human/Animal body is the fact that all movements of cells have to acquire a differential to move, and this goes for just about all particles in the universe. So as you get deeper in this paper I talk a lot about differentials of objects atoms, and neutrons. So this also means that all the cells in the brain to work properly have to be strong and healthy, and have to have good chemistry and electro differentials, this also means as a living biological organism the brain must always be changing and in movement. This goes deep into neuroscience and of course, the food we eat and what the human brain needs to live. In a small nutshell all food and proteins, have different frequencies and this is also where thoughts live, and die, and motor control and all communications happen. Of course, a lot of this is in my IMP PMM #43 Book/Paper which is about ~ 465 Pages long, way too long for this writing, and way too complex, and the history is in the IMP PMM #43 book/paper and would take a researcher a long time to investigate, it took me years to write the IMP PMM #43 book/paper. I also have a lot of experiments in the IMP PMM #43 Book/Paper.

THE **JUMP CODE** TRANSITION

MAGNETIC WAVES TECHNOLOGIES CLARIFIED

MAGNETIC WAVES TECHNOLOGIES CAN SAVE YOUR BRAIN FROM CRASHING and going into a deep depression, Find out how to **JUMP in** and **out** of your brain and have an AMAZING LIFE, AND NOT BE BRAIN-WASHED BY ANYONE OR ANYTHING (DRUGS), (SMOKING), (AI), (IoT), (CELL PHONES) (ALCOHOL), (MAGNETICS) “and certainly not by the Governments and Mass Media of this world”, this Book/Paper is for all Nations and All peoples. This Technology is Not about “Shock Treatments, Occupational Therapy, Electroconvulsive, or any Brain/Cell manipulation”, read the book, “The **NAZI** and the **(sje)** Psychiatrist”, Jack EL-HAI, Amazing Book about how the **NAZI evil minds work**, and wires embedded in the body (Brain, Cortex) for medical cures and control is very questionable. This book/paper is about using your own **BRAINPOWER**, and **MENTAL CONTROL**, and how Magnetic Waves affect your total well-being, and of course a few other **BRAIN JUMPS** that are completely unrelated, but all relative to hypnotics, frequencies, Medicines, and magnetic signals, and many scientific applications. And why read "The **NAZI** and the Psychiatrist", it provides a baseline on how the evil mind works and what direction it can go in, but has a surprising ending.

This is a scientific innovative novel, a lot of scientific things. “Seek the Truth, JESUS” “Read the KJV bible gain knowledge and intelligent and become wise”

Introduction #2

This Book/Paper is mainly about how to **JUMP START** your brain and train it to become more intelligent by utilizing *Frequencies, Motions, Hypnotic Waves* and *Magnetics methods* that are largely related to the basic *Health of Humans, Eyes Disease, Transcranial Magnetic*

Stimulation (TMS), Movement Emissions of Human Cells, and using the Brain Cells in the Cortex. And a lot research on the **Planet Earth** and the **Disruptions and Equilibrium theory of Atoms Particles in the Aether**, some call this dark matter because they can't see it, but not so, it is evident of **JESUS GOD**, it is the glue that holds the Cosmos/Universe together, but it is also what makes the Cosmos/Universe stay in motions; I define this as the **differentials (changes)** in the space and the Earth below, below the Earth, and in space, and the molten rock below the waters. I believe that humans and their well-being are a type of frequency, dark matter (energies) kind of; by the way, what I talk about is not a classical definition of frequencies in physics, these are a mixture of many types of frequencies, and oscillations, some created by humans, some naturally, some frequencies from space, and all of them are related in one way or another, but all from **JESUS**. Each subject listed in this Book/Paper has a **JUMP CODE** attached to it, and this is a short pointer of my thinking related to this paragraph. Some **JUMP CODES**, like a **JUMP CODE BRAIN**, may have numerous definitions. Some **JUMP CODES** point to other **JUMP CODES** with some Artificial Intelligent Enrichments, but a small amount of AI. (sje)

Who is this Book/Paper Intended for?

So, This Book/Paper is intended to be read (deciphered) by reading JUMP CODES subjects, “and these **JUMP CODES** are not in any particular order, but if you do read it page by page it will become convoluted, and you will get discouraged and throw the Book/Paper in the wastebasket, this is a mistake because it has so many new ideas and research in it. My brain thinks so fast and my fingers are Dyslexia, I always have a few people help me write anything, I can spell but it is hard, I see and hear things differently, most of the time, and I see in terms of patterns, numbers, steps, and **BRAIN JUMPS**, it is not easy to write, and these **BRAIN JUMPS** never stops, only when I sleep”. As I stated these entire **JUMP CODES** are related to each other, and I use **JUMPCODES** because this is how my brain and the Human/Animal/Plant/Cells living things work. So basically this Book/Paper is very concerned about Health and World Health, and that means things like the Atom Bomb, Nuclear, Human waste/body and the Virus/Diseases/False Pandemics, Brain and Body manipulations, and TMS research are untruthful data that are trying to re-map the circuits in the brain, and many things related to all life (the magnetics blood in particular), and of course unseen organisms (creatures) in the Cosmos. I do write odd to get people to think differently. Please bear with me. The following is a collection of my thoughts and inventions, in a wild rendition style of **BRAIN JUMP CODES**. “Know **JESUS**, to gain **TRUTH**, and read the KJV of the Bible to get intelligent”, and change your ways, ask **JESUS** for forgiveness, ever day of your life, before it is too late, and churches are close to condemnation if they don't preach “**REPENT**”, and asking **JESUS** into your heart. And where will you go after you die?

Forward

“Sci-fi (Syfi) Fiction is now Non-Fiction”

“A down to Earth Verbiage and Overview short and sweet”

This Paper provides many new and novel practical revelations about motion frequencies, wave frequencies, Electricity and Magnetism Conversions of Matter to Frequencies and vice versa, Differentials of Potentials (DofP), Materials Frequencies Databases, and Matter/Energies, which are all related to Humans, Animals, Plantlife, living and non-living things; I do focus a lot on the Human EYE and *Advanced Macular Degeneration* (AMD). Almost all these novel revelations utilize classical physics as a baseline, reference, and comparison, but this paper explores mostly Non-Classical Physics, such as abstract modeling, methods and theories in Bio-Physics/Science, Mathematics, Physics, Materials Science, Bio-Chemistry, and advanced artificial Intelligent (AI) for complex algorithms and mathematics. Of course, all of these new revelations are related to the Health of Humans, Animals, (Eyes, Plantlife, and yes this can include Sea and Flying creatures, and some references to Bodies in space and their relation to each other, and Einstein theory $E = mc^2$ formula has a lot to do with some of the theories I work with because E-Energies and some masses are in a different structure M (Mass) can also be a set of Frequencies, and all matter is made of frequencies, and that is precisely what the Eye is made of **frequencies**. It is possible to manipulate and maneuver these frequencies in the Eye (Human/Animal bodies) so we can see a very detailed visual picture of the back of the Human/Animal eye (all internal cells), and not only that, it is possible to *Cure and Fix the Human/Animal Eye*, and cells in the Human/Animal body. “Frequencies are Wave Particles, Neutrons, and have a few other names”

How **NOT** to Read this Book

Welcome to the immersive journey of exploring Magnetism, Frequencies, Hypnosis, and how the combination of these three can change your brain, I call these **combinations JUMP CODES (of Human Cells, subjects)**: And for going beyond these **JUMP CODES** that are the unique lens of my thinking. To embark on this thought-provoking adventure, begin by contemplating the book title. Let your imagination roam freely, drawing connections between the words and envisioning the possibilities that rest within the concept that *humans consist of only frequencies*. This book/paper is also intended to get your brain to jump around and think on a differential level, and speed, and let your brain travel down through the entire body.

Next, navigate to the content page list (Page 17), where a curated selection of titles awaits. Each title (**JUMP CODE**) corresponds to a distinct idea and subject, providing nuanced explanations supporting the central theme. Choose a title that piques your interest, resonates with your curiosity, or aligns with a particular aspect of the overarching concepts. At the end of this Book/Paper is the Addendum, I could not address the many **JUMP CODES** in this text, there are way too many, but I have more data and information in the IMP PMM #43 book.

Once you've made your selection, turn to the page indicated in the content list. Take your time to delve into the intricacies of each idea, allowing the narrative to unfold in its non-linear **"JUMP CODE"** fashion. Embrace the interconnected nature of the content and savor the diverse perspectives presented. Engage your imagination and intellect as you navigate through the pages, absorbing the multifaceted explanations that collectively contribute to the exploration

JUMP CODES: And many subjects like Finding Treasures, Medical ideas, AMD, solving Eye problems with AI Advancement for ocular issues in Space, and beyond, Oh Yes there is a puzzle (riddle) within this Book/Paper, try and solve it or hack it.

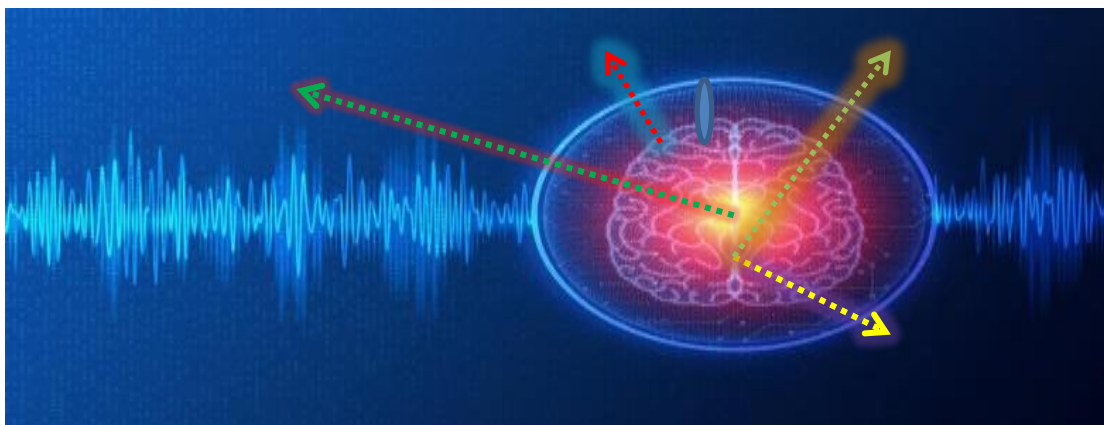

In this unconventional reading experience, relish the opportunity to reflect and appreciate the depth of each idea, and self-invent combinations and add-ons, also contact me for help. Enjoy the intellectual challenge and the liberation from traditional linear narratives. As you progress through the book, allow the richness of the interconnected ideas to shape your understanding of the profound concept at its core. Let the probing of **JUMP CODES from one to another get your mind to browse unknown JUMP CODES:** Like AI Advancements, Space, *UnseenBogeyman*, and Way Beyond, be a captivating person and enlightening journey. And once more not only doing the above, but if I'm correct Humans, Animals, Plants, and living things (all matter) are prearranged like solid *Irregular* waves of energies (**sjcs**) persist in all matter, living and non-living, each cell has its special, different wavelength, and send and receive methods.

Note: *This book is not meant to be read Sequentially or in order*, please read it per the title (**JUMP CODES**) on the content page (Page 17), (and not go from page to page), it is meant to be read by **JUMP CODES** content and might not relate to anything else in the book, but gets your mind jumping around, and also this whole book/paper is sort of crypto-code, so it is a stand-alone book/paper I just use **JUMPS, JUMP CODES** associated with subjects). I would apologize if there is any confusion while reading this book. The intricate subject matter surrounding utilizes magnetics & frequencies for various applications and can indeed be daunting. Factors such as technical terminology, complex theoretical frameworks, and the breadth of potential applications may contribute to a challenging comprehension process. Additionally, the diverse array of disciplines intersecting within this research, including physics, electronics, magnetics, space, medical, engineering, chemistry, and science in general, might further add to the complexity. Nevertheless, the central idea of the paper remains focused on exploring the vast possibilities and implications of leveraging *magnetic frequencies across* different fields. With patience and further exploration, a clearer understanding of this innovative concept can certainly be ascertained. I have a special algorithm that decodes this entire book/paper to unravel its hidden meaning. Please get in touch with me.

***JESUS (GOD)**, thank you for Grace, and the ONLY HOPE before and after death*

Brain-Cells-Neurons-Matter in The Universe

Electromagnetic Technologies & Frequencies Wave Discoveries

Magnetic Conversion of Brain Cells into Space Fig 1.305 Actually from the Body/Brain surfaces to all parts of the Aether (bjgal).

“The Text and Images above has coded Algorithms in it”

The pictures above Fig 1.305 somewhat depict Nano Bio-chemical *Neurons* as bits of atoms in memory, stored in the magnetic dark field of the universe and in every part of the Human body, “*very important*”, the picture is not complete yet, which also means that all matter, words, pictures, objects, and movements are recorded in the universe, and with the right machines and AI all of this information/data can be retrieved, and reused or completely rearrange, as a living memory-pictorial graph that can expose all event in the history of mankind, and this including the birth of **JESUS**, and the begin of creation. This paragraph leads into the following section.

*Nothing (all matter) can be destroyed and only the GOD of the Cosmos can create anything (all matter) from nothing even then this Forward and Reversal of seeing these bits of matter, and that includes words and thoughts in the universe can be retrieved. So I believe that a “**Super Magnetic Motion Rotational Barrel**” (SMMRB) device can do all of the above, (like a miniature super spinning cosmos in a barrel). This technology can take blocks of the atmosphere (space) and then divide them into either pictures or phrases that we as humans can understand, and other AI, (ASI), (AFI), machines can translate these blocks of data (data spaces) into a readable and useable picture. The true beautiful art of *Biological AI* in the body/bones of Humans and Animals and some plants' life can be captured by the Super Magnetic Motion Rotational Barrel, but one of the key components of these new technologies listed below are the sensor mechanisms that sustain the Artificial intelligence motions of magnetic waves algorithm.*

As you read this book, it covers a lot more concepts that are listed above, some ideas I added in because there are methods that are somewhat concealed from the reader in their complexities, and that is by design, and are intended to get the reader to extract statements and paragraphs to formulate some new ideas and concepts, which I want to communicate. *Putting all of these ideas*

and methods together can achieve amazing things. These are Electromagnetic Technologies & Frequencies Wave Discoveries. The total health of all beings relies on a balance of magnetic frequencies between the living blood cells that have been created by Homo sapiens (of course the singular author of life JESUS).

A word to the Homo Sapiens (actually *everything* that has breath) that has a certain amount of intellect, (cells), “It is not how smart intelligent, bright, clever, knowledgeable, rational, logical, beautiful; it is the ability to put ideas together, and yes that means common sense things, simple things, a visionary. So when someone looks at that *anything*, they see combinations, and how to analyze these *anythings* (it means *anything adjacent 360° X 360° of an object, all around it, a spherical view*), what does this *anything* affect what, and what is this *anything* used for, or do?

Once more the unseen world may come into play.

PROLOGUE

“This paper is intended to be a little convoluted, and my writing is off the rails”

“DETECTING, LOCATING AND MODIFYING THE CELLS FREQUENCIES IN THE HUMAN BODY, AND THEIR UNIQUE PATTERNS AND BEHAVIOR”

All living organisms such as cells and tissues in the human body have **Unique Frequencies Cells Patterns(UFCP)**, and also Magnetic Rate of Change (RofC) Motions properties. These **UFCP** cells consist of individual arrays (sub-cells, atoms) and of course different configurations and behaviors and how fast they move in the Human/Animal body. These **UFCPs** have a differential relationship to other cells and tissues nearby, and as such have different relationships to Distinctive Proteins, Blood and Oxygen, and some cells we can't yet identify (sub-atoms). All cells are comprised of many types (mixtures) of frequencies and movements and are always in motion even after death for a period of time ~ 5-6 Hours, such as the Human Eye, these differential relationships create an electrical chemical potential (Volts/ Currents/Movements), these currents cause motion and equate to the macular moving and shifted vision, others: These Unique Frequency Cells Patterns (sub-atoms particles) are strongly bonded together, making up the body and in general LIFE, ALL LIVING ORGANISMS. So in my dissertation (sort of, paper), “All cells and living organisms are Unique Frequencies, and also a mixture of many different frequencies, along with 118 different elements, and collects of magnetics/ magnets, and electro-chemical elements (Electro-Liquids), (Lipid), Oxygen, and other chemicals (11) ”. **Conversion Equation:** (Freq. of Cells →Gas Separator →Crystal Spectrum→Digital Codes), Noble gases can be used to determine the digital frequencies, sent into a computer or analog device, of course, these are the cells patterns (Human/Animal/Plant/Cells).

These Unique Frequency Cells Patterns are Elements vibrating at a vibrational subatomic level that is hard for most humans to imagine, or even comprehend. Still, scientists have seen certain Frequencies and gravitational pulls that affect the human body adversely, especially in space (the lack of gravity). Our best microscopes can't really see these Unique Frequency cell patterns (atom size- and shifting), but frequencies do affect living cells in different aspects, which can be negative or unhelpful, as it is hard to define quantum frequencies, but certain frequencies have been used to help and cure diseases related to cell frequency technologies (still conjecture in the

medical fields), it is noted by several known universities that lower level frequencies do affect the magnetic particles in the blood and the brain, and don't forget that blood vibrates at a different speed, and this can also be affected by an emotional BRAIN JUMP, and why is this important. So if standard magnets can manipulate particles in the blood, then Unique Frequency devices can affect cells in the human body, (my assumption). But I believe frequencies play a big part in how we can examine humans, (*Low-Mixed Wave Frequencies*). These types of frequencies are not explained in most textbooks, but I describe them as clouds of motions / magnetic energies, once more hard to understand, I have more on this subject in in my IMP PMM #43 book/paper. And how people sense people and motions, blood, and just about anything. "To use any type of magnetics they have to be Magnetic Focused Beams, so as not to harm other cells in any other living organism cells". And once more this is not your classical definition of frequencies a Mix of Frequencies and Magnetics/Electrical pulses are completely different.

What are JUMP CODES & BRAIN JUMPS?

So what and how is one of the most important ways to express an invention or methods on paper that you want to convey to the reader, and not too technical? Before we get started, this book is written in a kind of art form, that has its *individual style* and unusual odd phrases that it uses what I call "**JUMP CODES**". This means the subject matter you are reading right now at any point may be interrupted by a **JUMP CODE from the reader or external interference**, and does not follow normal analytical thinking of the subject you're just reading. Hence these brain external thoughts coming into your head may direct you to a new and totally abstract understanding of the original idea of the author, and that interruption is a "**JUMP CODE**" in a second of time may change your mind about the whole topic you're reading about.

Of course, this is intended by the AI in the brain as you think throughout the subject matter, in many ways this is normal, and realize some very important facts and thoughts have to be written down very fast. You have to get these inventions or methods down on paper before they disappear, so we have "**JUMP CODES**" appearing in your head. So these "**JUMP CODES**" may come after reading a paragraph, or in the middle of the paragraph, by the way, it is very, very hard to hack a handwritten not in your pocket or an image code.

Sometimes "**JUMP CODES**" (thoughts) in some way will relate to the overall paragraphs in the book or the whole book, in either case, they come very fast into your brain but have to be added into some text immediately, this is my descriptions of a **JUMP CODES**.

DISCOVER your BIG JUMP

“One of the many things I’m doing right now is to discover where your Brain Neurons in the cortex are **JUMPING to**, away from where your cortex, at this *instant In Time*, and where the **JUMPS** is NOW, (and also out from the cortex toward space, (like a magnetic attraction, like a magnet), and how to capture those **JUMPS**”. Write them down, NOW, right NOW, on the side of the book/paper, or on the computer/cell phone (**JUMPS** are other ideas that come into your mind/psyche over the current thoughts). Start Writing, this will help you think faster and Better, make a **BRAIN JUMP** and a *Switch* is not the same as a **JUMP**, (more directional), it moves from side to side, actually they all go into a spherical type of **JUMP** per the thought signatures and patterns.

Add in your JUMP CODE here

So what you just did is called a *Differential Brain/Body JUMP (DBBJ)*, because there has to be a *differential* of neuron cells occurrence instantaneous in the Brain/Body to create movement, and thoughts; and this is where things like Brain/Body *diseases* come into concern, (diseases cells, inflammation, lack of blood flow and oxygen, rearrangement of cells, of course, infections (and adjacent bad trauma), and extreme abnormal pathological behavior also manifests itself, mass violent, mass shootings, and Not normal thinking materializes (egotistic, egocentric, narcissistic, conceited, self-absorbed, self-important, self-seeking, self-serving, vain, and smug) <https://www.google.com/>, of course, the environment can have a lot to do with this type of behavior, and how people are abused (all types) and brainwashed early in life, and *Alzheimer's disease*, *Dementia*, *Autism*, is a neurodevelopmental, Attention-deficit/hyperactivity disorder (ADHD), and sadly enough a lot of the above is caused by a bad diet, and fat near the heart and other organs. And some vaccines have also contributed to these problems. In many cases, the Human Blood has been tainted and is harming people. “Current foods 2/9/2025 are not good coming out of the Earth, this is very bad”, grow your own foods, and “**Use NO, NO pesticides, Fertilizer, Chemicals, NOcides NONE**”, and other harmful chemicals/colors/antibiotics additives.

THE COLD-OPEN NARRATIVE

“The Brief History of A Magnetic Pulses Movemenst”

War-Room S.K.B.

MAGNET / ELECTRICAL CURRENTS THAT AFFECT HUMAN CELLS

I was working on this paper, and I saw my USB connector move (External hard drive connected), a current / voltage was going through the USB connector (wires) then into the computer, and back, doing a data transfer. So this is very important because when a magnetic pulse or an electrical field can actually move a wire or control a switch and not physically touch it that indicates that cell phones, Cell towers (Especially 5G, High Power RF Radar), and even Satellites can have a great effect on your Brain and any cells in the Human body, including Animals, Plantlife, and in the Earth, and almost all matter in the Cosmos. In many respects, the world is polluting the Cosmos, and killing the Earth, and its inhabitance. A related side note: “There is **IRON / MAGNETICS** in the blood, Duke Universe”, and don’t let Doctors pollute your Blood, “The power is in the Blood.

JUMP “quantum magnet frequencies” **CODE** “Unique Frequency Cells Patterns, Restated”

This section is about small quantum frequencies (cells) in the human, and animal, body. I mainly focus on the cells in the Eyes and cells surrounding the Eyes, some cells that are connected and adjacent to the Eyes, and of course some plant life, they are all related to quantum magnet frequencies of all living cells in the Human/Animal Plant life.

So certain types of quantum magnet frequencies can be very destructive, but at the same time have amazing medical and biological applications. These quantum magnet frequencies are close to the atom size, such as electrons and photons and this is a classical definition, so biological cells are larger than atoms, and atoms are 0.1 to 0.5 nanometers wide, cells span from approximately 0.1 to 100 micrometers wide. Hence, a nanometer is 1000 times smaller than a micrometer. This is important because minute (minuscule) quantum magnet frequencies are in the range of nanometers, and that means they can’t be probed deep into the cells, so seeing more than a powerful microscope now is almost impossible (2025). In reality, this is a visual conversion of the cell optics to the frequency optics imagining, the quantum magnetic frequencies give much more amazing details. Utilizing frequency devices for Brain therapy is very dangerous and only in special cases should be applied, and not to brainwash any Humans. Brainwashing started in the 1800s and was used to influence and control people, for power, and in many cases, it was in the media and subliminal. "They never knew what hit them". But in 2025 this technology is a possibility, and I still think this is not a good application for neuroscience.

JUMP CODE #1

“Dr. Rife Microscopes **Important History**, “ A genius we missed because of Pride”

It was deduced by Dr. Rife about 1888-1971 that frequencies have an effect on cells in the human body, his frequencies were in the range of Hz, and Dr. Rife is known for his microscopes. He was recognized by many well-known Doctors at the time 1931~.

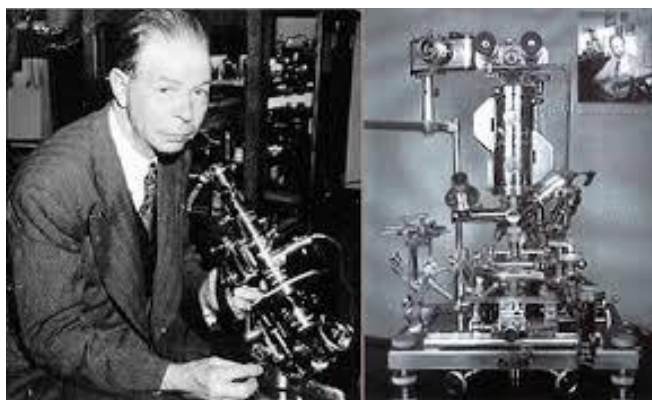

<https://www.news24.com/news24/an-inconvenient-truth-20170125-2>

<https://www.youtube.com/watch?v=SSXs-vdOs5c>

https://en.wikipedia.org/wiki/Royal_Rife

What I talk about is different than what Dr. Rife spoke about, but something is similar. I think he did great work. His work was amazing, and I'm not sure how he determined the many different frequencies and optics (and pictures), or even what the theories and methods he used, I do have some ideas per his writings, and the “Rife machine” pictures, and at that time they only had a crude vacuum tubes and are older electronics (but they did have electro-mechanical computers) and vacuum tubes are a great Mixer of Frequencies and have many harmonics and side-bands, this mixing can be done with transistors, but not as thoroughly. However, the basic theories that frequencies can cure cells (cancer cells) in the human body are correct (I believe, but have no solid proof of that?). I have done a lot of research on his work on these theories and methods. Crystal is a great source of mixers, and use different cuts of crystals together in parallel to accomplish this. “N. Tesla a man ahead of his time”

So Dr. Rife did have optics and Prism, and High Voltage, and his machine devices were well designed. I have designed magnetic/electromagnets/transformers/antenna oscillators/combinations that have transmitted power not using any wires and actually right through the human body (my body) without any harm to cells. I have also designed detectors that go deep into the Earth, to find raw Earth materials. As a disclaimer, I ask no one to use these ideas before they contact me and get permission, although many universities are using frequencies for many different applications. The frequencies I use are in the mill-watt range and very low power ULF. But still, these are theories and ideas, not yet proven. My ideas and theories are different, but Dr. Rife had the right ideas with frequencies for healing. “Dr. Rife lists all these frequencies in a document”. Mixing frequencies and low-voltage: currents is a science in itself, and the feedback from an isolated power supply has to be considered, this is a very tricky hardware design to build. Dr. Rife and his Microscope (1888-1971)

“JESUS hates pride”

JUMP CODE #2

“Transcranial Magnetic Stimulation (TMS)”

The Pre- **JUMP CODE** page

Transcranial Magnetic Stimulation (TMS) of the Brain **sjcs teaser**

This brings up the **Transcranial Magnetic Stimulation (TMS)** frequencies that are being applied to the Human Brain, and this has been going on for many years (~1960), So I did a lot of research on this **TMS** and almost 90 % was that **TMS** did not affect the Brain/Humans body (Eye/Retina), there are many research paper and documents on the internet and books on this subject, but my specialty and expertise are Robotics, Electromagnetic, Magnets, Oscillations, Vibrations, and Frequencies, I built a Robotic Arm for NASA, and worked with the US Pentagon, and different agencies. So after compiling (complying) with a lot of research, I believe that these **TMS** technologies/treatments are harmful to the Human Brain and the whole body, After intensive research I found that there are a lot of studies that agree with my findings, (**TMS** is not good for the Human Brain and Body and is a type of **Human/Animal Brain Virus/Disease** caused by **TMS, Cell Phones/Towers, and High Power Transmitters, and Satellites, and of course Particle radiation used in medicine**, to name a few, once more this is my opinion, but I do have a lot of research to prove this. My IMP PMM paper is a ~506-page report on almost all of these subjects listed in this **JUMP CODE** Book/Paper.

I have a lot of research papers on this **TMS** technology, and they are not good for the Eye and all inner parts of the Eyes, and the connection between the Eye and the Brain is very much affected by **TMS** (I do have many sites listed, about **TMS, Ref. my IMP PMM #1-#43Paper**. So **TMS** in the short and especially in the long term can cause many problems in the Human Brain, **Eyes**, and of course the body. Can it affect the way people think? I believe so. And does this mean their thinking is upside down (confused, muddled, topsy-turvy), once more I think so, and after a few years this also means no common sense, even how to think out a simple problem and even to the point where the food people eat is upside down (poisonous foods, even in the Earth), that means **Obesity** becomes a human health problem for the world? The bombardment of magnetic waves on Human/Animal/Plant life is a big problem, and this includes Cell Phone Towers and 5G, and as the speed of Wireless Power and frequencies become faster this increases the health problem in the world. In general, most cell phone and internet providers intentionally manipulate frequencies. I believe this is because of greed, corruption, world control, and dumbing down the world population. “And why are there so many handicapped, Diseased, Contaminated Children, + Sick People, and Animals, Eyes are very bad”? “(**sjcs +100 %**)The food and waters have chemicals in them”, and when corrupted Politician and Almost all leaders speak their voices and tones fade, they slur down to a low volume, and no one can understand them, this is a tactic to fool people, all people, people hear different thoughts, this is extremely bad. So what I’m saying is they don’t tell the truth, and that is the way they get away with the lies. (**sjcs-**), so **TMS** can affect the brain and other parts of the Human/Animal/Plant, (the body).

<https://my.clevelandclinic.org/health/treatments/17827-transcranial-magnetic-stimulation-tms>

JUMP CODE #3

“Objects / Objects in Space, and the Differentials” (sjc)

“How to use Planets for propulsion of space ships in the galaxy and harmful Objects in Space”

The objects (Satellites) in space and other objects are very harmful to the Earth and the *slower Radio frequencies (RF)* to and from the Earth are extremely damaging to the atmosphere compared to higher frequencies because lower frequencies can penetrate almost any material, including the Earth. A preliminary equation for this galaxy would be something like (planets Δ) + (Aether Δ) • Dts = ($\sum p1$ to ∞ + Earth, $\Delta^J, \Delta^n T$); (sjcs-), and all text in the Parentheses of this equation should direct scientists on how to manipulate the Cosmos planet properties and the Earth, and how to do space travel faster than the speed of light. I don't have the correct drawing or software to make the equation correct, the point is all of the factors on the left side of the equation will change the Earth over time, and this includes everything I stated in this paragraph, and I'm not sure if this equation is correct yet. “This is a very very complex equation, and important”, and this is a first try to explain and define it, it will take me 3-4 months to complete the equations. ***:

How to find the differentials that make and keep all Stars and Planets in Order: (sjcs+/-)

The (planets Δ) Is a complex transformation, it is a Delta of the Planets all working in unison to create the Cosmos (for this paragraph it is in the Milky Way Galaxy Only), and the reason this is so hard to figure out that there are so many Planets and Stars that affect this equation (the Earth) I don't even know where to start, I have an idea, but still not sure, I could use a lot of help from a cosmologist (Cosmology, astronomy), because I believe that the differential of bodies in space (stars, planets) could figure out a differential between the Earth and other Planets in space, and thereby knowing how to use this differential to obtain space travel, without ever using rockets fuel and other propulsions methods, just determine the differential and the pull and push of a space ship would occur. Of course, this is an equation that would require a very large supercomputer, with many variables, and it has to calculate the distance, speeds, and sizes of bodies, orbits (360 degrees from the Earth all the way around it), and a few other things I list in this equation, + (Aether Δ) • C² = (Earth $\Delta^J, \Delta^n T$); as you can see this gets little dicey (multidimensional in all (many) fields), and there are countless sub- calculations to compute.

So how to begin, by breaking down a sub-set of Stars & Planets, and giving them a set of numbers (Supposition 1.0) for example, then on to another sub-set (Supposition 1.1), and so on, this of course is almost in my head. Then when you get all of these subsets, you compute the differential between these subsets, and on and on. Then you have to use calculi calculus in space to add all of these numbers together and see what the differences are between the Earth and any set of Stars or planets. By calculating these numbers you can determine the pull/push from the Earth (in this case), by the way, this has to be a spherical set of numbers, more than 3..100 Dimensions, not an easy calculation, But if you can solve these equations then, it is easy to figures out how to make a Space ship and the frequency needed to propel it. This is where *Albert Einstein's* theory comes in. Still, the definition of matter has to be re-defined, Matter is a frequency and to make my theory correct, matter needs to be a frequency the definition of Energy also needs to be redefined, and that is because the frequencies determine the differential that determines the pull/ Push of Stars and Planets (bodies in Space). The basic theory I came up

with is “if there is no difference of potential, then there is no motion”, this is the Key to the equations, I wrote down. And also the need to convert Matter/Energy to Frequencies, you are calculating the dissimilar of frequencies (solid frequencies, defined later).

There is more on this in my IMP PMM book/paper. As a secondary Note: I believe there is no such thing as an Equation, it is an accumulation of data/matter from many factors to a summation of events, and they are not always equal. **(jcp)** “A 3-D Spherical **Coil** device needs to be built, to detect any thing in the universe”, (this is also known as the Magnetic Death Barrel, with a **spherical Coil** transformer embedded in it) “I think if the builders of the spaceship would build a rotating magnetic sphere around the inter-body of the space ship this may work for Anti-gravity or a differential in a spaceship; a differential of “Bodies, Masses” would mean No more rocket fuels needed to leave the Earth atmosphere, long travel in space faster than the speed of light is possible”. And only a 3D printer can build this device, because it is so complex in side***

“Matter, Motions, Creation, Sustainability, Planets, Planetary Motions: the un-solver-able equation”

JUMP CODE #4

“The Alignment of the Planets”

“RJ45, TMS, Magnetic Fields”

The Earth as it evolves is changing the Cosmos and alignment of the Planets; this is not a good thing. The Earth's magnetism and Earth's fields are not only changing the Cosmos but changing its *rate of speed, Rate of Change (RofC)* as it expands, this is a well-known fact in science.

“Atomic & Nuclear testing has to stop”; “Can the government send in a High Pulse (Beat Freq.) on any of the 8 RJ45 Pins, or even the RF WIFI, **YES**, to make an absolute fail-safe internet switch all the 8 connections have to be open (big gap, cut, this is the Dark side of the internet), and the RF has to be changed in transmission to Null values that can't be hacked in the Aether.

The main reason I bring this up is because, if a *magnetic pulse or an electrical field* can affect a wire or a switch, or even non-electrical devices mechanically, what can it do to the Human Eye, a lot, and this also is very bad? Also consider the magnetics in a Space ship or a long flight in space that affects Astronauts, **(sjcb)** or even a few miles above the Earth. Advanced Macular Denegation (AMD) is a prime candidate for eye and vision problems. This magnetic pulse *or an electrical field* even of very low power (location/distance) may be part of the cause of AMD; this is very possible; more research is needed to prove my theories.

These magnetic pulses or *electrical fields* also have certain *frequencies*. This is discussed later in my paper because the drusen (yellow Spots) in the Retina could be dissolved by applying a *Wave Frequency Technology*. So both the magnetic pulse or an electrical field and frequencies are critical to curing AMD (vision). So cell phones, cell towers (especially 5G), and even Satellites may contribute to Eye problems and even AMD. And by the way, drusen is layered in between cells and the exact frequency beams would have to be sent in from a side angle slanted position.

So as a side note: Doctors using **TMS** frequency devices have to be very careful because **TMS** frequencies are widespread, and not spreading the waves to other parts of the Human Brain and parts of the Human Body (EYE), this is very important. Using a focus beam frequency to remove Drusen would be totally different than the **TMS** technologies utilized; a *focus beam has to be used*. (**sjcs**), (**sjcs+**) “The technology with the Thermal Neutron Beam Port (experiment) can be dangerous to the Human Eye”, my summation. The experiment is listed below.

<https://phys.org/news/2024-11-detector-sensitivity-neutrinos-dark-latest.html> This paper (URL) is related to what I am talking about, you have to read into it slowly, very tediously to understand the theory, but it digs deep into your brain, and the EYE.

BRAIN JUMP #5

“What is it All About”

“Below are some **fuzzy** ways of thinking? What is my motivation”

So why write this complex paper on Utilizing Magnetic frequencies and related Artificial Intelligence (AI)? And why do so much research and experimentation? What is my motivation? And what is the purpose of this book/paper? Is it bring forth better health, better living, saving the environment of Earth, stopping wars, stopping a free America from becoming a Communism Marxism state, or the world from being taken over by the Marxists, Oh yes better-advanced science, better technology, stopping evil from taking over the world, stopping the evil virus planted in human brains, restoring God-given rights of the human race, solve the energy and food problems all over the Earth, stop all killings, stop the atom bombs, stop killing Brain cells, eradicate all pandemics on the Earth, saving the killings of babies, stop abortions, stop all pandemic lockdowns, to stay clean, and keep your feet clean and wash your hands all the time, watch where you walk, and talk at people from afar, never let anyone in your house or car, if at all possible, keep your mouth shut, never start an argument or fight, never fight the law, you will not win, write down everything on paper, keep it to yourself, tell very few people about your inner thoughts, only **JESUS**, respect everyone, “Never fight on someone's property, use your ground”, Stop the mutation of humans, and animals, keeping the American Constitution as law in American, flowing the KJV of the bible and having the ten (10) commandments in schools, allowing free speech, bearing of arms in American, states’ rights upheld, following the “Bill of Rights, to the letter of what is written”, common sense restored from the KJV Bible Dt. 0-12-34..., blessing, Honest elections and stopping corruption in the US Congress and Senate, using money for medical health, stopping funding wars, and evil, following **JESUS** .., Stopping satellites from spying on individuals, any person, any location, and having a small explosive in your house, or a weapon detector in your pocket (I have one), and stop polluting the Earth, sea, and outer space, fixing blindness (AMD), curing cancer, and many more. Tell the truth, just my personal beliefs, don’t take others' land, and don’t take the shot (vaccine), fight for freedom (Bill of Rights), and stop pride, serve **JESUS**”. Do what the Bill of Right shouts, basically American

politicians are very corrupt and in some cases not far from the Marxist way of thinking, *bless GOD*, OK, have many guns as you can afford, and many at the door, have a network in place, Pray a lot to **JESUS**, Help people all the time, all people. “Utilizes a Bag-Detector in the ground the sense all thing, long-range” **(sjcs)** Is this what it is all about, as I listed above? **JESUS HOPE**

JUMP CODE #6

“Basic Information about this Paper”

“Classical frequencies mathematics definition, **JUMP CODE thinking**”

I have not added any basic information about frequencies (mathematics) in general, because it will take up a lot of space, and make this document too long, but as an insight, this is not about your normal frequencies (classical frequencies Definition in a science book), the frequencies I will talk about are a mixture of magnetic waves, frequencies in and around the Earth, even in the Cosmos, but somewhat like a mixture of gravity and particles that are still not known to man. I assume the reader has a good understanding of basic Magnetism, Motions, Frequencies, Electromagnetics, Human Cells, and The Eye, and also has a good grasp of classical science, mathematics, and how to reason out basic logic, and common sense things, and possibly how to combine many different ideas, and methods, and delineate a logical conclusion of combinational processes (putting things together) Oh yes knowing how in 2025 technology (IT), bio-science/chemistry, material sciences are also very critical to have some comprehension of how to solve complex problems, and in this paper I don't try and give a lot of mathematics or physics, it is just way too much. I do try to provide many references and URLs and some key encrypted technologies that is what I call **JUMP CODES** pointing to different subjects about my theories and ideas. **(jcs)**

As a note related to the Eye: the fewer connection points (nodes) the less magnetic power is obtained and lost. Anyone's eyes transmit magnetic codes that enter your eyes, don't let this happen, and don't look directly in their eyes or parts of their body, and for sure close to their Heart. The Human/Animal eyes are a receiver and transmitter, an amazing memory device, and a long-range tool; it is also a weapon of war, the eye can pull energies from your physical body, and the eye is a very powerful tool, watch where you look. In many respects, this is a type of transmission in reverse order. Humans/animals have many magnetic eyes, but most people never use them, like when someone is looking at your thoughts from the back of your head (any part of the Human Body) they almost know exactly what you are thinking. This is a very special study in itself, and the frontal lobes of the brain are a great place to start. This is why Hypnosis is dangerous in some respects and Hypnosis/Hypnotic frequency can enter your brain cells and this is how the control of your brain is obtained (One way).

JUMP CODE #7

"So How do you think, Analytical, Random, or what physical angle of approach do you receive a **JUMP CODE** (thoughts) in the **BRAIN** (body sensors cells), and from where"?

&

"How do you Contemplate, Analytical, Random, Cubical, Top, Below Ideas or what physical point in your body do you receive data from, and how?"

JUMP CODES in the Body, or a far-off Body experience

"Later in this book, I give a good description of **JUMP CODES**"

"Doctors and the medical profession have failed to look for magnet patterns related to the Human/Animal/Plant organisms" (**sjcs**)

Basically, **JUMP CODES** are offshoots of the moment Thoughts/Ideas

The main point I want to make is, "If we as humans can control, and manipulate *particles* (*atoms*, the Aether) in the universe, we can achieve all that is listed in this paper and more", and that is in the upper Heavens (3rd, and Above) and below the Heavens, from Corners to Corners Crust to Crust, and if these theories are possible energies, space travel, moving Heaven and piles of Earth are feasible, and are a certainty, travel to MARS in our lifetime (2025-2050~) is attainable. This is a U.S. encrypted document, encoded, and if a hacker can break its embedded codes; I'm astonished, and without manual intervention physically from someone (me) it is almost impossible to do. And if these theories are true (what I just said) where do these atoms/particles of aether come from? **GOD JESUS**. "Oh, the encryption is in an algorithm, not listed in this document".

JUMP CODE #8

"Quantum frequencies and the *Focus Magnetic Beam Technologies*"

"A new microscope and device for the Human Eye"

This Book/Paper talks about minute quantum frequencies that are smaller than human cells' that optics (sensors/detectors) can distinguish and separate the religion of human/animal cells to almost the atom levels, which means looking inside human/animal cells in any part of the body and obtaining authentic, accurate and true images of the target human/animal cells, and all their adjacent/ neighboring cells. This also indicates that all Humans/Animals have discrete total body frequencies that make them unique. This means that humans and animals are not all the same and operate differently as one collective singular entity.

"The Backbones of the Crystal-Generated Frequency Device"

A Small Eye Machine and Portable/Mobile "**RW-Eye-Cell-A-Scope**", "**The Eye Cell-Octa-Scope**"
For "**Magnetic Brain Surgery**" and "**Magnetic Brain Slicing**" ***

This, of course, is not your classical generated frequency we are discussing; it is a special crystal-generated frequency using advanced sensors and emitters, and this is called a Bio-Crystal-Electron Device (BCED). This BCED device is like utilizing a **Magnetically Surgical Knife** that magnetically cuts and records quantum slices of the human/animal body at any location (3-D-360 Degrees, every possible view), and uses Artificial Intelligence (AI) and special magnetic focus beams to accomplish this (the BCED) that uses a high-speed computer to

reconstruct these slices into a high definition (microscopic if needed) true color images (size shape, contextual, irregular shapes). A drawing for this type of machine is needed, but a Reality-VR Headset could be used, as for a device that removes Drusen from the eye.

A SUPER BRAIN JUMP #9

“A solution to creating gravity in a space ship for long-range Space Travel”

Artificial gravity in space, gravity is what holds the moon in orbit around Earth “**not so**, it is the differential of many planets (adjacent stars / planets properties) in the solar system, that creates a push, and how atom particles (neutrinos are expanding in the universe, and the calculation for these theories, hypothesis would be gigantic”

$E = mc^2$ is just a start

It is only the Differential between Matter that makes things move, absolutely no matter moves without these differentials, and that includes the smallest partials (atom) known to mankind and beyond our time and hard to comprehend. But if Einstein is correct ($E = mc^2$), then there is a missing part of the equation, that is frequencies, or unless you change this equation in a spaceship so the Astronauts don't have ocular eye problems and can't see well, that may mean the missing part of the equation in the space ship has to be modified, that missing part (variable) may be frequencies, of course in the space ship, a little complex. Of course, changing the “[E energy](#) or the [M mass](#) in the spaceship may also be an alternative. I have emitted a lot of mathematics, because of the space (no pun intended), and this paper is intended for a reader that is well-versed in sciences. I have a 426-page paper on math and physics, it is very hard to understand and comprehend these theories. Even for me, I wrote all of it over a few years (started in 1984).

“So what is the solution to creating gravity in a spaceship for long-range Space Travel?”

Based on my previous theories, hypothesis there may be 2-3 ways to do this. 1) In space ship create a rotating differential between all matter, and objects in the spaceship (the inside), and that means that the inside gravity would be equalized, which could be done with a different shape of the inside of the spaceship, a different contour design of the walls and where the Astronauts. 2) The bottom of the floor in the spaceship could have a rotating magnetic field that would pull down, or equalize the blood in the Astronauts. 3) The inside of the spaceship would need a permeated magnet (infused) in the astronaut's uniform. The basic idea is to create a Differential of potential in the blood (body) of the Astronauts, the whole body, and especially the Eye, and that means changing the magnetic flow of fields in the side of the ship, this includes changing how the inside of the space ship is designed and the materials used, there are a few other designed not presented here. Also, it is almost like creating a parallel pseudo-astronaut body close to the Astronauts, a little hard to understand, an Earthly environment in a spaceship. *Will the Human body revert back to its original shape when reaching its destination?* In my estimation, a trip to Mars means we (the US) would need to have a spaceship with the environment of Earth and be faster than the speed of light, and this is very hard to do, as of 2025. There are so many factors to overcome, actually, the Human body would not make it under the

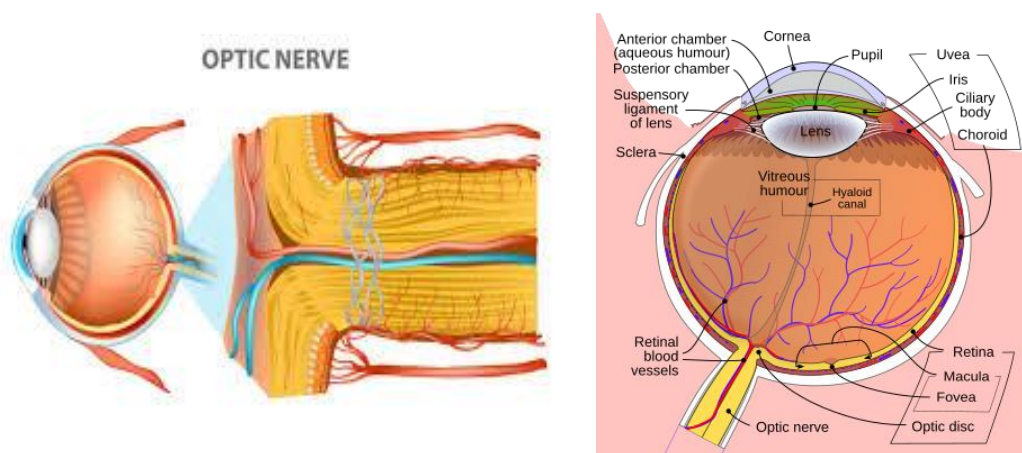

current conditions, and the people in the spaceship would be *blind*. And I believe a trip to Mars may be 200 years away from the date 2025, if that, of course, a lot has to change in space travel.

JUMP CODE #10

“The Human EYE” (sjcs)

“My Theories & Hypothesis”

Concerning the Human /Animal Eye: The Inner Brain (diencephalon), cerebral cortex, and visual cortex to the optic nerve through the Retina, (the macular), (of course a lot more paths) must *Send* and Receive (Blocks of Frequencies of Mixed Analog Data, Pictorial) to and from the Brain by using electrical impulses, Pulses, (for lack of a better word, **aether the hypocritical matter, neutrons, once more hypocritical matter**), as a transporter, and this definition also includes almost any part of the Human/Animal/Plant Life/living-organisms, I call this *transmitter-cells-transmissions*. And a very special set of deep cells that Receives and Send magnetic signals to and from critical paths in the body (not only the EYE). Of course, this occurs in many different sea/flying creatures and many land animals, and as a note: Almost all animals can read a human's mind, and sense evil and good. Likewise, the Human/Animal body senses other people's Human Waves and can sense their presence, being, looking at them, and their thoughts, amazing technologies. See the figures below

https://en.wikipedia.org/wiki/Optic_disc <https://www.allaboutvision.com/eye-care/eye-anatomy/optic-nerve/> , it is very hard to get a true image of the optic-nerve, with current technology it is almost impossible to do so, we need a Frequency-Image in real 4-D motions/pictorial, use a magnetic focused Beam device or a PBU Passive Barrel Unit, slice it into magnetic slices and re-assimilate it in the computer, best methods.

So Low frequencies can penetrate and apply Magnetic frequencies to many internal cells in the Human/Animal body (all non-invasively) while utilizing a Wave Magnetic Focus Frequencies Beam that can detect and cure diseased cells that are almost impossible to reach with conventional methods. So in easy-to-understand terms, not only the Eye sends and receives

signals but also different parts of the body, including the blood that can do almost the same as the Eye (this is my supposition). The Wave Magnetic Focus Frequencies Beam is a solution how to cure /fix problems in the Human, and Animal Eyes; of course, AMD is one of the most important ones, there are other devices that can also eliminate AMD, such as “The ***Dual-Dual Magnetic Motions Barrel***(DDMMB)”, I talk a little on the DDMMB barrel. The DDMMB also can add chemicals to the magnetic and deliver it to the target area." Convert the chemicals into frequencies, or mix the chemicals with Nano carries that are attached to the Skin of the Nerve, this can be used for almost all nerves.

The DDMMB barrel is a rotating barrel machine that Sends and Collects data through just about any media/materials. The width length and material determine the speed and range and the type of materials the DDMMB is looking for uses these magnetic coils embedded in round irregular circular pattern sensors, these very small magnetic coils (coils and crystals combined) act as transmitters or receivers to locate the target material. As it spins at certain speeds it sends out Waves of energy and also collects magnetic waves back from the target. The DDMMB barrels have to be aligned have special bearings, and are always starting and stopping. The DDMMB has an outer and inner barrel, and possibly two or more barrels. This device can be very small and have very low power requirements. The Human/Animal Eye also has DDMMB spinning barrels (very small) that receive and re-transmit these DDMMB signals in and out. So in reality One Eye is looking at another Eye and has communications between different Eyes (Humans/Animals), so what also happens is a Visual tunnel is set between two or more humans/Animals, and they are all sending and receiving data, amazing communication that happens, and of course not just with the eyes but other objects”.

JUMP CODE #11

“My Theories & Hypothesis”
“Concerning the Human /Animal Eye”

Concerning the Human /Animal Eye: The Inner Brain (diencephalon), cerebral cortex, and visual cortex to the optic nerve through the Retina, (the macular), (of course a lot more in the paths) must *Send* and *Receive* (Blocks of Quantum Frequencies of Mixed Analog Data, Pictorial) to and from the Brain by using electrical impulses, Pulses, (for lack of a better word, **aether the hypocritical matter of neutrons**), as a transporter, and this definition also includes almost any part of the Human/Animal/Plant Life/living-organisms, I call this *transmitter-cells-transmissions*. And a very special set of deep cells that receives and Sends magnetic signals to and from critical paths in the body (not only the EYE). Of course, this occurs in many different sea/flying creatures and many land animals.

“Low frequencies can penetrate and apply Magnetic frequencies”

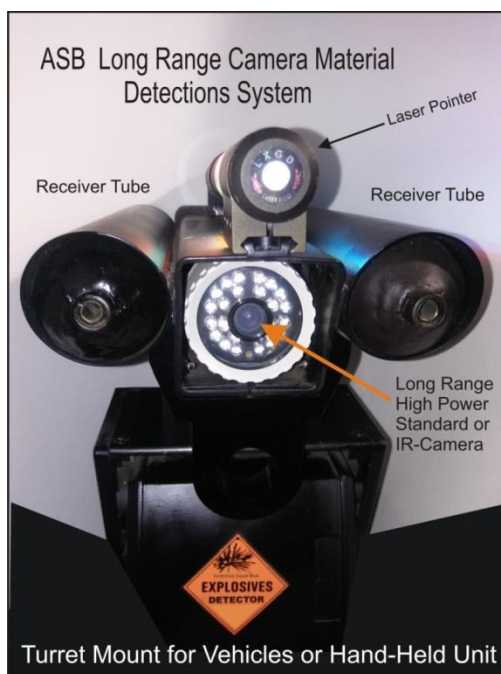

The Dual-Dual Magnetic Motions Barrel (DDMMB)

So Low frequencies can penetrate and apply Magnetic frequencies to many internal cells in the Human/Animal body (all non-invasively) while utilizing a Wave Magnetic Focus Frequencies

Beam that can detect and cure diseased cells that are almost impossible to reach with conventional methods. So in easy-to-understand terms, not only the Eye sends and receives signals but also different parts of the body, including the blood that can do almost the same as the Eye (this is my supposition). The Wave Magnetic Focus Frequencies Beam is a solution how to cure /fix problems in the Human, and Animal Eyes; of course, AMD is one of the most important ones, there are other devices that can also eliminate AMD, such as “**The Dual-Duel Magnetic Motions Barrel (DDMMB)**”, I talk a little on the DDMMB barrel. The DDMMB also has the capability to add chemicals to the magnetic and deliver it to the target area.

Once more the DDMMB barrel is a rotating barrel machine that Sends and Collects data through just about any media/materials, and the width and length determine the speed and range and the type of materials the DDMMB is looking for (coded sensors) with these magnetic coils embedded in a round irregular circular pattern, these very small magnetic coils (coils and crystals combined) act as a transmitter or a receiver, or both. As it spins at certain speeds it both sends out Waves of energy and also collects them. The DDMMB barrels have to be aligned have special bearings, and are always starting and stopping. The DDMMB has an outer and inner barrel and possibly two or more barrels. This device can be incredibly small and have very low power requirements. The Human/Animal Eye also has DDMMB that it receives and re-transmits these DDMMB out. (repetition is needed in this case to understand the above text)

“The Duel Barrel Long-Range Material Elements Detector”

“This is a Long-Range Material Detector, IR, ULF Servo Unit”

JUMP CODE #12

“JUMP CODE to JUMPCODE”

“Let your Mind/Cortex move around”

In my unconventional literary creation, I depart from the conventional norms of traditional book styles by introducing a distinctive narrative technique called the "**JUMP CODE**" method. This innovative approach aims to challenge the reader's conventional thought patterns and immerse them in a unique way of thinking. Using the **JUMP CODE**, the ideas presented in my book unfold in a non-linear fashion, encouraging readers to embrace a more dynamic and interconnected understanding of this content.

Specifically, I delve into the interesting concept of " UTILIZING MAGNETIC FREQUENCIES (particles in space, neutrons), in many types of disciplines, because it is very important to understand these concepts, such as Research Vaccines, Medicines, Human and Animal Eyes Diseases, Internal Medical breakthroughs, Artificial Intelligence (AI), Cyber code Hacking (cryptographies development), Hacking Radio frequencies codes, Advancement concept in space travel applying antigravity, and Beyond," and weaving together disparate threads of thought to illuminate the interconnectedness of human existence through the lens of Magnetic Wave Frequency devices. By adopting this unconventional methodology (UTILIZING MAGNETIC FREQUENCIES) I seek to break free from the confines of traditional writing and offer readers a thought-provoking journey that transcends the boundaries of conventional thinking.

JUMP CODE #13

“Death When We Sleep” “WGB 2025 my belief”

I hate sleep and despise sleep, and it robs your mind of precious thinking revamps your brain, and reduces it to wasted cells that are stored back into the almost forever space. Scientist says we have to have Rapid Eye Movement (REM) sleep, to rejuvenate the cells in the brain. According to current research, the human brain contains approximately 86 billion cells. These cells are primarily composed of neurons (the nerve cells that transmit signals) and glial cells which support the neurons. Yes, people lose brain cells from birth, but the idea that people lose large numbers of brain cells every day after a certain age is no longer supported by research. The brain's nervous system "weeds out" inactive brain cells, keeping the brain healthy and efficient. Alcohol does not directly kill brain cells, but it can cause brain damage that harms brain cells. So not getting enough sleep can cause brain cell loss. Sleep deprivation can also damage other brain cells, such as oligodendrocytes, astrocytes, and microglia. <https://www.google.com/search> , <https://sleepcenterinfo.com/blog/sleep-deprivation-effects-on-brain/> ,

More on Sleep

I'm having trouble sleeping lately. Does this increase my chances of getting sick?

Answer From Eric J. Olson, M.D.

Yes, lack of sleep can affect your immune system. Studies show that people who don't get quality sleep or enough sleep are more likely to get sick after being exposed to a virus, such as a common cold virus. Lack of sleep can also affect how fast you recover if you do get sick.

During sleep, your immune system releases proteins called cytokines, some of which help promote sleep. Certain cytokines need to increase when you have an infection or inflammation, or when you're under stress. Sleep deprivation may decrease production of these protective cytokines. In addition, infection-fighting antibodies and cells are reduced during periods when you don't get enough sleep.

So, your body needs sleep to fight infectious diseases. Long-term lack of sleep also increases your risk of obesity, diabetes, and heart and blood vessel (cardiovascular) disease.

How much sleep do you need to bolster your immune system? The optimal amount of sleep for most adults is seven to eight hours of good sleep each night. Teenagers need nine to 10 hours of sleep. School-aged children may need 10 or more hours of sleep.

But more sleep isn't always better. For adults, sleeping more than nine to 10 hours a night may result in a poor quality of sleep, such as difficulty falling or staying asleep.

With

Eric J. Olson, M.D.

<https://www.mayoclinic.org/diseases-conditions/insomnia/expert-answers/lack-of-sleep/faq-20057757#:~:text=During%20sleep%2C%20your%20immune%20system,difficulty%20falling%20or%20staying%20asleep.&text=With-,Eric%20J.,How%20do%20I%20stay%20asleep?>

I still don't like sleep, and have a very hard time finding sleep, very hard.

JUMP CODE #14

“BRAIN JUMP CODE”

“Future Computer Hardware and Software”

Some of the subjects listed in future paragraphs are very technical, and scientific, methodical, and downright boring, tedious, you may need to know, a lot about science, which means you may have to look up a lot of words and concepts, But if you go through the index you may find a lot of useful data, “Let your brain wonder”.

So this means I examine/scrutinize many different things (many subjects), such as Electrical Paths, Bipolar (heads-up, F16,) / FPGA / FET/ RF Interference blocks / Infrared / Electro-chemical Hardware and Software Frequencies, all digital transmissions/coding / cryptographic/cyber hacking code/communications (RF-WI-FI), Disruption of Atmospheres Particles, Conversions of Digital Code to ULF code, RJ45- Cable / (Cyber-Hacking, hardware/software), Isolation techniques and methods using ghost Servers, Fiber-optics / Internet Delay Hardware, Impossible to hack a manual switches / spoof IPs-Manual Bypass Server (servers), Freezing Space Particles, to name a few. We sometimes use **to describe how our thinking moves around in the brain, this is not easy. I will describe JUMP CODES later, Use different Print (fonts), Color, Edge/Top/Side/Bottom, Junction corner, unleveled surfaces, shininess**, Images embedded in images, and light/sounds, all of these should be used when writing a paper and or book, “Some fizz Spelling, and other tongues” very important to get the reader or seeders to want them to imagine/visualize, and it make their brain think differently. “We could say the Human/Animal/ Plant is really Hardware with embedded Biologic movement, Suan Hockfield,” The Age of Living Machines’, an amazing book.

JUMP CODE #15

“The Frequency Coded GPS bullet”

The Human brain has its specific individual *cell frequencies* (millions, similar to DNA), and a **Frequency Coded GPS bullet (FCGB)** shot from a long-range weapon could be used for covert operations to find and locate a grouping of these **FCGB** Frequency cells in a Human or Animal if so desired. This technology can also be used for a wide range of medical applications. The device looks for Facial (almost any set of patterns or Facemask) recognition patterns by using a frequency **Graphical recognition patterns algorithm / Device**, and the best application and delivery methods of such an **FCGB (bullet)** is from a drone or satellite. In some cases, the FCB can use ground geographical (Ground Equipment/Clutter) tracking to find and locate a set of targets, and these methods can also be utilized for longer-range spying from a Tank or handheld Mechanism, This technology can be miniaturized into a tiny footprint and operates on the methods using *differential signatures technologies*. Medical applications and methods theories are detailed in the **IMP PMM books/papers #1,43 Ref. WGB 2025**, on written requests.** Some line of sight is required, depending on the signal strength, location, weather, and how the tracking is applied. The technology is similar to a guided missile, but without propulsion, just the initial force, and is extremely small. The bullet is so fast its close trajectory is mapped in advance a requirement for a successful hit, it acquires a lock when close (50 – 308 –M1 caliber, “AIA”) and can be used, of course, it takes a lot of calculation and an expert to use such a *frequency bullet*, **FCGB Device** In this instance the DofP and drawing of Particles are utilized to acquire a target lock.*** , “Never give your DNA to anyone, Never”

More on the Frequency Coded GPS bullet (FCGB) “Codes in the Blood”

Ok in many ways, the Human Brain, and other body parts work like analog to a Digital Intelligence Electro-Bio-Chemical Processor, simulated by the internal and external neurons (sensors). So as you receive thoughts (ideas) add them to a book or paper, napkin, or anything before they are rerouted or switched (lost) in your brain. So does that mean every Human brain

has its individual frequencies, and could a “**Frequency Coded GPS bullet**” find your brain and kill you by following the frequencies of your brain (better than DNA, because it can be a long-range trace to find your individual brain cells)? We may not need to have a sniper. Or better yet get data from the brain? This is possible if the particles can 1.) Be redirected, or 2.) The Frequency GPS bullet could determine the disturbance of the Aether/Particles in the Atmosphere/water or even the Earth, and how Starlink can track cell phones/people. “A little far out, but very possible”. It comes down to people(objects) just walking in the Aether/Particles and disturbing them, related to the population in geographical areas, how they change the Earth rotation, and “Big Data Analyzing is needed and important”, and political events and powerful tyrants put in office. And more on the title “The Future of Long-range Weapon Systems”, following in the next few paragraphs. “**Leave the Earth alone a stop the water control of land**” (bjert)

Saving what comes into your Brain: “From where, and can the super jump help you, Yes” In many respects this is a method of Artificial intelligence (AI) inside your brain (using super jumps), so why not add in these thoughts that are in your brain, and put them down on paper (in the book) as you go along, don’t let them fade away and other thoughts in the brain move them to another location, and mark them as a different type of neuron? As a side note, Analog and Digital Intelligent neurons can be stored in other parts of the Human (Animal), and the magnetic field surrounding it, and this also includes all matter on this Earth and the Universe. And (bjert) can also stop mind mapping and brainwashing, not to alter brain cells (brain eroding), learn how to use it. The shift of the population locations changes the Magnetic Fields of the Earth, this is not good, and it changes the Rotation and axis of the Planet and the Cosmos.

Concerning the Frequency Coded GPS bullet (FCGB) “Codes in the Blood

The **FCGB** could have a small amount of uranium and toluene in it, and if it just scratches a person it will enter the bloodstream, and in a few seconds kill or disable them. Even if it hits the side of the target area it will still spread and do a lot of damage. The FCGB to handle are very safe, because they have to be shot to explode, and the electronics can also be embedded in the tip, giving a GPS position of the target. This is amazing because just firing an **FCGB** to a location gives their position away.

Here is the kicker: Starlink *cubes*, are small Satellites with Micro Computer Boards in each cube, (and geo-space rotatable) but are very easy to hack, and not Rad-Harden to fend off an attack by hackers because of the hardware, and utilize *Ultra Low frequencies* (ULF) that submarines communication have, these ULF frequencies can go through the Earth, so Hacking these cubes is easily done and of course by utilizing several other methods not mentioned here, and also applying very low power that utilizes RF Analog/Digital power wave signal that can be hacked just about any electronic devices, including these cubes. So disrupter fields can also do the same thing setting up a disruptive shield, and ULF can penetrate just about anything. I have also demonstrated to government agencies these ULF devices, even in Beijing at a trade show. So there are so many cubes you have to take down clusters because they can all communicate with each other (very hard to stop), and tracking down anyone with a cell phone is easy, and GPS is not needed, the code is embedded in the algorithms of Starlink and this is where the *Frequency Coded GPS bullet comes in*.

And yet using a Faraday cage will not stop Ultra Low Frequencies (ULF), so don't have a cell phone on your person, and even shutting it down is not the answer. Don't wear it. The best you can hope for is a well-isolated bag with copper inside of the bag (aluminum Case may help) and with a small frequency, and the generator in it is very small and easy to use, or make. Then use it in an office that has a Frequency Detector, it is still easy to use and make. The main point is this *Frequency Coded GPS bullet out in the open can find you, and Kill you. The frequency-coded GPS bullet does not have to be closed*, and other tips on the bullet can be added (50-caliber if possible). Or a Drone can carry a weapon, and a Drone can get the *frequency-coded GPS bullet* close to the target, either way, the *frequency-coded GPS bullet* is designed with side planes to give it lift and directions.

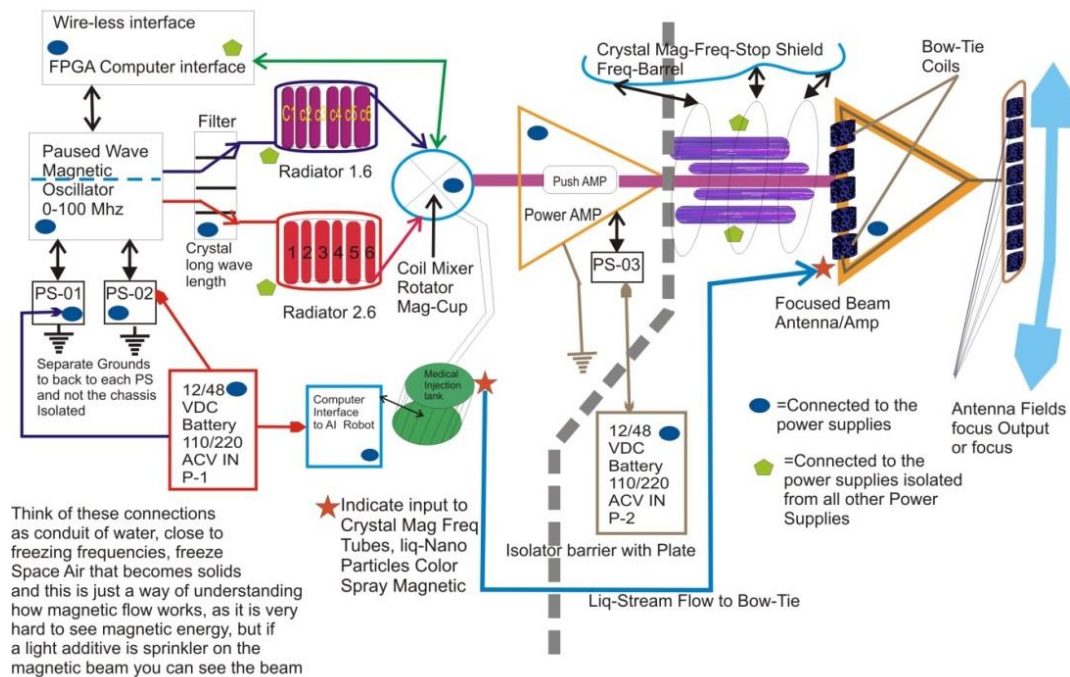

JUMP CODE #16

“MAGNETIC FOCUSED BEAMS”

(The Mother of Foundations, Total New Ideas)

Almost all related ideas and inventions listed are a collection of the magnetic fields on the planet Earth, the cosmos, human life, and essentially all matter, and intrinsic to the lifeblood of the universe, and make up the Earth & human biological species, as stated on the front page. Almost any of these inventions and methods can utilize “crystal manmade oscillators, the basic concept is to use low-frequencies magnetic focused beams to apply a noninvasive signal to perform all types of surgery, for non-implants or medical procedures in the body, including the human brain. We try not to put any foreign objects into the human body unless necessary. In most cases a very small external device can be applied on the surface of the human skin, this device is extremely small and very hard to see but could be an internal ceramic-coated implant, radiation-hardened to block external AI and eliminate hacking. The magnetic-focused beams provide an alternative to many types of surgery and of course hacking. Oh yes TMS, this is very bad for the Human Brain cells and of course logically common sense thinking, the erosion of mankind. **Diagram 90.7** This diagram needs a lot of other detail and explaining, and I have a lot info in my IMP PMM #43 Book, this is what we call a ***Poke and Peek method***, simple but people overlook the obvious. And just like what we all eat, almost all people eat the wrong thing and Die. Dr. Peter McCullough and Chuck Norris have it right, and RAV.

Magnetic Focused Frequency Beam Device Birch 2024

ASB Block Diagram 90.7
ASB90 2172241259MFB

JUMP CODE #17

“Some Thoughts on Implants in the Human Body”

Because Implants are generally rejected by the human body and that includes special wires and small insertion points, it may be possible to analyze the coatings of human nerve cells in the body (Epidermis) and use the same coatings on the surface of the nerves, and it may also be possible to interrupt the neurons (long fibers of cells called radial glia) as they move through the body, either magnetically, or using a small needle-like skin probe that has a very small firing mechanism (almost noninvasive) interrupting the signal. It may also be possible to stop or activate some traveling neurons (close to the muscle/muscles), this is a noninvasive method, and can magnetically affect the flow of neurons, and any incision or insertions may not be required, just an external magnetic frequency wave blocker. Once more if the magnetics are not focused it could destroy other nearby cells, this is not good, and very little power should be applied. In retrospect, doctors have been using TMS for a long time, and I believe that this technology has changed the Human Brain, Cortex, Blood flow, and oxygen where physically it is creating the Human brain that is reversed from the initial Human Brain from birth, this too is man changing evolution for the worse, not good for mankind, In most cases.

JUMP CODE #18

“Another solution instead of Implants”

I believe that using the correct frequencies, magnetic signals, and electrical energies can be mixed together, and can work for muscle control at the local level and not affect any other part of the body, but can still be used in certain areas of the motor cortex, so there for *not using the motor cortex* to generate signals directly to the muscles (movement of the body), and this is a noninvasive method (no probes into the human), and this method can be applied from a distance.

The Mixing of frequencies and Mixing of Magnetics and the Mixing of Electrical Pulses in *in-line electronic transformer devices* is fairly complex but can be manufactured on a microscopic level, which means almost in Nano size, this technology and methods are covered in detail in another paper, but what are these *in-line electronic transformer devices*? *** “Only use Magnetic Focus Beams”

How to apply these implants Mixed Frequency/Magnetic Electrical Energies into the Human Body, Without Physical Contact

“ The Magnetic Focus Beam”

All of these ideas and methods can be externally controlled and monitored, and by using the “**Magnetic Focus Beam Device**”, we call this an *in-line electronic transformer device*.

So as discussed above the **Magnetic Focus Beam Device** uses very low frequencies. These “**Magnetic Focus Beams**” are in the range of ultra-low-frequencies and in the mill-watts range, and use very low power, and once more they don’t have to be used as an implant and can be utilized externally, and almost all applications do not even touch the skin. I have a lot of technology in 1# IMP PMM paper. I personally believe inserting any foreign objects (wires) long-term is very detrimental to the health of the Human Body, including animals and plants; going into the motor cortex is always very dangerous. All of what I talked about in this paragraph can be controlled by a smartphone over the internet for long-range procedures, this is an important point. **JUMP CODES** “Magnet Frequencies Water Technologies”, is the process of Mixing Frequencies and Water in a Rotating Drum.

Concerning the surface/liquids/cells in the Human Eye and body that can be used to transport signals, medicine, and even energy to diseased cells the **Magnetic Focus Beam Device** may be another way to control and adjust the neuron cells in the Human body, especially the Eye and the Macula (drusen) / Optic Nerve, and apply differential speeds of frequencies (using a Poke-Peek Method #81 Paper) and different frequencies to remove the yellow matter (Drusen), of course using the **Magnetic Focus Beam Device**. Synapses in the brain, including the EYE, can be rerouted, using this technique and magnetic methods to move thoughts around, and get to memory cells, delete them, or change them. “It may be possible to WELD nerves (wet vessels) and cells using a Focused Magnetic Beam of Mixed wavelength, even the Retina itself”. **(sjcs+)**

The **Magnetic Focus Beams Device** can change **the colors of cells** and reduce protrusions in and on the Human body; they can also be used for skin cancers, deep cell cancer, and on infected deep internal organs, “All organs”. ** “So the Magnetic Focus Beams should be of a certain color wavelength that in some cases matches the color of the infected cells, this also means that

cells in the Human body have a *color signature pattern*, this has to be considered because using the correct frequencies and patterns that only affects the targeted cells, this is part of the technology of the Magnetic Focus Beams Device, an important point.

On the next page, you will find a short definition to **Magnetic Wave-Transports Methods** for Medical Fields or AI applications. The transporter is the mover of the neurons in the Human body as it creates a *Different of Potential (DofP)*. Without a DofP there would be no movement in the human body, as you can see this is a very important point. The DofP is also covered in the #1IMP PMM book in detail. Are there “*Holes in the Door*”? The device magnetically splits the Nano openings in the door; this is how the frequencies (materials/matter) are transmitted in the Earth and the Cosmos. ***

JUMP CODE #19

“Hidden Riddles / Notes”

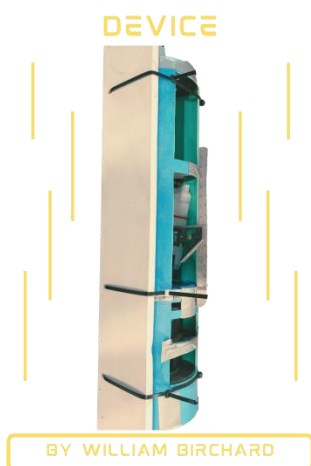

Are there “*Any Holes in the Door*”? “Do they magnetically split the Nano openings”?

How are “frequencies” (materials/matter) transmitted in the Earth and the Cosmos?

Do these Frequencies of elements and properties in the Earth's crust, and the deep magnetic waves from the core of the Earth change the Atoms and Particles that have created the Earth?

General Theory of Transporting Energy & Real Power Wirelessly
(*Magnetic Wave-Transports method for Medical Field/AI*)

DEATH BARREL

Parts ready for shipping

JUMP CODE #20

“Transporting useable electricity power: Electro-Chemical Neurons through the Earth”

What this definition means?

Transporting useable electricity power is basically Electro-Chemical Neurons through the Earth (deep in the Earth), Atmosphere, Water, Rocks, Plasma, and almost all common materials. And this is possible while at the same time detecting explosives and weapons (materials). In virtually any type of hidden container, explosives, and weapons can be detected above & below the Earth, and as a secondary concept, all matter/materials can be either stopped or destroyed while in the transit stages (rocket & missile). So all these technologies stated above, are linked to *Natural* and Man-made Magnetic Waves/Frequencies, which already exist and have numerous applications not yet thought of. As an example, this includes other external mechanisms like Nano frequencies transmit devices, such as small portable power/electronics equipment. These can be *plugs into your Cell that will deter anything or anyone from tracking your location or recording your conversation*, which works in conjunction with Artificial Intelligence (AI, ASI) hacking. Of course, this is *converting RF signals to digital data*, or the reverse..

JUMP CODE #21

Cells have their unique AI frequencies

To state it clearly that means all of the electro-bio-chemical Cells in the matter (in Human cells) have their unique AI frequencies that have to be matched with manmade cells and frequencies. So hence we have a half-man and half-robot. And exclusively AI code controls the Human Nano side of the machine and the raw AI robot that controls the other half, “Call it what you like (neutrons)”. **“Is the above possible”? YES**

So we are almost there with current technology (half man/robot) to produce human/Robot Artificial Intelligent machines (Yes AI machine, is not just software), we just lack the *Sensors*, *Converts*, and the *Wire-less Power* to make them *sustainable*, which means we need power that flows through the Atmosphere/Earth/Cosmos, and using No wires (Tesla ~1905). scjs++, So we have **“BioWare, Bio-Wear”**, (biological) a magnetic thought transfer to other objects, I.e. Brain, or Cells in any place in the Human/Animal body (including plants and nonliving things), or we have *Imagine/BioWare/Biowear*, and store these magnetic thoughts in a biological cell and send and receive them through the atmosphere. The complexity is in the conversion of Bioware to magnetic field data/pulses. I tend to **JUMP** around a lot, please note I have a reason for this type of writing, it makes the brain think faster and better, and seeing things around you may trigger amazing daydreams, you also need to remember that you have more thoughts if you stop for a moment, like a . **JUMP STOP**, and that is almost impossible. *bjcrt*, I would think only when you’re dead for a few days, *only*.

JUMP CODES #22

Disrupted Thinking, Disrupted Theory in real-time

This is called **Disrupted Thinking, Disrupted Theory in real-time**, and this leads to **JUMP CODES**. It is possible to make a Control Distributive Machine to control the Earth's atmosphere and throughout the Cosmos, this is disruptive Thinking and manipulation. These disrupted thinking methods are utilized because controlling disruptive machine algorithms will change your thought pattern, and all matter is in motions (solid frequencies), all of the time; even when organisms are dead, they (matter, Living/Non-Living) still are in motions. Can we capture these death images (who did the act, crime), YES! Oh yes, this is what some agencies use to disrupt thought patterns, deprivation of sorts, many: but not knowing how to use these **JUMP CODES**.

JUMP CODES #23

“THE EYE/MIND/BODY RECORDING YOUR DEATH”

This is where recording events after death comes in; imagine if someone was killed and your eyes recorded the person killing you, or the total event. This is possible (within a certain length of time), and the eyes and the brain die at different rates, and also some data parts of the eyes transmission of data from the eye are stored in other locations of the body (cortex, cells), which can also be recorded data. As a secondary note: the Eye also sends out data into the atmosphere, and also into another person's eye, their eye also records the data, so when a person is killed, the killer unknowingly records the crime (killing), so in many respects the killer has that recording in their brain, so either directly or reflected data is stored in the killers brain, and for a short period, the killing is also stored in the victims brains/cells, and the killers Brain, forever.

The Rotating Magnetic Barrel

This *Control Distributive Machine (the Rotating Dual Dual Magnetic) Barrel* is effectively a *Magnetic Rotating Barrel Device/Machine*, and when mankind has control of this type of machine it can control any communications, it can also Start or Stop all Earth's Magnetic Flow of electrons, in or outside of a Human body, and not say almost all types of equipment and possible chunks of Earth/Gravity/Atmosphere, and even launch spacecraft (the differential equation is very complex). This machine is called “Stop The Top”,(STT).

JUMP CODE #24

‘Age-Related Macular Degeneration (AMD)’

“Age-Related Macular Degeneration (AMD) Medical Application - Adjusting the Frequencies in the Blood, Cells, Vessel, Tube-Walls”, “There are two types of macular degeneration, dry and wet. Dry macular degeneration is the most common type and progresses slowly. This type of macular degeneration is caused by the buildup of **yellow deposits** called “drusen” that

accumulate over time. In contrast, wet macular degeneration is less common but more severe as it progresses quickly and can cause rapid vision loss. It is caused by abnormal blood vessels that grow beneath the macula and leak blood and fluid within the eye”. But can be rerouted or repaired with the correct frequencies, as they magnetically weld the blood vessels together by heating the blood to make the weld permanent connections, or even gluing it together, not hard to do. This is only possible if the technology of frequencies (cell frequencies) is used. You can also read the whole information from the URL link below:

https://iresults.com/macular_degeneration_2?rgid=597870&sub=gclid&gclid=EAIaIQobChMIjNOs-I2r_wIV_IdaBR16-wtgEAAYASAFEgK_VPD_BwE.

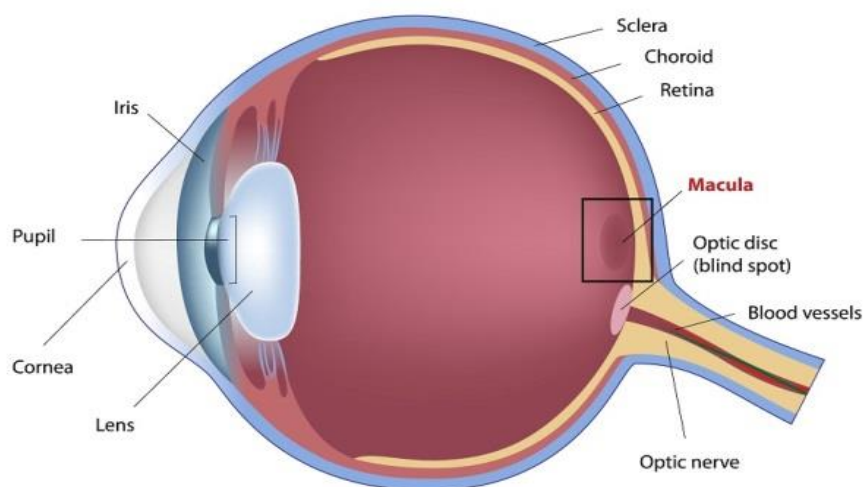

Image1: eye (macula)

Quality vision supplements today take inspiration from two years-long studies that completely changed the way researchers view eye health: **CARMIS** and **AREDS 2**. These researchers discovered that **your eyes rely on certain nutrients** and that supplementing with these nutrients can improve different aspects of vision and eye health. These ingredients were namely the antioxidants **lutein**, **zeaxanthin**, and **astaxanthin**. Participants in these studies experienced a **25% reduction in problems with the macula**. For more information on the macula, see the [ingredients site](#). All of these supplements are “frequencies, needed to mix correctly and the right time and right place/location/atmosphere. “Don’t forget Dandelions” Vitamin C is essential when it comes to the blood vessels of the eyes. This antioxidant vitamin will help keep blood flow constantly pumping toward your eyes. Several studies have linked the increased intake of vitamin C to being [beneficial](#) to fighting off Cataracts. Many vitamins are listed on the website above; a Blue filter can also help for the computer screens. One way to improve your vision is to roll your eyes in a circular motion each day in the shower, and if you have any electronic-magnetic energy, that also will help, keep your eyes clean and walk 1 hour a day, near clean trees, and certain vitamins like B17 in apricots seeds, and used as an eye rub will also help. “No

or very little sugars/carbs”, Methane Blue puts more oxygen’s in the blood, and a semi-strong magnetic field may also help. “How about [Methylene Blue](#), Ivermectin ” ,

- Possible Oxygen HBOT in the veins
- Reduction /Increase blood flow in the Eye
- B17 Very Important

See also other Aged Macular Degeneration ([AMD](#)) related studies.

See also this URL link: <https://www.google.com/search>

So it is quite evident that Magnetic Fields, Magnetics, Magnet Wave Devices, and of course electricity have many effects on everything, including controlling and steering Electrochemical reactions in the human body (Blood cells, such as cancers, or tumors), Advanced Macular Degeneration (AMD) of the Eye, and all of these New Technologies can be combined with New drugs for many cures, and this also applies to animals. Of course, how to detect pathogens in the

blood and other spiked proteins, and eradicating them, from external contact within the Human blood/body, can be accomplished with Magnetic Focused Beams within minutes.

The question: How is this accomplished?

The big question is, what type of Magnetic Fields, Magnetic, Magnet Wave, vibrational equipment is needed and how to produce them, and of course, how to apply these new devices? So last but not least how to combine these technologies to make a Complex Frequency that cures harmful cells in the blood including pathogens. The Human body has many internal transport mechanisms using neurons and other carriers, with the correct equipment and frequencies it is possible to eradicate many types of diseases, bacteria, viruses, and microorganisms that can cause other types of illnesses. Each area of the Human body (cells) has very dissimilar and unique frequencies. This dissimilarity provides some key data in locating infected cells and cancer areas, so it is very important in locating unhealthy cells in the blood. All of the above can be accomplished using a “Magnetic Wave Focus Beam Machine”. Remember that Neurons are electro – chemicals magnetic pulses (waves). Physicists steer chemical reactions by [magnetic fields](#) and quantum interference, at the Massachusetts Institute of Technology.

Magnetics Magnets Magnetic Waves Frequencies

This book is very different, and not your typical chapter-by-chapter book. It covers an overabundance (plethora) of information related to Magnetics, Magnets, and Magnetic Wave devices as listed above. I wrote this book in a non-conventional way, kind of like an easy-to-read story in paragraph form, that is each paragraph or number of paragraphs should stand alone as a particular thought. It is based on my other work (experiments) and books over many years. I also assume the reader has fundamental knowledge of magnetic, math, and chemistry, and I include the citations in the text as you go, so this makes it easy to look at while the subject is fresh in your brain, then you don't have to look up references way in the back of the book.

Let's talk about Advance Macular Degeneration (AMD), detection and removal

How to remove the Yellow, *yellow deposits* called Drusen from the layer (under the retina) of the Macular using several mixed wave frequencies that would remove the Yellow pigmentation covering the Macula, also the front and back of the drusen found near the optic nerve. The main problem is getting these frequencies (Disruptive Frequencies) to the Yellow pigmentation

without harming other parts of the Eye. Using Low frequencies and low power it is possible to do the above, and all of this is getting to the layers in the retina, so the Magnetic Focus Beam has to know what cells are too disruptive as it goes through different parts of the body (For the Eyes, head Etc.....) very difficult to do. But another way to almost look at the layers (some doctors say the back of the eye, not correct in some ways) is to use magnetic-micro-scopes(I talk about this in this paper), but also using a high resolution camera (400 Meg Pixils or better) looking at the edges of the layers where the Drusen is, because the drusen layers are between of layers in the Retina and each layer will protrude out at different lengths,

Each layer will have a different length and thickness/composition. Still, by looking at these protrusions of length, and thickness it is possible to determine what the drusen is, what its size, and composition, and utilizing “Edge Algorithms” it will be possible to decide the Frequencies of the Drusen, Size, thickness, and composition. So if the correct frequencies of the drusen’s are discovered, then if the right magnetic frequencies are applied to the drusen area (geometries size), it can be broken up and flush through the waste of the body, and also as a side benefit more oxygen may also increase, and all the other layers in the retina will not be affected by the initial frequency applied, “This has to be with extreme caution”.

There is an amazing amount of data/information at the *edges* of the different cells (druses), and as an analogy, this is like looking at the edge of a piece of 20-lb paper and determining what it is made of. Edge technologies are way overlooked, but it is still very possible in materials to just look at the frequencies of the edges and analyze amazing amounts of data, this was also used in Apollo 11 and in space, it can definitely be used in medicine, and the Eye. This is a critical paragraph, with a lot of detail and overview, but I have more data I need to add to it.

Radars Military but needs to look at the disturbances, not just the bounces back

Also regarding Radars used for the military, this edge technology is also overlooked. For the military the standard radar looks at the edges and not into the edge itself, that is because their radar is in a straight line and the reflective frequencies just look at the edge's shapes, and sometimes times radar can look at the materials, but some paints and jells will not allow standard radar too penetrate the surface. But using this *edge technology* and the Mixed-Frequencies technologies that also happen to disperse on contact in a *side-way motion penetration*, then and only then can a real determination of the surface/materials, and the inter-layer Drusen materials be removed, and the exact locations also have to be known. “Extreme Edge Color Texture un-level plane and Rate of Change RofC occurring in time”, A Edge-Radar System” is not yet developed 2025.

JUMP CODE #25

Focus Beam Mixed Frequencies Device/Technology

So how to do this: use a “Focus Beam Mixed Frequencies Device/technology can look *deep in the side* of an object /materials, or even a Human Cell, (i.e.... The eye)”. As a side note looking at the surface of an object using standard radar can only go so far into the materials/objects/human Cells (a few CM at best), (ground penetrating Radar only looks at a reflective bounce back) and is straight on, and still not good. Of course, certain magnets can also be used to determine depths, but the physics and geometrics have to be precise and right on the target area, and not affect the adjacent/ adjoining cells/materials/objects.

Methods to Remove Drusen: see all these reference links below:

- If I have drusen by retinaeyedoctor.com
- What are macular drusen by enhancedvision.com
- Long studies from nih.gov
- [How Frequencies affect the protein in the eye](#)
- <http://retinaeyedoctor.com/what-if-i-have-drusen/> read first
- <http://www.enhancedvision.com/low-vision-info/eye-conditions/what-are-macular-drusen.html>
- <http://www.ncbi.nlm.nih.gov/pmc/articles/PMC2279189/> long study well done read

Spectral analysis showed that **20, 28, and 35 kHz** had a significant influence on the structure of protein molecules, these are in the Eye, and the Drusen, a very important point, and one needs to know the materials/elements the Wave Frequencies need to eliminate. Don't forget some mixed frequencies may be used.

Ultrasound frequency effect on soybean protein: Acoustic field

<https://www.sciencedirect.com/science/article/abs/pii/S0023643821004734> “All related to this paper”

- <https://www.google.com/search>

JUMP CODE #26

Abstract

“The effect of ultrasound frequency”

This study endeavored to develop a method to evaluate the effect of ultrasound frequency on soybean protein extraction. In the ultrasonic frequencies range from 20 to 52 KHz, 28, 35, and 45 kHz were predicted to be the resonance frequencies in the ultrasound-assisted extraction (UAE) process of soybean protein by simulating the acoustic field distribution. The absolute sound pressure and the relative standard deviation could be well-coordinated via frequency regulation. The extraction experiment of soybean protein showed that the extraction rate was improved significantly ($p < 0.05$) with the aid of ultrasound. The extraction effect was optimal at 28 kHz and the extraction rate was improved to 73.35 g/100 g from 46.09 g/100 g of control under the same condition. The structure of the extracted protein was analyzed by the spectrum to further explore the mechanism of the effect of ultrasonic frequency. *Spectral analysis showed that 20, 28, and 35 KHz had a significant influence on the structure of protein molecules.* Also, Drusen and other fats ([Drusen have Proteins](#), Fats/ Lipids) may have a small amount of magnetic particles in them, and therefore, acoustic field simulation can be used as one effective method for selecting ultrasonic frequency, which could help to optimize equipment and improve efficiency. Proteins have magnetic particles in them 25um, so frequencies are magnetics and also proteins. Drusen 25u-125um, Magnetic frequencies are smaller and can go smaller than Drusen, thereby changing its shape and size to match the Drusen.

So, [Drusens are Proteins](#), The structure is typically made of a glycerol backbone, 2 fatty acid tails (hydrophobic), and a phosphate group (hydrophilic). In a more in-depth study of the garbage materials (Proteins, Lipids, fatty acids) that are affected by different materials, it should also be noted that Drusens consistencies are hard soft, and uneven, this also has to be taken into account when determining the frequencies, Power, and methods to Only break up the yellow spots called Drusens, and lie between two layers (Bruch's membrane) membranes. <https://www.pnas.org/doi/10.1073/pnas.222551899>

What are drusen (Dry Drusen)? Retinal drusen (say "DROO-zun") are tiny yellow spots that build up under the retina in your eye. They are made up of proteins and fatty substances (lipids). The retina is the nerve layer at the back of the eye that sends images to your brain.

JUMP CODE #27

“Drusen clogging up the transport system”

“Drusen can contribute to the clogging up of this transport system. The photoreceptor cells, the rods and cones, require lots of oxygen and when they don’t receive enough of it, they begin to degenerate or die. The macula is made up of predominantly cone cells”, Blood flow and oxygen are very important, and the right frequency application may help to increase both Blood flow and oxygen to get rid of the dead cells, and break them up. As stated in the Abstract above.

“Frequencies of the Color Yellow can also increase oxygen, and amplify Blood flow, another therapy, and also cleaning the blood, and loading an agent in the blood (magnetic particles, in that location) to magnetically remove the unwanted particles from behind the yellow drusen (like a river flowing in the back of the pigment working to remove the drusen. There may be a way to inject a sand-book additive near the drusen blood vessels and then magnetically move the drusen from that area. So by redirecting magnetic particle beads out of the infected area, you can get rid of the yellow covering, or by changing the yellow pigment you can also reduce the drusen, one has to know these frequencies, even if the drusen grew in these, they can still be eliminated. The procedure to do this requires a set of mixed frequencies made by a Frequency-mixed device”.

I estimate that if the correct resonate frequencies are located that match the Drusens, it is possible to break up the Drusens into very small nanoparticles and the human body would remove them as a waste product. (fats called xanthelasma) <https://www.google.com/search>

JUMP CODE #28

“Hyperbaric oxygen therapy (HBOT), and more info on the EYE”

Hyperbaric oxygen therapy ([HBOT](#)) for macular degeneration involves administering pure oxygen at higher than normal air pressures in an enclosed chamber. Because lack of oxygen partially contributes to the macula’s decline, HBOT’s oxygen-rich environment can promote the healing and regeneration of cells. Hyperbaric oxygen therapy also mobilizes stem cells, which can transform into a wide range of cell types. HBOT has shown promising results in patients suffering from macular degeneration. And where you live and the altitude and gravity have to be taken into account.

For example, in one small study, South Florida researcher Jeffrey Weiss treated 14 patients who had advanced AMD at two different atmospheric pressures. Each of them experienced increased visual acuity after hyperbaric oxygen therapy and said their daily lives had improved. In another small study, three subjects with macular degeneration experienced a doubling of their visual acuity, and a fourth subject’s visual acuity almost quadrupled.

If you would like to learn whether HBOT could help with your macular degeneration or that of a loved one, please call us at **(727) 787-7077** and we will gladly answer your questions. To schedule a hyperbaric oxygen therapy consultation, simply [click here](#). A member of our staff will call to confirm your appointment soon.

<https://sarasgarden.org/wp-content/uploads/2013/12/Macular-Degeneration-HBOT.pdf>

Very important info for people with AMD, increase the oxygen in the Eyes plus blood flow of clean blood or blood that will scrub the drusen from in the Eye, this may help!

What is the macula lutea? More info on the Macula

The macula lutea — more commonly called the *macula* — is the most sensitive spot in the center of the light-sensitive [retina](#) in the back of the eye. The macula is responsible for visual acuity, central vision, and color vision.

“The macula is the area of the retina that allows us to see 20/20,” says Maria Richman, OD, spokeswoman for the American Optometric Association. “It is the small and highly sensitive part of the retina that’s responsible for detailed central vision. The macula allows one to appreciate detail and perform tasks that require central vision, such as reading.” The macula makes it possible to see in great detail while the rest of the retina provides peripheral (side) vision.

Why is it called macula lutea?

Like many medical terms, *macula lutea* is Latin: *Macula* means “spot” and *lutea* means “yellow.” The macula lutea is a very small spot in the central retina — it’s just 5.5 millimeters (less than a quarter-inch) in diameter. Also, when viewed or photographed by your [eye doctor](#), the macula lutea has a yellowish appearance (in contrast to the rest of the retina, which is red). The yellow color is due to the *macular pigment*, which is composed mainly of [lutein and zeaxanthin](#) from your diet. Macular pigment protects cells in the macula from the potentially harmful effects of high-energy visible (HEV) [blue light](#) from the sun and other sources, including the LED screens of computers and phones. Consider “*Methylene Blue*”

Anatomy of the Macula

There are two types of [photoreceptor cells](#) in the retina. These cells — called *cones* and *rods* — make our sense of vision possible by converting light rays into signals that are transmitted to the brain.

There is a very high concentration of cone photoreceptor cells in the macula, which are responsible for [our color vision](#) and our ability to see fine details. It’s estimated that there are 6 million to 7 million cone cells in the retina, with most of them located in the macula. The highest concentration is in the *fovea* (or *fovea centralis*), which is a central pit within the macula that contains only cone cells.

Most rod photoreceptor cells are located outside the macula. While they don't provide high-resolution or color vision, rod cells provide peripheral vision, perceive movement and shades of gray, and can function in low-light conditions. There are an estimated 120 million rod photoreceptor cells in the retina. The macula (specifically, the [fovea](#)) is the only area of the retina where 20/20 vision is attainable and where color and fine detail can be distinguished.

Consequently, the macula is responsible for enabling the sharp visual detail that's so important for activities like driving, recognizing faces, watching TV, using a computer, and engaging in all other visual tasks that require an ability to see details.

Conditions that affect the macula “Drusen the in-between layers, Sightless EYE killer”

Conditions that affect the macula and cause vision loss include:

- **Age-related macular degeneration.** [Macular degeneration \(AMD\)](#) is an age-related deterioration of the macula and the leading cause of permanent vision loss for people ages 50 and older.
- **Diabetic macular edema.** Also called DME, this swelling of the macula/vessels is caused by leaky blood vessels in the retina that have been damaged from the effects of diabetes (diabetic retinopathy). Learn more about [diabetic retinopathy and DME](#). Also astronauts may have this condition in space of vessels walls expanding while too long in space, and of course other eye problems, and can also be a lack of external forces on the walls of the vessels.
- **Central serous retinopathy.** [Central serous retinopathy](#) is the accumulation of fluid under the retina that can affect the macula and cause blurry vision. The exact cause is not fully understood, but it appears to be stress-related and most often affects middle-aged men.
- **Macular hole.** This is a small break in the macula that can cause blurry or distorted vision. Macular holes are usually caused by age-related changes in the eye. If left untreated, a macular hole can cause a [detached retina](#), a sight-threatening condition that requires immediate medical attention.
- **Macular dystrophies.** A number of rare, inherited conditions that affect central vision, ([macular dystrophies](#)) can appear in childhood but some are not diagnosed until later in life. The most common form of juvenile macular dystrophy is [Stargardt's disease](#).
- **Epiretinal membrane.** Also called *macular pucker* or *cellophane maculopathy*, an epiretinal membrane is a thin sheet of fibrous tissue that can grow onto the surface of the macula. Epiretinal membranes can cause blurred or distorted vision, and, in some cases, surgery may be required to restore vision.

SEE RELATED: [Best disease](#) and [Pseudoxanthoma elasticum \(PXE\)](#)

JUMP CODE #28-A

“The Cherry Red Macula”

A *cherry red macula* is a rare condition characterized by a reddish area developing at the center of the macula. According to Richman, one of the most common conditions causing a cherry red macula is a lipid storage disorder that leads to [central retinal artery occlusion](#). When lipids (fatty acids) accumulate in harmful amounts in various tissues and cells in the body, they can cause health problems. Symptoms may appear early in life or develop in the teen or even adult years.

“Over time, this storage of excessive fats can cause permanent damage to cells and tissues in the brain, the peripheral nervous system, and in other parts of the body,” Richman says. “Retinal artery occlusion refers to blockage of the retinal artery carrying oxygen to the nerve cells in the retina at the back of the eye. The lack of oxygen delivery to the retina may result in severe loss of vision,” she adds. Management of cherry red macula depends on the cause, which can include Tay-Sachs disease in addition to retinal artery occlusion and several other diseases and conditions.

Keeping Your Macula Lutea Healthy

The best way to protect the health of the macula of your eyes for a lifetime of good vision is to have routine eye exams. During a [comprehensive eye exam](#), your [optometrist](#) or [ophthalmologist](#) can inspect and evaluate the health of your macula lutea and detect potential ROBB before you experience any vision loss.

Another essential part of keeping your macula healthy is decreasing your risk for diabetes and cardiovascular disease through diet and lifestyle changes. More related info: [Retinal Dystrophy](#) at <https://www.allaboutvision.com/resources/macula/>

JUMP CODE #29

“Layperson and Scientists”

I’m trying to write for the layperson and scientists, and also in response to many white books/papers that only produce “white books/paper” also called: “Paper/Book Mills”. My goal is to produce real physical equipment (devices) that can be used in the medical field, in particular the *Eye*. This device, “Wave Detector Emitter/Receiver (*WDER*)” requires many pieces (subassembly) of custom hardware and software, I have developed a good part of the software and located most of the hardware manufacturers (a reference to NASA and other publication briefs are noted). Many drawings are not in this book, like the magnetically focused device, and the magnetic rotating barrel. I did not have space for them or the text that is needed to explain them. I do have other books that go into detail, with drawings, and all the other books don’t have.

All drawings in book IMP PMM #1-2, *The Scientific Method is used when I can, sometimes the info coming into my brain is too fast.*

JUMP CODE #30 (bsj)

“A brief interruption School Shootings”

A brief interruption on how magnetic wave technology (Frequencies) can be used to prevent school shootings, Please work with me.

So: School Shootings, Addressed

School shootings are also on the top of my list to address, and of course, new types of detectors plus Deterrence are needed before a shooter can get close to the schools physically with a weapon, and stop the Killers before they can get into the facilities, this is possible. And not to exclude “the EYE” or blindness, or stopping weapons from Killing people, all of these technologies work together “hand in hand” when it comes to Magnetic Wave Technologies, and are all extremely important.

And regarding the US borders, in 2025, America needs to STOP the illegal migrations from multiple countries in the millions and come illegally through the US borders. It’s necessary to stop this madness because it’s not good for the country, and the people of America. And also we do not know who they are (terrorists). They could bring deadly pathogens, diseases, weapons, drugs, human trafficking, killers, and increased crimes. Only let legal migration, the fully vetted individual that wants to come to America, contribute, law-bidding citizens, and want to be true Americans. In most cases, they have to get a green card within a few years (as the immigration laws stated). Any violations on their record and they get deported, of course, a fair hearing by a *state judge*. But in some cases, if they are good people and want to become true Americans and join in as patriotic Americans, then I think it is okay for them to stay, but bad people (criminals) need to be deported, terrorists, of course, are not allowed. The US Congress and DOD, DHS, FBI, CIA, and NSA are all at fault, and in many ways, so are the people in America. And who will answer for the Liberty Ship Attack if not Lyndon Baines Johnson (Dead)? Almost all H-1B visas have to be stopped for now (2025) **(sjc)**. At least review them. Once more, they miss the good guys and reward the bad guys. This is upside-down America, only by the grace of JESUS and people praying is America still a Nation Under GOD, can’t America see the signs that JESUS is close to coming back? “Who is next to get a Thump at the door”?

JUMP CODE #31

“The Foundation of the WDER Technology”

“Wave Detector Emitter Receiver (WDER, Explosive, Weapon, Detector **XE-118 Detector**)”

A Short Description of the Basic Foundation of the Technologies Stated:

“Applying Earth and Space Waves for Detection and Deterrence”

I believe I needed to provide a good foundation of “Earth and Space Waves (magnetic, magnet, motion), Radio Frequencies (RF), and how they relate to the medical field (for starters). So then for the **Detection of Guns and Explosives**, school shootings, and the detection of deep explosives in the Earth, we will describe in more detail later. I also wanted to show how these new technologies apply in other areas/disciplines. As I said this is not your average technical book. To fully understand this book, it needs to be read NOT in sequence but paragraph by paragraph, and the readers need to have good knowledge of science. Magnetic Wave Frequencies are very complex and the reader has to have excellent knowledge of the world of different sciences. I also know that this book is too short, but too much data or information for this book and is **not feasible, but I do have other books on this subject that may help** a lot. I try and get others to review this book when possible, this is hard to do, and finding people who can understand the different technologies is a really hard task. In the following, you will see the scientific methods that I try and apply. See Fig XE-118

Fig XE-118

The Long-range Explosive Detector/ Weapon / Materials / Drugs Schools / All location and Applications / Configurations, tested by Raytheon and other similar defense contractors all over the world, “the technology was blacklisted by the government, but was passed by as a non-feasible solution”

JUMP CODE #32

“A Brief Overview of the following”

(Innovative method of using the Earth and Space, Human Blood Flow, Magnetic Flow)

This basic book introduces a Novel and Innovative way of using the Earth and Space Waves (magnetic, magnet, motion), (I.e. RF waves) to make it possible for Communications to use the Raw Analog Radio Frequencies (RF) waves, embedded in the Earth (Oceanic) and near Space (in Space, Cosmos). So actually, they are not real RF waves in the sense that they are made of electronic devices, but *Earth and Space Waves are (motion waves, Atoms, and Particles)*, to simplify things I will use RF Waves (Raw Analog Radio Frequencies (RF) waves). So to be very precise *Earth/Space Magnetic Motion Waves* may be a little too far out for most people to comprehend. “Think of tossing a rock in the lake, what does it do, listen to the RF in the Air”?

JUMP CODE #33

“Short History of Radio Frequencies (RF)”

“Internet Towers, Wi-Fi, Fiber/Cables, or RF waves”

So in present-day 2025, most communications use a carrier (modulation signal) and this is used with signal communication data that rides on the carrier, this is standard communication. I’m proposing not using a manmade and generated electronic carrier but using the Earth and Space wave provided by nature, and that means using No existing Internet Towers, Wi-Fi, Fiber/Cables, or RF waves. All of these natural waves are free waves running in and over the Earth providing communications just about any place on the planet, and space (Tesla). All Digital fiber/cable is different, but no WIFI. So that means Data/Communication rides an *Earth/Space/Natural wave* for a carrier. In reality, it is like “*opening a hole in the Earth and Space*”, making a tunnel, hence “*The Hole in the Door*”, A riddle.

JUMP CODE #34

“The inner Earth Frequency Waves, RF”

Objects and materials such as certain rocks and minerals preserve signals of Raw Analog data and communication, all accessible in the wave rotations of the Planet Earth, and can be utilized, of course in the inner Earth, and saving data in the crust of the Earth for a short period of time. Raw RF Analog is part of the Magnetic Fields surrounding the Earth, and also below the crust (surface) of the Earth and Oceans (a short description at best). The Waves and frequencies are complex and contain many different magnetic RF signals, and noise, but can be realigned to form tunnels to direct Energy (communications) point to point (device direct to device). The

explanation is complex, not the best explanation, but too much information in this book, I will try my best to keep explaining. And by the way, these tunnels of *Earth/Space/Natural waves* happen all the time normally, *so this is why the receiver is more important than the transmitter.*

Just think if the Raw Natural Wave RF technology can transport communication what else it can transport? How about People “Beam us up, Scotty!” Do you think it’s possible?” this is part of the paper on converting Matter to Frequencies, and converting Frequencies to Matter”, and these frequencies are not your classical frequencies, they are a complex mix of waves and particles.

JUMP CODE #35

“Short History (Continue of the Human EYE), off track a little ”

A little bit off, but information related to the Human Eye and its frequencies, and the basic knowledge for the reader to understand these RF wave theories is required, so I have to elaborate as much as possible with understandable general terms and educate the audience in many sciences. So how does this new RF Wave Detector Work? Let me try and explain how these works:

Electromagnetic Magnetic *Transporters* (RF) Methods & Techniques

I only use the terms Electromagnetic and Radio Frequencies (RF) because people are used to that terminology, these are the wrong words, and it is *Earth/Space/Natural Wave Magnet Fields* at work, only. This is one component of the Glue that indicates a strong force holding the universe together, and actually a balance set of motions “Pushes and Pulls “of bodies in space (Planets, Stars, small waft plants, and even gases.

Communication Tracking Down People

So using the *Earth/Space/Natural Wave Magnet Fields* all communication would use peer-to-peer (tunnels), that is cellphone to cellphone, worldwide-space Raw RF signals in Thin-Air, and using no wires, and no equipment. So that also means no communication controlled by anyone, just the users of the cellphone, and Non-Traceable, No traces or records. The cellphone is just a receiver of the Raw *Earth/Space/Natural Wave* data and communication. The Earth's Waves act as a carrier, that can change minute by minute, which in fact makes it very hard to comprehend these theories. Believe it or not, this paragraph has a lot to do with the brain and of course the Human Eye, because the *Earth/Space/Natural Wave affects all parts of the human body.* More detail on the Technology later. By the way everything (All matter has a Motion Wave footprint, a Signature Recognition Code (SRC) pattern in the Earth and Space. This also includes all the known elements, 118 elements.

A little complex, but think it out, still RF wave related

Each Cellphone sets up a cryptographic connection that changes as each user activates the connection (“Blind Tunnel, a Rotating (Key) Hole Technology”) on/in their cellphone, and never use the same code twice, in an easy term, this paragraph is for the security of communication tunnel to tunnel (peer to peer), meaning your communication is secure. Each cellphone has to have a small device that plugs into the earphone jack or is attached to the back of the cellphone, this device makes your cellphone almost impossible to track or hack into it. In some cases, an app may be required.

JUMP CODE #36

“A disturbance in your vision and communication”
How to make your cellphone secure?

Almost all existing cell phones can be used with these small devices I mentioned. The cellphone will need a small piece of hardware plugged into a USB or earphone jack. Each cellphone sets up a *rotating cryptographic* connection, and those changes as each user activates the connection (“Blind Tunnel, a Rotating Hole Technology”) so on/in their cellphone, never the same code, I repeat things something so the reader gets the points, intentionally.

“A disturbance in your vision and communication” will also affect a bullet, and that means a sniper vision. So if a target, like a man or a woman, was targeted and they had a small device on their person they would look like two people instead of one target “who is on first”. As a secondary note: If any cell tower is used as a conductor of electronics, it can be widely used as an amplifier, “a disturbance in communication throughout the internet, (first stage only). What this means the metal in the cell tower takes on a magnet type of property it can become a disturbance to the cell signal, and that means if at the base of the cell tower, a wave signal is injected into it (into the metal base), the data/information can be compromised or totally disrupted. "This is one way to shut down a cell tower without destroying it, or even a half-round coil around the cable going up to the cell tower. "An easy delay and even harder to detect". Of course, grounding the cell tower with a signal can change a lot of communications. A simple fix add a small 3x3 Reflector card, or a small oscillator at the side of the front barrel of the weapon, or near the head.

Making the Equipment

Almost all existing cell phones can use this device, and that is electromagnetic fields that protect the cellphones from being detected by any other methods, and hardware. The devices we are talking about would be electromagnetic snooping long-range devices or even cell phone towers. The snooping devices can be handheld and carried in a purse or on a person. The device we are talking about is an anti-field that stops any intruder from hacking your locations or getting into your cellphone. So in essence this device covers the back of your cellphone with a small piece of hardware on your phone. In some cases, it also protects your credit cards and other electronics. So of course, some special software, or apps may be needed that allow you (the user) to see attacking your cellphone. If a small Switch is used, the magnetic block can be turned off and on, an added feature.

JUMP CODE #37

“Using the Voice to Create Software”

So the voice/data/info is sent out into the Earth using these Raw Natural Waves in the (ground/Space, RF), Actually, all over the Earth, this is just like shouting into the atmosphere this is done all the time (massive amounts of data and information exist in the atmosphere), we can't see it and do not have the right equipment to pick it up. So as another note, even the *Earth/Space/Natural Wave* waves try and seek targets (Gnd.) and use these waves for detection.

JUMP CODE #38

“Using Your Cellphone to Capture Words in the Aether, in the Atmosphere”

“Out of Thin Air”

So the voice/data/info is sent out into the Earth and Space using this Raw Natural Waves (RF) from your cellphone in electronic format into the universe, and actually all over the Earth and this is just like shouting into the atmosphere, in fact, this is done all the time in massive amounts of data and information that exist in the atmosphere. We can't see it and do not have the right equipment to use it. At present, we don't have the technology to capture it (Out of thin air), or even use the Earth's special natural waves (RF) to acquire it for the discovery of UFOs in the surrounding Earth, and that is detecting objects deep in the Earth. As a side note, if we harness Earth's Natural Magnetic Waves, we will never need cellphone towers, just like Nikola Tesla did in the 1800s. (kfdl)

How to make any data transmission using the internet that can't be hacked?

This is for the user that wants to find gold, silver, other objects, and keep them secret, and use e-mail as a way to send & receive messages to other gold seekers, only a few methods listed.

Each user has a very long set of numbers and symbols they create in an e-mail, and no one knows what that set of numbers or symbols means, but only the user. So this set of numbers & symbols is not stored anywhere except by the user, if they want, otherwise stored in their brain or put away in a safe. When it is uploaded to the internet, it is converted to a digital format. Then if a user wants to talk to someone or send messages, the people on the receiving end have to know the numbers and symbols from the sender, “The image deciphers”. ***

JUMP CODE #39

“Security and Access Codes for the User Making the Number & Symbols Sequence”

This is for the user, security and access codes can be used regarding the number & symbols, but in many cases not needed. The original user creates a set of numbers & symbols that can be published on the internet, and their set of numbers & symbols can be picked up by anyone. These

sets of numbers & symbols mean nothing to anyone except the creator. Even the Robotic Online Bot (ROBB) program does not know these numbers & symbols; it is just a set of numbers & symbols. So the ROBB is running around the world in a “Block-Chain and also being transposed to crypto messages. Millions of sets of numbers & symbols (blocks) are in numerous types of databases at many different locations. The ROBB can store these sets of numbers & symbols on Databases as the commercial & military does. Also, ROBB knows when it is being hacked and the total algorithms are changed and the database as well, and the files have different extensions, and code in another language. All these databases have encryption security. Added to the original numbers & symbols are key and access codes, so if the code (machine code) tries to be hacked it is destroyed and puts a virus on that machine. The anti-pseudo-code can locate a hacker's origin code and set complex algorithm puzzles. As an added feature the ROBB is almost impossible to stop, even if it does nothing about what is going on, it's perpetual (eternal), and this is a way of anonymity, the total internet would have to be shut down and even that would not do it, it would need a “bit-bleach” of all machines, almost impossible to do. “All Cryptography Stuff”

JUMP CODE #40

“How to be anonymous”

I would like to change subjects for a bit on how to be anonymous. *So any user creates a big long set of “symbol number strings” and sends it around the world as a moving block chain (A method to have absolute anonymity, anonymous to the world).* This method gathers a very large group of people and is a multimedia publication on many different platforms. If possible, use 128 characters, or more when using the methods of making numbers & symbols in one (1) string. This is what is in the blockchain that travels around the world, and it's hidden code created by the user. Please read on for more on the “How to be anonymous”

JUMP CODE #41

“THE *INVISIBLE* PERSON”

“How to be Anonymous in the Aether”

Anonymous in the Aether “What the user needs to do”

I did not explain how the users come into play. So, a user that wants to join the hunting group and wants to help find collective treasure within a large group of people. These users can be people at home who want to take part in just looking for gold, silver, or artifacts.

The ROBB (ASI) software has many great applications; so re-think what you're thinking what you think, if you like to find a treasure or join a great group of people. Why use this software and methods, because the people looking for treasures would want this to be unknown, for sure, for example, who wants to know where their “Bit-Coins” are located, as an example: gold. And

yes this is the application of the software, hardware, ROBB (ASI) program, and AI blockchain software. So, let each person start looking for the gold at home using virtually/prospecting, and digging for gold or silver. So this may seem a little odd but it means making very long strings of symbols & numbers and sending them via the internet, that string is in an email you created, any email name. And only the user knows who those numbers & symbols belong to. The email you made is going around the world, and you (the user) have a short little program on your machine that looks for the numbers & symbols you made (created) and notifies you on your cellphone or electronic devices. And you now received the coded message! (sjcc)

SMALL JUMP CODE #42 (sjc)

AI write a crypto code

So let **AI write a crypto code** that reads the lines of the words, so that means each word is made of lines and curves, so like each letter has is comprised of lines and curves, each line and curve will have a crypto code assigned to it, for example, the letter **a** in the word and would have its own crypto code, and the letter **n** would have its own crypto code, and the letter **d** would have its own crypto code. So trying to make it clear, the word **and** would have three (3) sets of crypto codes, this is a lot of crypto codes, but this also can pertain to a picture and all the lines and curves in a picture would have a lot of crypto codes, and this becomes very complex and very hard to decode. Imagine even a small picture, it would have enormous amounts of crypto codes. And adding to the crypto code complexity the Rise and Fall of each letter would have a Rate of Change for each line and curve, once more a complex crypto code created that is even harder to break, almost impossible, unless the correct algorithm was applied.

So each picture or paragraph makes a very hard cryptographic code to break. So the document actually has no code in it, it is just a document with pictures and sometimes makes no sense, but the real code is how the algorithm is constructed, and this is the key, and it too can be embedded in the document, or even a chain-link round-robin code that goes around the world, or it is embedded in someone's machine. As stated in this Book/Paper this is part of the puzzle. Using a very long generated numbers (by the user) with letters and pictures that can be part of the algorithm makes it extremely complex, So that simply means the user is someone who makes the originally long set of characters and pictures, the AI algorithm does the rest.

To Reiterate: A must read to really understand how this AI algorithm works

“So How to find the GOLD” So how to get the AI algorithm to write a crypto code that reads the words/curves, as a line and does the same with pictures which makes a very hard cryptographic code to break? So the document has no code in it, it is just a document and sometimes makes no sense, but the real code is how the algorithm is created, and this is the key, and it too can be embedded in the document, or even a chain-link round-robin code that goes around the world, or is in someone's machine or government office machine (Ie. Printer/Cell

phone). As stated in this Book/Paper this is part of the puzzle. Using very alpha-numeric individual-generated numbers and letters/Curves/Pictures that can be part of the algorithm, and go figure that out.

So “How to find the GOLD is not so easy”, and how to get the correct algorithm, this is part of the secret, and only the original of this very long set of characters only the user knows that long number/letters/symbols/pictures, that only they know and load into a computer/cell phone. And the "ROBB" is the only AI algorithm (brain) that can decode this Long Red Line. The ROBB is running around the internet searching for The Long Red Line of users.

I call this the “The Long Red Line”, and is part of the secret, and only the original user knows that long number/letters/symbols/picture that they put into the computer.” Making one extremely Long Red Line”, The Edge of the lines have irregular bumps and values, and it too has a code build into it, of course very small but can still be used in the AI process, once more adding complexities to the crypto code. Also, the algorithms can use your Human biological cells to create the “Decoded-Cell- algorithm”, and this is **real AI**, real AI thinking, and not a computer, the AI self-cortex algorithm adds another complex method to the equation. “And this is not easy to even write and explain”.

JUMPCODE 43#

“A small manual RJ-45 / RF Switch, WiFi”

The Switcher 01-02 (ILIOS), is for small users that want to *keep their work*.

This Manual Switcher 01-02 *Internet Lock-IN-Out Switch* (ILIOS) will work with an RJ45 cable connection only and can help to become anonymous, but not necessary, as this method uses all hardware. What the switch does is disconnect you manually from the internet and help to stop hackers. So the ILLOS is also just a great device to protect your computer all the time so you don't have to shut down when NOT in use, just use the switch to take you off-line. You can purchase the product from BD_Cart at: <https://www.ebay.com/itm/156078413360>.

JUMPCODE #44

“THE HACKSTOP SWITCH”

“BIG Users, Gigantic Corporations, the Fake Server Hardware Switch”

The basic idea is to delay the IT Internet signal, (cable/fiber/Rf) for a few Nano-Seconds, and that is what it comes down to, I will explain, and elaborate as we go along, and of course, this type of switch will stop almost all hacking either digital (IT signals), or RF (WiFi) “Oh yes, why don't these corporations use a secure INTRANET, with Manual KEY BLOCK Switches, A manual key switch, used to physical cut the connections by a Human being, Oh, what a novel Idea, and the use would always have recorded? And if anyone wants to delay a digital signal,

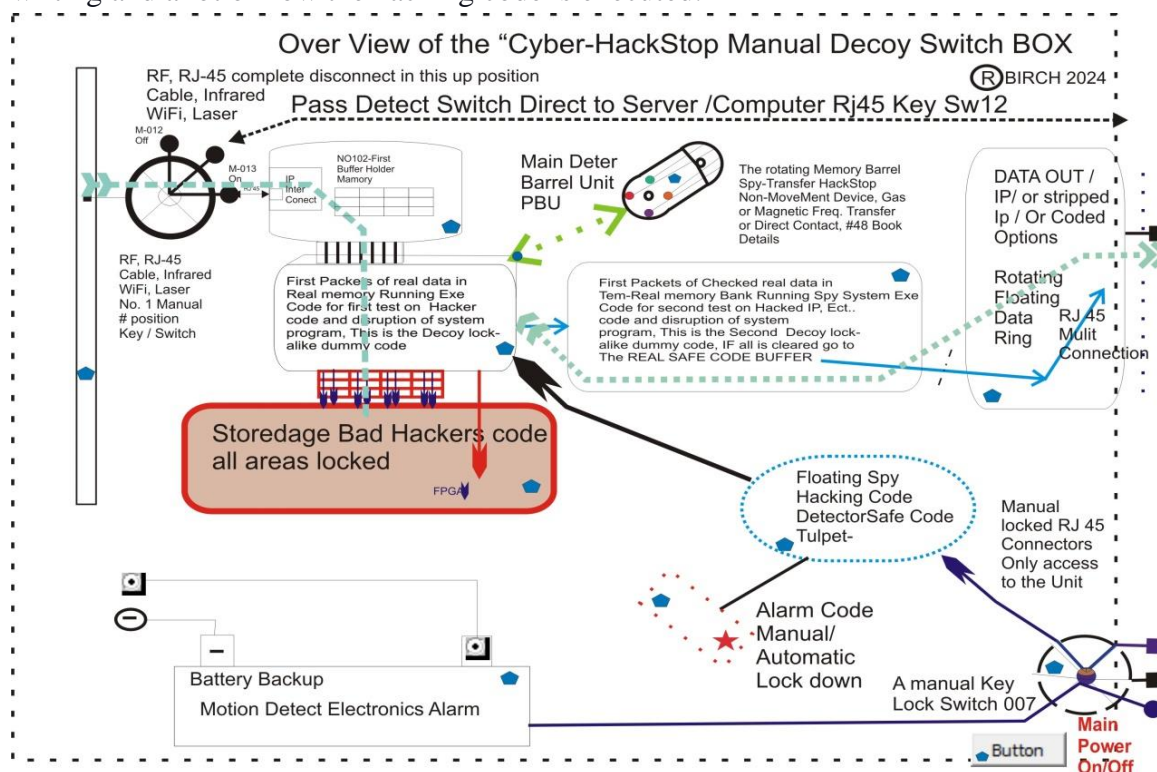

without using electronics, use a Gas tube to convert the digital signal to a Gas Digital code and then the gas will delay the signal using magnetic and then you have defeated almost the speed of light, or just slowed it down, “Great for Wall Street”, Oh yes Gas can be used to convert voltages and currents, think on that, “Great Applications for Cell Phones”. Let us move on.

I believe concerning IT signals (RJ45), (Cable), (fiber), (and RF) this invention would work very well; keep in mind the above paragraph. The idea would require a hardware device that rerouted the signals to a fake server and only delayed it for a few Nanoseconds, kind of like a bypass track for a train; it would have all the fake data and seem to be the real server. The software in the bypass server would detect the hack and then of course alert the operator and start a trace, but the hack would not know the difference between the real server and the fake, by-pass server.

Meanwhile in the IT code/signal or it would let it through? This is just an overview. More details are needed, and I have a complete drawing of such a unit. The IT Code/signal could be re-routed if needed. The *bypass switch/server* is a small device and goes in between the RJ45 (or WIFI) connector (cable/fiber), to the real server or modem, using hardware and rotational AI software thus making it a Bypass device in real-time, this is a gas or electronic or combinatorial rotational *loop device*. The basic unit can ONLY be switched manually off or On, Along with this idea a by-pass memory would always have the data stored and it too can be a by-pass memory unit. This unit I propose can track down the hacker in reverse (IP), by using frequencies of the Digital signals, on the wires or Wi-Fi, a very unique device. This unit *can actually* Delay the analog/digital signals, like slowing down a train, easily done with the right chemistry and electronics (very small device). Crypto Hacking would be very hard to engage with these techniques, and methods (Hardware, AI (ASI), and Cryptographic reversing of letters as a rotational block-chain is almost impossible to decode.

The “HACKSTOP” bypass switch has many other features and can be made very small, and not only checks for code viruses, and malware, but patterns, and if the incoming code does not make changes to the code the HACKSTOP switch passes it through. The HACKSTOP switch also runs a perimeter ring of the pattern checks to see what is repeated and compares how the virus code was written to get a signature of how the hack writes, so each hacker has their own type of

writing and a lot of how the hacking code is executed.

William Birchard The STOP the hacker Stop Switch 9724300 AM

JUMP CODE #45

"A New Inventions for the Computer Self-Activng Movement Mouse" (sjcs+/-)

To work as a Keep-A-live mouse so you can go to other screens/computers use a Mouse that moves just a small amount keeping the screens up and always ready to go, and stops vibrating when it is not used for a long time. An adjustable mouse, has many uses, think about it, it can also keep Microsoft Com Surrogate, and Runtime Broker guessing because it looks at the mouse movement, and things added to a file (Use Task Manager to see this). A very simple Sail can be added to the top of the mouse and blown on it to keep it alive and the screen you are working on. The above hacker by-pass device/switch is just a preliminary drawing and I'm in the process of making one, I have a basic unit that I use and I make different models, if interested email me.

JUMP CODE #46

"Small Switcher01-02 is a hardware manual switch, ROBB,Block-Chain, for RJ-45 Connection"

The Switcher01-02 is a hardware manual switcher that is physically moved near the computer or cellphones that either make or break the RJ45 (Wi-Fi) connection. No signal can jump over the connection points in the switch. And RJ45 is encased in a hard alloy tube. The Switcher01-02 is essential when using this new technology. It is a manual special disconnect from the Internet, it helps to keep the bad guys out and your computer saves from hackers and almost no computer

viruses. This RJ45 switch (Switcher01-02) also can help stop malware and corruption of your important files. *And can an electrical surge on the RJ45 connection(wires) move a switch or affect any of the 8 wires used for the RJ45 line, Yes, and the deep state (sabotage) can also use 4 of the unused wires on the Ethernet connection (RJ-45).*

*What is The Puzzle of how to Become Anonymous on the Internet, a scenario of how the Robot called **ROBB** & and the *secret charters* works on the internet, and almost never stops?*

- **The kicker is the *RF-BLOCK-chain link technology* “Ground Link Technology”**

Please see info on the “Ground Link Technology” “Sending data through the Earth”

The scenario: How the ROBB Robot runs like a BLOCK CHAINE technology

At the same time, another technology that is running an *rf-chain-link fragment of process code called the ROBB algorithms (programs)*, is hard to hack because all parts of the algorithm are running as a broken-up section of code on thousands of RF links (or standard *Ethernet*) standard data (or RF data Links) on servers, and the ROBB is going around the world looking for very long strings of the charter set, the user made. Once the *rf-chain-link-ROBB* program is in the Raw RF space internet domain, it is almost impossible to stop (underground and space Raw Coded Frequencies). So there could currently be 7 super users in the *rf-chain-link super users file*, but not needed, nor should be used. This algorithm can amass millions of anything, like groups of people, for many different reasons. Of course, this is mind-boggling technology; I need a lot more details to describe it better. And remember to convert the IT code to an RF cable link, never use RF (Wi-Fi), unless you have an RF blocker converter. The cell smartphone is an OPEN EYE to the World, but they can be spoofed. “There are many ways to do this”

To protect your source, use the max Switcher01-02, On Off Switch as a procedure”

The source code is encrypted and rearranged by a second algorithm and changes all the time, very hard to beat this code, even hard to write this paper This section is for the coder, who may do AI.

The Switcher01-02 is basically a very intelligent switch that looks at the incoming digital data or information from and to the internet. Most of it is manually controlled by the user and almost impossible to hack because the internet does not and can’t control the connection between the computer and the cell phones. It is a very intelligent switch and ONLY is moved physically by the user to either break or make the connection to the RJ45 switch or WIFI magnetic fields in some cases. I make my own equipment and I also use Off-The-Shelf (OTS) parts, almost all are custom-made. So the digital fiber or wire data signals can’t jump over the connection points in the Switcher 01-02. Using a magnetically or physical force to break the Switcher01-02 is almost impossible, even with a large tool or cutting tool and it would be obvious to all, and the software monitoring these connections would be notified immediately as an alarm.

JUMP CODE #47

“The Water Bottle **Jump**”

“The bouncer to bouncer”

“In essence, the seeing through the Solid Wall”, “Disturbed The Wall”

“The 15-mile magnetic pocket disturbance detectors, the size of a cell phone, self-contained, (SJC's), (JCISRAEL)”

The pocket magnetic disrupter for Smart Cell Phones, A True RF blocker

I'm also working on a small *pocket magnetic disrupter* that can fit in the average pants pocket, so reaching down in your pants and flipping a small switch (or voice Activated also) can prevent your location from ever being known, with no trace in or out, and is very low power, this can let you know if a missile or projectile is coming toward you, from far away. All machine code, encrypted, and UML, Python, and C++ are used. What is the bouncer? So each computer or cellphone can bounce its signal to another cellphone or interrupt the standard RF (2.6...MHZ ~) cell phone in use today (2025). This is a nice feature for the right people who want to be invisible on the internet. Ultra-low Frequency (ULF) are hard to stop, and almost impossible to deter, and Upper Frequencies are easy to delay and reroute. So if a person had this pocket magnetic detector (>5 Miles) it would alert that person that a weapon or a projectile was heading toward them, and of course that detector could be sent to another location, if needed. It can also prevent the RF from hacking the phone, and even give an alert to the (star link) technologies, star Link can be hacked and broken in a few different ways, as listed in this paper, disturbance in the Atmosphere and a shield set up like a *frozen electromagnet block* and disable this type of communications, and or a shift of energy in certain places in space and on the Earth, and below the crust of the Earth (Ref..Det. Old Testament 25:). The human/animal eye is a formable opponent in the dark, never underestimate this type of vision, some people have this range of vision, depending on what they eat and where they are, and certain crystals are a great conductor of energy and vision. Rocks, Crystals, trees, and wood all hold water power and electrolytes. Ground/Earth Crust and below are great electromagnetic data links, better than space or atmosphere at very low frequencies, but high frequencies go far and follow the Earth and the Earth curvature and the draw in space particles, and differentials, sometimes this is very important, but low frequency electrified energies goes through just about almost anything, even the Human/Animal atoms, be careful about these Ultra Low Pulses and Fast High pulses can Kill you from far away and is a Killer microwave wave.

JUMP CODE #48

“ From IMP PMM Paper #43”

“THE NEW **JUMP CODE** “GROUND-LINK COMMUNICATION NETWORK”, (GLCN)”

Star Link is amazing and complex, yet very simple, and uses a lot of basic electronics, it is the combination and applications and networking that makes it so good, small cubes, linked to each other, and can talk to multiple nodes. Use a small water bottle and a Raspberry PI, tiny boards and possibly an Arduino, a few batteries, and if you want a long long-lasting threaded conductive loop antenna and use a balloon a few feet above the crust in any location; could be made very cheaply. And some small electronics would all fit into a *water bottle*, I also like the BB board, but the PI would work. This network can do more things than Star Link and using the bottle design unit can intercept RF and decode the digital/RF signals, pinpoint locations, and spy on all of their GPS positions using RF signals; sending location and receiving location. The Water Bottle can have many units lost so one or more lost is not a big deal they can operate in a very big area, like 4-5 countries or more, and can be easily dropped in place or hidden in a place that is hard to find. And also if needed a cheap cell phone and the right app can go in a bottle with a few electronic parts for positioning for targets. Many advantages with the technologies and very low cost, ground-link (AKA “The Water Bottle-Link” can use the magnetic waves in the Earth and very hard to break its cryptic codes, requires no wires, and is very smart in using low power (because it uses very few batties) they last a very long time, in fact moving them is a simple electromagnet vibrator in a cell, like in a phone, simple technology to change its location. They are also waterproof, light, and small. These Water Bottles have many advantages, and in fact can be made to work with a cell phone, or even smaller, half the size of a cell phone, and in some cases replace a cell phone as a counterfeit, this can make it a weapon if C4 is loaded in. They are easy to conceal, and can also be in a real Water Bottle and even work better if in water, they can work as a battery and store energy and can be stationed at least a mile above/below the Earth and taken down (off Line) any time, and they have many advantages. Picture and drawing are coming, I will make a few. The software is mostly coded in Python, C, ASM, and Machine Code, and using a Linux OS, In some cases, the OS is not needed, very hard to hack the code because my new dummy **switch/by-pass device**, is very hard to hack (pure machine code, I know how to write Machine Code), and it has anti hardware built into the hardware and the software (OS and Db if needed), (if wanted), it does not have to be used, and the code is always changing, once more it is a very secure machine in a water bottle. The device can be made in the desert or just about any place, even in the ocean. Very little protected code is needed, and not much to hack (almost all hardware), and the total water bottle is encapsulated in harden-proof solid epoxy. All communication has to be converted and is much safer than Star Link, a minor point. Of course, the best way is to hack Star Link and decode the RF signals, in the atmosphere. The best part is collecting power from nearby wires and machines (Earth), which is a plus.

(sjcs+/-) “This is somewhat convoluted but a lot more in the IMP PMM paper #43”. “The BB Board”

JUMP CODE #49

“The Future of long-range weapon systems”

“The future is Now”, and Starlink is on the leading edge, but the danger is ahead, because if in the wrong hands (people in power/governments) Star link becomes a super weapon. So to refresh your memory, Starlink consisted of many small satellites around the Earth, covering just about all global locations. The Starlink devices/technology can track down just about anyone (their Cell phone), and with Advanced GPS and AI it is very possible for a ***Frequency Coded GPS bullet (FCGB)*** shot from a long-range weapon (Sniper Rifle) to work in conjunction with Starlink (RF) tracking systems, so Starlink gets the bullet very close to the target or right on the target cell phones position assuring a Kill (and no line-of-site required), and finds just about any target (targets) on the face of the Earth, or even under the Earth. And if the ***Frequency Coded GPS bullet*** has a sample of the ***target's blood frequency-coded patterns***(easy to get) then the bullet will hit its target ***exactly where they want it to go***, “A confirmed Kill, or Not”, so as you can see this Starlink system can be good or bad, depending on who is controlling it. And it should be noted that Starlink keeps records of this Kill, and a lot of other data. Of course, the ***Frequency Coded GPS bullet (or patterns)*** can be used for many different types of targets, not just people or living things, it can be used for buildings, and nuclear sites to name a few, and in the Nano realm, the ***FCGB (or frequency coded patterns)*** has numerous applications, for medical and magnetic medicines. (sjcs-) "This is one of the numerous Weapons of the High-Tech Future". “Imagine the tactical nuke applications, the silent killer”, read on Please

JUMP CODE #50

“Switcher01-02 Device”

The Switcher01-02 has the same features as other switches, but the software build is a lot more multifaceted. It allows the user of the computer or cell phone to use the data in different languages, and store them in hidden locations around the world. The Switcher02 can also be used to re-route incoming data, so the data sent to other routers or connections can’t be traced.

Back to Switcher 01-02 ILIOS:

So, I have chosen to use a few different types of equipment along with the manual Switcher01-02, and that may include other pieces of software for some of the applications listed above, like being anonymous. As I said, all of the above is germane and relevant to what I stated and also what is to come in the future. This Switcher01-02 device needs to be used especially for operations on the Eyes and the Human Body, and also when using Wave Equipment, and other Electromagnetic devices, because you don’t want the equipment to fail in the middle of an operation. This is very important, so no interruption occurs when working on the Eye. Also, use an APC for power backup.

Concerning the **Switcher 01-02 ILIOS**, Please don’t discount the Switcher 01-02 ILIOS, it has many uses in the water bottle devices, not mentioned in the programming phase, and very little,

can be used to completely stop all hacking, but a false program or dummy server re-routed to a dead-end is your best choice, and almost no anti-software (virus, malware) is needed, I believe that a hardware disconnect of all 8 wires in the RJ45 cable have to be shut off, and power to the WIFI hardware needs to be turned off also a real disconnect. WIFI also can be shielded and jammed or changed, and WIFI has a few options not talked about in this paper.

JUMP CODE #51

“The Continuation of AMD and the Radio Wave Frequencies (RF) Capabilities”

And by the way, when using this type of software and hardware it is of the utmost importance to have extremely incredible security; this is also related to this subject in the book. Just think this software can be used in eye Surgery, it has to be extremely safe, I mean have exceptionally safe software and hardware, especially if it is connected to the devices doing the Eye Surgery, it's very important. This technology has many applications as I said a type of invasive imaging, and routing graphics for future archives. “The clean room”, utilizes an Active Ups backup system.

Magnetic Wave Focus Beam Technologies

We are talking about this magnetic wave focus beam in the medical field, the above technology is also a way of using RF Frequencies to cure or change the Human body, and if applied correctly RF Frequencies have amazing almost unknown utilizations, that I did not even mention. I will first talk about military and commerce purposes and methods which are very technical, and then the RF Frequencies used in medical applications.

JUMP CODE #52

Short Outline:

“The Main Focus”

So this is a Preliminary Book on Locating & Identifying Anomalies in the Human Eye, focusing on Advanced Macular Degeneration (AMD) issues, and of course, the blood flow in the Eye, using a new device called the Wave Detector Emitter/Receiver (WDER). And “Wait for it”, fast almost pure oxygen, and strength of blood vessels, the walls, and neuron conductive of electrons-chemicals. “Just a small definitions, more is needed the WDER machine is needed to do the following.

“E1. Wave Detector Emitter/Receiver (WDER)”

“The Machine”

Ultra-Low Frequencies (ULF): “Can go through just about anything, it can also penetrate the Human Head or any part of the Human/Animal Body”, and how to Apply Ultra-Low Frequencies (ULF), and Why, they go through just about anything but need a physical method of focusing the magnetic beam, and workable equipment. So before we get started with the details, I would like to mention that the WDER technology can be used in many different applications as listed. It is for finding Gold, Silver, Copper, Other Elements, and Precious Earth Materials. It also has capabilities for the extraction of materials and compounds embedded in an ordinance and is advantageous in Military armament and commercial applications. Also for neural networks in Artificial Intelligence (AI), (ASI) advancement, and for solar radiation protection that is very useful for future space travel & exploration.

Magnetic Wave Focus Beam Technology & Methods

A side note: History, Some of these ideas and methods are just my opinion, no offense intended to anyone, but I do have many references and experiments to prove my theories and I also have done a lot of demos, see these references page at the end of this Book/Paper. “And I have many experiments with real equipment I made, I have these on youtube.

First, let's talk about Magnetic Detection,

“The Big Questions”

Who is developing valid mechanisms and real equipment that can locate & identify magnetic anomalies in the atmosphere, and who can also build a **Real Magnetic Iron Magnetic Dome** over America? Who has inventions to find hidden objects for medical, military, and commercial applications, and of course technologies for the restoration of the Eyes (AMD) so people can see?

Many universities, governments, and third-party contractors get big contracts and have many over-runs mostly producing only convoluted books and many white papers. And yes, we still need these scientists, engineers, and non-degreed individuals who have creative ideas, but they need to build devices and machines that work. They need funding and backing but are ignored by most universities and governments (DARPA, for sure), and this is a shame, as many average people have great ideas. I believe universities have many undergraduates writing books and papers for their thesis, in any case, the US government spends a lot of money on them and their white papers (Paper Mills), and some are needed, but we need advanced working equipment and hard-working intelligent people.

DARPA is a very big US government agency that has a big buget and does not produce a lot, the little inventor gets lost in the paperwork. The US Patent Office is a sham, and so many inventors have lost heart and given up their dreams (I'm one of them), because they get cheated by the USPTO and examiners, and lose a lot of money, once more the big companies win out. As of 2025 patents are worthless. *(bjc)*

JUMP CODE #53

“The Paper Mills and the loggers of trees that use a lot of paper are not good, and cutting down trees is not the answer, but recycling old paper and old lumber is needed, that goes with other stuff, so why destroy the Earth? If everyone will plant a tree, that is what we will need. Using and recycling there is no need for deforestation”.

Acquiring Valid Data from Deep in the Planets (Earth and Beyond)

So as stated in some other books they lack the necessary Ground Penetrating Data as a baseline of any real test data for a comparison for their software modeling, and for types of magnetics frequencies related to ground penetration, that can be used to locate and identify materials in the deep Earth that is close to or below the crust. Focus magnetic beams are essential for looking at the depth of elements in the Earth.

So to build a valid model, the book mills (people creating many white papers) still try to model false data but no real baseline information, they have great math and pictures, but as they state, nothing conclusive. This kind of false data modeling also applies to how scientists receive data from other planets, as their algorithms are not completely correct, and once more no valid data to model by. This is just my thinking as I write in Python, ASM, Machine Code, and C++ (crypto-code). I did write in machine code for the F-16 fighter Jets. So artificial and misleading data is not very good, but I still believe some very good data is needed to provide a starting point. And any detail of how they got the data, that is using the advanced sensors would be great and useful. From what I have gathered they used a type of Radar and IR imaging, this is a form of their technology, and I don't have knowledge of these methods. It's possible that we could go deeper into the Earth or Moon, just not sure (Apollo 11 I think it did a 3D Topographical scan), but went back to get the equipment). So software modeling must be difficult, a guess at best, once more my thinking. I would need to look at the source code and the sensor info in detail, as stated to know if we have good data or not, or just surface data, possibly a few centers deep at best, just like detecting PU39, 35, 38, Tritium Gas, “W54” warhead from a Drone, unless close very hard to do and take big equipment, if it is truly truthful.

JUMP CODE #54

“Apollo11 and It's Missions, NASA”

So Apollo11 came close to going into the outer layer (mantle) by using a type of radar sensor on the unit they carried on the command module, it's hard to find information on that sensor, but they say: “that the surface of the crust was penetrated”, how deep I'm not sure, I'm not sure about the all of the data from the sensors, because I'm not certain about the modeling they may have added or the sensors. I read and studied a lot about Apollo 11..., it's amazing what they did and for sure the pioneers. Runners like Elon Musk, Space X, and others should thank NASA for all the prevision of all the Apollo 11 missions. And I think that all of their teams in the past and present have done a great job, well done, but lack creativity.

References on Magnetic Wave-Related Technology

In geology, the crust is the outermost layer of a planet. The [crust](#) of the Earth is composed of a great variety of igneous, metamorphic, and sedimentary rocks. The crust is underlain by the mantle. The upper part of the mantle is composed mostly of peridotite, a rock denser than rocks common in the overlying crust.

The [moon's](#) deepest interior, especially whether or not it has a core, has been a blind spot for seismologists, explained Ed Garnero, a professor at the School of Earth and Space Exploration at Arizona State University, who also participated in the study. "The seismic data from the old Apollo missions were too noisy to image the moon with any confidence.

Not conclusive data, noise, and maybe 40 centimeters (clutter), "But until now there has been no proof that these images really do show [underground objects](#). Researchers were unsure how radar is affected by underground features, and no one had ever used radar sensing to [detect objects](#) they knew were there. So although the images looked convincing, it was possible that they simply showed varying soil properties or surface slopes".

I found no real data on the Ground Penetrating Radar (GPR), and units that work or really work well, at best we see some shapes of objects, and it may be possible to see a few centimeters deep, with good reliability, maybe. This is very important to know related to the technology I have stated in this book because the current technology does not use ultra-low frequency and the Earth waves. We can make a battery in the Earth, and have current flows. That means it is possible to collect this current flow in the form of magnetics, basic Faraday law. Scientists just don't have the methods to do it, yet. And how do scientists know how the RF frequencies for all communication are not transported by magnetic Earth waves as I stated above?

JUMP CODE #55

"mag-rf energies transmitted in the atmosphere "

A short note: Cell phones, Radios, Motors, Vehicles, Appliance, Small Sensors ([sjc](#)).

So I did an experiment in my lab and powered all of the above from more than 6 feet away, and even moved a big RC truck model, witnessed by several scientists 20 years ago, and other demos in China and around the world, no one believed me, I also could charge standard batteries from a long distance). So almost all objects that make motions create electromagnetic energy (Faraday laws also apply to the Atmosphere →→Device, this can come in the form of a type of AC, Pulsed, and in some cases straight DC, with pulses, this was just like Faraday did in his basement), and there are older many papers and theories they don't take this into account. Most of the time this is in an RF analog sign wave type of energy that goes from negative to positive, up and down (depending on the location in and on the Earth) can acquire more or less power, locations are important. There is always a differential for the creation of any power, there has to

be a difference of potential, all the time, and even planets have to have this differential balance to maintain the Cosmos. So to make it easy to understand: it's the rise and fall where the real energy comes from, and real Root Means Squar (RMS) power has to have some physical motion, by the way everything is always in the motion of movement in rise and fall. Once more as a side note: a Difference Of Potential (DofP) can be between anything but in most all cases has to be in a limited (very small) instant in motion, or some objects, all of this is in my IMP PMM #43 Book/Paper #1 papers and books.

JUMP CODE #56

“Gathering Energies or Power from the Aether”

Certain frequencies from a cell phone and other devices emit a magnetic signal in the form of electromagnetic type energy, and there has to be a receiving sensor to gather this power/energy, but the magnetic signal always has to return to Earth some way (ground), and this returned energy still is useable energy, and this is a critical point. The return energy has a certain amount of current in addition to the original current going to Earth, you can see this with a meter in the return path. But as this is magnetic form, so in a cell phone the current it is utilizing has to always have a ground, that is a return of the amount of current to the ground, and is normally the person holding the cell phone, and that would be a magnetic ground.

To use motions magnetic sensors they have to have the correct placement and location of their receive and send magnetic sensors. This is an example: (1.) A Tuned Crystal Type Coil, that also uses harmonics can be utilized, 2.) HF Diodes and Electronics Devices 3.) Motion coil transformers and diodes, 4.), Gas-filled tubes/transformers/diodes (the best solutions), and they need to be in motion to gain the maximum amount of energy. Once more the placement of these sensors concerning the Earth ground has to be accounted for, after all, positive power has to have a return, and when using Cell phones the return power is through the user, not the best to have currents running electrical through the body, but it does, and this is very bad.

Reference: AbbyAbazorius Tech Briefs Vol.48 No.6, this paper is well done but my basic theories are different; you have missed a few major points (DofP), "A Lot". Earthwaves are the real carrier of all RF and motion waves in general. Last but not least Earth Waves have to be taken into account when using magnetic waves, especially when using a focused magnetic beam for medical applications. This is extremely important, and the detail of how to design and build a focus magnetic beam is in a #1 IMP PPM 48 # paper. The above electronics are in my IMP PMM paper. #1,43 Reference: AbbyAbazorius Tech Briefs Vol.48 No.6, this paper is well done but my basic theories are different; you have missed a few major points (DofP), "A Lot". An attempt to make a summation of the above section, there are many white pages on magnetic, waves around the Earth, and of course detection of materials in the deep Earth. This is a very difficult book/paper on complex theories related to magnetic, waves and the Earth, and even harder to comprehend visually, it is hard and very futuristic.

To restate there is no tangible physical data regarding GPR, just an object and shape can be seen, and this is because the scientist has no actual valid data from the GPR device, or baseline, just a computer model to compare it with. And no equipment can look deep into the Earth very far as of 2025. By using the ROBB (AI) hardware & software sensors, deep Earth exploration can be done. Some metal detectors can go a few centimeters into the crust of the Earth.

JUMP CODE #59

“How Do These Brain Implant Procedures Function?
Magnetic Wire Attraction” “Wire in the **Blood**”

“Some of my ideas are not to be used until they are tested out”

The wire, which is threaded (inserted) into a vein, attracts special magnetic nanoparticles engineered to look into tumor cells that may be roaming in the bloodstream, or if you have a tumor somewhere in your body, this procedure may work. With these tumor cells, essentially magnetized wire can lure the infected cells out of the free-flowing bloodstream using the same force that holds the magnet's family photos to your refrigerator (strong magnets). The magnetic Nano-particles also can be injected with a magnetic wire, and they search the blood for floating tumor cells and attach to them. If they are near a wire they're compelled by magnetic force, and the tumor cell particle clings to the wire. At this point, the wire is pulled out by the surgeons. A strong magnet can also be used to pull out certain clots and tumors if they have enough magnetism in them.

This book describes the technology that was published in *Nature Biomedical Engineering* today, stating: “Earlier cancer detection is a highly sought-after goal in medicine; the earlier the disease is detected, the easier it will be to treat, presumably. But detection methods, especially through blood (such as a simple blood draw) is not yet up to snuff”. More from the release: 'We estimate that it would take about 80 tubes of blood to match what the wire can sample in 20 minutes,' Gambhir said.: Of course, he continued, it's not practical to remove 80 test tubes of blood from one person; that's more than a half-liter. 'So, we're hoping this approach will enrich our detection capability and give us better insight into just how rare these circulating tumor cells are, and how early on they exist once the cancer is present.'

What's more — the wire's magnetism isn't limited to just cancer. It could siphon away any disease biomarker (a type of molecular signal that flags illness) that's present in the blood, depending on what the nanoparticle is engineered to seek out.

So far, the wire has only been tested in pigs, as some of their veins are similar to the size and shape of veins in the human arm. [Gambhir's](#) next step is to apply for Food and Drug Administration approval so that he and his team can test the success of the wire in humans”. As a secondary note: If the above assumptions are close to being true (a start and good direction) then these researchers and scientists may consider that blood in the body also has Echoes of magnetic resonates that can be detected and read quantized. That means all tumor cells (cancer, Bad cells) are different in size, color, and shape, and of course have different dialectics, (resistance). A lot more needs to be clarified on what I just stated, and proven in the Lab. Blood in the body changes its frequencies and direction, along with its magnetic content, some of these facts are overlooked. A blood converter (Neuron in the body) may be available to use certain strains of blood localized for each individual area, the treatment changes with different areas of the tumor. I believe an external magnetic device could do this non-invasive procedure. This categorically applies to the Eye.

“The very small magnetic Nanowire in The Body/Blood”

Current popular cancer treatment options include tumor surgery, chemotherapy, and hormonal treatment. These treatments are often associated with some inherent limitations. For instance, tumor surgery is not effective in mitigating metastases; the anticancer drugs used for chemotherapy can quickly spread throughout the body and are ineffective in killing metastatic cancer cells. Therefore, several **Drug Delivery Systems (DDS)** have been developed to target tumor cells and release active [biomolecules](#) at a specific site to eliminate the side effects of anticancer drugs. In my estimation Chemo / Radiation Treatments do more harm than good, they destroy more cells than good it does.

However, common challenges of DDS used for cancer treatment, include poor site-specific accumulation, difficulties in entering the tumor [microenvironment](#), poor metastases, and treatment efficiency. In this context, non-invasive cancer treatment approaches, with or without DDS, involving the use of light, heat, magnetic field, electrical field, and ultrasound appear to be very attractive. These approaches can potentially improve treatment efficiency, reduce recovery time, and eliminate infections and scar formation. In this review, we focus on the effects of magnetic fields and ultrasound on cancer cells and their application for cancer treatment in the presence of drugs or DDS. See the picture below, see *Fig 1.002*:

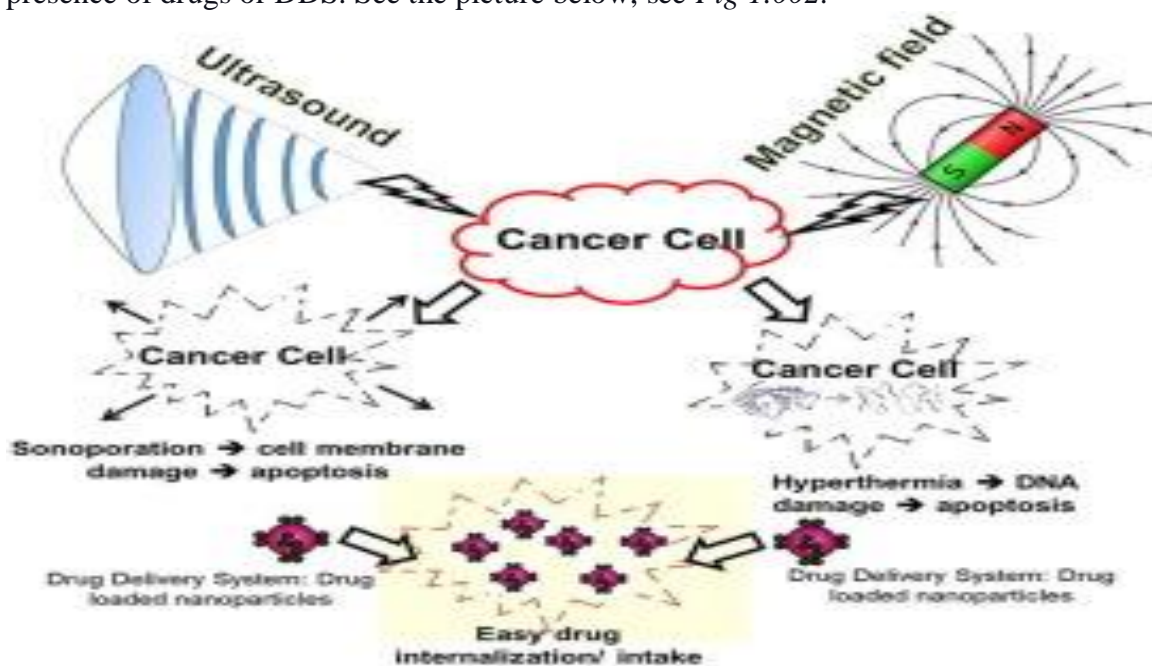

Fig 1.002 Not too many Fig. numbers

Magnetic Medicine using magnetics needs to have a focused beam pinpoint device applying Ultr Low Frequencies (ULF) for steering the magnetic beam to the target, cells or organs that may be diseased, and this is described in another Book/Paper. We can also use a type of **Thin Nano Magnetic Cloud Slicing** to remove cancers or tumors. Please refer to the #1 IMP PMM Book/Paper; the description of **Thin Nano Magnetic Cloud Slicing** is too much for the **Book/Paper**.

The Holy Bible (KJV) and **JUMP CODES**

Actually, the Holy Bible (KJV) has many **JUMP CODES**, Especially the book of Deuteronomy (28, all of the book) the law, follow it and be kind, Amazing teaching. Assuming the scriptures are correct, where is the human/animal brain that GOD created? And what happens to logical and moral thinking? And is there such a thing? “Where did our Minds Go”, Mind Virus have taken over? Possibly, but basically, it is a corruption of the Human Soul and people allowing this to happen “Welcome to America”, Americans have helped many Nations also, and we still have some good people, I believe the Churches all over the world have lost their way, and did not stand up for GOD (like in NAZI (Communisms) Germany 1933-1946), this also is the decline of

America, brainwashed. (kfdl) This paper has many ideas and theories embedded in the text, please don't overlook them. Unfortunately, America and the World have become so evil and corrupted, and the Churches are not preaching "Repent Sinners", how long will **JESUS GOD** let this go on, and in some respects, the people and leaders of Israel lose their way? And why not pray to JESUS not Mary mother of JESUS? The KJV of the bible has many scientific facts and people also overlook things in the bible, and many are what we call supernatural, this is possible. Some of the Magnetic Frequency Waves *Text* is in sign-waves **Blue** I'm trying to stimulate the reader. **(jc)**.

JUMP CODE #60

"Ophthalmologist Specialist"

(The Eye & the Eye Surgeon, from a Frequencies point of view)

So this is an extremely important point when using the E1 Wave Detection Device (the Magnetic Focus Beam), and only to be used with trained doctors and technicians. This is because medical procedures and restoration for the Eye take priority (precedence) over any type of Wave Detection Devices, I have mentioned this in most of my paper. This technology has many applications as I stated earlier, in this Book/Paper,

In this paragraph, I will talk about blindness and how to apply the WDER technology to possibly cure blindness. I mentioned in the earlier chapter *the* E1. Wave Detector Emitter/Receiver (WDER) related to the Eye and use for Advanced Macular Degeneration (AMD) medical & non-medical applications. The eyes are one of the most important parts of our body because it's your window to see the world around you, blindness is a serious problem and blindness needs to be cured, but can it be cured? YES

The Advanced Macular Degeneration (AMD) of the Eye using a wave detector E1. WDER (as I stated) can be applied to different parts of the Eye. Using the back and sides of the skull for magnetic entry points, using the back of the cranium as directed by a second and third magnetic wave focus beam, so two focused magnetic beams can be used at the same time. This technology can also be used on animals with *no anesthesia, using a Cartesian coordinate* system, and a 3D approach for use on the skull (Brain), or an advanced three-dimensional 3D robotic device as a guide, all the above is utilized to remove the yellow drusen (yellow pigmentation) that covers the macula, and possibly increase oxygen and blood flow. Please see the drawing in this paper, and online, this is just a general overview illustration.

All this technology will be available in 2025-2026. One of the main things is to realign cells in the human body and restore the structure of the cells. And of course, increase *blood flow and oxygen, and possibly add certain drugs so they can flow into the target area in the blood*. And then attack the drusen and eliminate them. Some drusen are hard or soft and have different consistencies, and multiple types of frequencies have to be utilized with more than one focus beam. The frequencies needed are listed in my paper #1 IMP PMM. A key point in using a wave

detector device (*WDER*), (these the low frequencies applied have to be ultra-low-frequencies (ULF) pulsed wave frequency), and of course very low magnitude frequencies and with very low power are mandatory (< 30 Mw). These frequencies can reach just about any part of an internal cell and if a *pinpoint focused beam* is used it can either eliminate an unhealthy cell (pathogen) or in some cases change the infected cells and replace them with new cells from another part of the body. Just to be clear a *WDER* uses a *Magnetic Wave-Focused Beam* (*the waves are at the Nano level*) *penetrating any part of the body down to a cell level and thus increasing blood and oxygen flow. Of course, blood cells have their own particular patterns, sounds, and frequencies.*

So the *Magnetic Wave-Focused Beam (WDER)*, opens up a tunnel so chemicals and other drugs can get to the back of the Eye (Macula), in this case, applying the correct drugs and chemicals to the infected areas is needed, but in some cases, drugs may not be needed, as a *Magnetic Wave-Focused Beam* can eliminate the bad cells and clear passageways, the *Magnetic Wave-Focused Beam* has many medical applications, not listed.

In a nutshell, the E1 Wave Detector device uses frequencies that can remove the dark yellow spot in front of the macular (in between layers) and, and course, increase the blood flow in that area. It is imperative to increase blood flow and utilizing the wave frequencies technology can help to restore the eye. In some cases, the magnetic wave-focused beam (*WDER*) may be all that is needed to get more blood and oxygen to the eye, from the frontal position.

Macular

- [Medical Eye Care Products](#)

The LED Machine from Europe

LED Machine for America and this device has a low percentage of results, but still a possibility, we are not sure as of 2025, but this could be a starter. So there is so much information on the Human Eye dealing with frequencies and the human eye, and yet little is actually known about what the frequencies are in the Human Eye's inner parts. And do frequencies get transmitted to the brain where the brain is what makes the final determinations (above 60 Hz~) about our vision, so things we see or think we see? May be false. So I'm sure there are frequencies in the Human Body that scientists don't know about. The frequencies of Human Cells (all) are different and this includes the human Eye, blood has its own frequencies, and is very complex, and magnetic properties or even more complex. Of course, blood flow is very important in the Human Eye, and it's believed that certain frequencies help to increase the blood flow and oxygen level. And don't forget all matter is a set of frequencies that includes every part of the body, and of course, the eye, just to let you know.

Of course, more medical technical information is needed about this subject matter, but once more too much data for this book. I do have a complex book on these and plan to write several books related and I need to rewrite this book also, sometimes. So as we experiment we need to get good test data of the eye to make sure we have the correct frequencies and power needed to eliminate the drusen yellow particles that cause blindness. This will require a lot of experiments in the Lab in the US using the real specimen. I asking anyone reading this book NOT to use any methods in the medical field or on humans or animals, as these are not tested, as of 2025. I need a disclaimer on this medical part or other detection, I believe it is ok for the theories I presented, but still need my written approval to use it. The waves and RF frequencies are not just signals generated by electronic equipment, many materials, cut crystal, machine crystal, wound coils, oscillators, chemicals, and electronics have to be used with the right hardware and software to be applied to Humans and Animals. As I said the correct placement, and shapes, and only 3D equipment can do this for complex prototyping concerning experimentation design and future AI robotic applications need to be applied, this means a lot of AI software and hardware has to be custom build for machine-related software to behind the eye, a very delicate and long endeavors, robots have to be half biological, Human Cells.

COVID19 JUMP CODE #61

How to kill and Eradicate Covid-19

Tracking Down the Origin and Transmissions of COVID-19 Pathogens

“Long and short distant transmissions of pathogens, more data next”

JUMP CODE #62

“Hand-Held *Hydro-Flux-Radiator*, a Pathogen Filter”

The “*Hydro-Flux-Radiator*” (HFR), Flux
Covid-19

“Long Distant Transmission of Pathogens in the Atmosphere”

“So Pathogens can travel (move) in clogs of dust particles (groups of molecules) depending on the atmospheric conditions for a very short or long period in time, and that means the distance can also be very short or long before these clog dust particles hit the Earth and are captured (pulled in) by gravity, they are dissipated or lie dormant depending on what kind of surface they land on for an undetermined time (4 hours to 4 days Estimation), there is a remote possibility they could fly off into space. Stats: Glass: five days, Wood: four days, Plastic and stainless steel: three days, Cardboard: 24 hours, Copper 4 (four) hours”.

<https://www.cmmonline.com/articles/how-long-do-covid-19-pathogens-live-on-surfaces>

“**Conclusion:** The most common nosocomial pathogens may well survive or persist on surfaces for months and can thereby be a continuous source of transmission if no regular preventive surface disinfection is performed”. Based on CDC findings see the URL below.

<https://pubmed.ncbi.nlm.nih.gov/16914034>

So the travel time and other factors are an exact period of time and distance and are not precisely known, but depending on the atmospheric wind speed, temperature, altitude, and location it could be hundreds of miles, and very high. These clogs of dust particles could be contained in a cocoon-type wrapper. This supposition is based on clogs of dust that may be moving in the atmosphere around the Earth (many factors add and subtract to these calculations), of course, as atmosphere conditions changes are very difficult to predict. But based on the fact that space particles can travel from millions of miles away from Earth, it is not as farfetched as may seem that dust particles could carry pathogens. “Citations below”

https://www.nasa.gov/vision/universe/watchtheskies/meteor_cloud.html space dust
<https://astronomy.com/news/2017/11/life-in-dust> traveling hitchhikers

<https://Earthsky.org/space/dust-in-space-10-cool-things> space dust particles
<https://blogs.scientificamerican.com/lab-rat/air-microbe-how-bacteria-fly-around-the-world/>

“Using UAVs, Schmale has collected data that shows the lower atmosphere is "teeming with Fusarium." Schmale has DNA sequence data for hundreds of strains of Fusarium collected from the atmosphere, and they have preliminary data validating the important role that atmospheric transport barriers play in the transport of the microorganisms”.

<https://www.sciencedaily.com/releases/2011/09/110909155229.htm> on a UAV Aircraft

What can be discerned from the above paragraphs is that pathogens (all) can travel in clogs of dust in just about any place in and above the Earth/space and can always be a killer virus as long as they are alive (active). The transmission of pathogens is *not always* passed from human to human, this is a fallacy, other methods may be overlooked, and on the surface of aircraft (all over the aircraft), and for long distances (country to country). This would also include cloth and for sure footwear, properties on the Earth and are a perfect carrier, and how about food?

Short Distant Transmission of Pathogens:

For short distances, the generally accepted distance is no more than six (6) feet (human to human), but that also depends on atmospheric conditions, and many factors like temperature and the wind just to name a few. I would say twelve (12 feet at least) is safe (the mask adds very little protection). It seems that science is more concerned about the short distance rather than the long distance, and not locating the source of the pathogens. But the main point I want to make is that Pathogens like any other virus (bacterial) have to have a carrier of some kind. So this means pathogens need a mode of transmission (something to carry them), like humans, or just about any object. So let's rule out humans to humans for now, and also different modes of transportation Airplanes, Boats, and also finally the clogs of dust in the atmosphere, what then?

I also think there are many remedies for COVID-19 that can save lives, like vitamins, simple things like nose spray and equipment to clear the nasal passage, and, of course, hot water sprays up the nose.

JUMP CODE SPIKE CODE #63

“The Absurd Idea of how Covid-19 Spread”

It has been somewhat accepted that humans are the main spreader (carrier) of pathogens, if so how? What did the clogs of dust travel on”? I propose that pathogens could be as simple as “pathogens on footwear” of almost all travelers going from country to country, place to place, it seems like an absurd idea, but seldom do people wash their footwear, but do touch their footwear after taking them off, and then many time touch their mouth, this is a common habit. I go into detail below. And there are some easy and simple solutions to this problem, for the TSA, immigration, and other points of entry. Of course, all footwear still has to be checked.

https://www.europarl.europa.eu/doceo/document/E-9-2023-001200_EN.html Covid-19 Death

Covid-19 is a sham, caused by the governments of the world

<https://www.muhealth.org/our-stories/scary-reports-deaths-following-covid-19-vaccination-arent-what-they-seem>

Meanwhile, what we do know for sure is that more than 58 million U.S. residents have been infected and more than 800,000 have died from COVID-19, and the vaccine is one of the best tools to slow the spread of the virus and save lives.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC9225255/> CDC NIH In question the real count?

<https://www.nature.com/articles/s41467-023-36494-0>

Several studies have reported associations between COVID-19 vaccination and a high risk of cardiac diseases, especially in young people; the impact on mortality, however, remains unclear. We use national, linked electronic health data in England to assess the impact of COVID-19 vaccination and positive SARS-CoV-2 tests on the risk of cardiac and all-cause mortality in young people (12 to 29 years) using a self-controlled case series design. Here, we show there is no significant increase in cardiac or all-cause mortality in the 12 weeks following COVID-19 vaccination compared to more than 12 weeks after any dose. However, we find an increase in cardiac death in women after the first dose of non-mRNA vaccines. A positive SARS-CoV-2 test is associated with increased cardiac and all-cause mortality among people vaccinated or unvaccinated at the time of testing. “In my thinking, one (1) person is too many”

<https://www.hackensackmeridianhealth.org/en/healthu/2021/01/11/a-simple-breakdown-of-the-ingredients-in-the-covid-vaccines>

“The Ingredients in the COVID-19 Vaccines”

A Simple Breakdown of the Ingredients in the COVID-19 Vaccines

Look up what these are?

- **Acids**
 - citric acid monohydrate
- **Salts**
 - trisodium citrate dihydrate
- **Sugars**
 - 2-hydroxypropyl- β -cyclodextrin (HBCD)
 - polysorbate-80, sodium chloride
- **Other ingredients**

- **ethanol**
- That's it!
- **Lipids** – The following lipids are in the new COVID vaccine. Their main role is to protect the mRNA and provide somewhat of a “greasy” exterior that helps the mRNA slide inside the cells.
 - ((**4-hydroxybutyl**) azanediyl) bis (hexane-6,1-diyl)bis
 - (2-hexyldecanoate), 2 [(polyethylene glycol)-2000]-N,N-ditetradecylacetamide
 - 1,2-Distearoyl-snglycero-3- phosphocholine
 - cholesterol
 - Start looking these (above) up and you will be amazed
- What is the damage of the spike protein?
- Each component of the viral genome is inserted into a helical nucleocapsid surrounded by a lipid bilayer. **The Spike protein is responsible for damage to several organs and tissues, even leading to severe impairments and long-term disabilities.** Mar 11, 2024

What does spike protein do to the heart?

Multiple studies have shown that the Spike protein can induce **non-infective cardiovascular stress**, including disruption of human cardiac pericytes function, vascular endothelial cells, and the blood-brain barrier, and stays in your body for 14 ~ months. (sjcs) (mvnrfe)
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC9844011/> look it up, from the Internet 972024

JUMP CODE #65

“The Hydro-Flux-Radiator Explained, more detailed”

What is The “Hydro-Flux-Radiator” (HFR), Flux?

A Gas/Water (liquid/gel) radiator that can delay a Digital or Analog signal, almost like a *digital/analog train* of magnetics pulses that stops at different junctions that are programmable, hardware/software stations (train stops), that is a *Flux Delay* occurs so fast it is almost impossible to detect. So the Hydro-Flux-Radiator is a device that slows down or stops the magnetic flow and can also realine them. For the engineers and scientists who know bi-polar hardware (the duty cycle time, between the rise and fall times in Nanoseconds) it is the split Nano second where the digital /analog stops, and this is where a split-second capture of the signal is taken, and also delayed. The digital/analog train is a hardware chain that is physically woven in a wave-guide and it is literally like an automotive radiator, but much smaller, very small. “The HFR converts magnetic pulses into a liquid-pulse and then these Digital. Analog pulses can be manipulated, it is like an Automobile radiator that uses water, but it can use magnetic water/liquid, or gas”, “Kind of tricky technology”.

As a side note: Think of how your brain delays neutrons as it delays synapses connecting with each other and sending communications from one call to another, “this is also a synapse-type delay or memory delay. The basic idea is to delay electron chemical blocks of data for many purposes, this is also a very ancillary look into how vaccines and spikes work, in a way. I have

another paper just on this subject of the *Hydro-Flux-Radiator*, so I know this is very hard to understand, Oh by the way this technology can be utilized in batteries.

A Quick Look into the Eye, and Diseases

This is just a quick look into the diseases of the Eye as described above. I think, we have an electro-frequency device that fits around the sides of the head, kind of like an advanced headset, and can reach the back of the Eye (ear, sides, or up through the back of the neck), and apply Electromagnetics focus frequencies beam to the infected area, with pinpoint accuracy. This device can be used for all these applications and is noninvasive. So special magnets and shaped magnetics have to be used in the **WDER device** along with tunnel crystal to focus the beam. Some of this technology can be used in space by NASA so blood cells do not clot or change astronauts in space. As a side note, an Earth-type magnetic field around a spaceship with a magnetic focus set of beams can create gravity. Just recently scientists may have found a method of getting different medicines into cells in the human body, but not yet has been proven. To pinpoint a certain cell in the human body, or of the Eye is very difficult, this is where Magnetic Wave Technology may be applied, and collecting magnetic slices and re-assemble these magnetic slices in a High Definition Graphical computer, as of 2/19/2025 1112; it is the best method we have of looking into the Human Eye. “So as this magnetic water/gas/liquid moves it captures these bits of bad pathogens, another short definition”

The above info on the Eye section is covered in another book, and more data is also in another book about Frequencies (upcoming book), or you can email me.

JUMP CODE #66

‘Earth, Space, & Human Blood Magnetic Flow Effects’

In this section, I will explore the use of the E1 *WDER* for locating elements deep in the Earth. Once more: a disclaimer, do not use these technologies and methods, on any living things. You need written approval in writing from me to use this technology for any applications; this is a preliminary book only stating theories and methods. The equipment is very complex and hard to build. I am not to be held liable for its contents.

What are the Possibilities of Locating Materials Deep in the Earth, Seas, and Far Space Magnetically? Does the Earth and Space leave a footprint of a Disruption of particles in the Earth and Atmosphere, and the before and after can be located?

I have built a type of Wave Detector (*WDER*), which is a deep penetrating frequency vibrational wave machine that goes into the ground, ~ 4000 feet or more depending on the frequency & power used. There is no need for a high-powered detector because this new wave detector works by looking for a special set of patterns and receiving just transmitted signals, but it is also looking for geologic Earth magnetic patterns disturbances, and *disruptions*, like in the gold and

silver moved and what is close to it. So 118 elements have dissimilar separations of materials that are embedded in their core; this is like a split in a piece of wood, in this case, an element, so in reality, the WDER is also looking for the matter between material and what it is adjacency to. The WDER is also looking for cracks in materials, and all materials have a natural fracture (cracked) this is a sign of certain types of elements we can detect, because of the way the cracks form; it's a certain fractal pattern. I did some experiments in Dallas, Texas a few years back and was verified by DOD and private contractors from MIT, DARPA, and University that the above technology is valid and practical. "The rise and fall between the two or more particles/materials/atoms", " The Differentials"

“One method of Transmitter Voltage/Current Types”, “Switching gears (ljc)”

The above means changing AC and DC (energies) to a different type of wave power, more of a Pulsed Wave and a mixture of frequency waves is needed, and this is how the Earth sends and receives data. So in a short definition, the WDER is a machine that converts AC to DC and Back creating pulsed waves as a power carrier. This too is complex because it makes a new type of energy, not yet defined, But I believe Tesla was right track when he thought of this new power that could go through the ground and atmosphere. This type of energy allows for very long-distance transmission of energies with very little power lost because it rides on the magnetic fields in the Earth and Atmosphere.

The Magnetic Vacuum An Add on Note:

This device is always sucking the mag-Air particles and Gases into magnetic tubes that look for patterns in the Atmosphere, which have many elements that may also be hidden deep in the Earth, or even in the crust of the Earth. The vac mag-type device is like a very large machine that reads patterns and cracks deep into the Earth. It is also noted that valuable metals (almost all materials) are always near other Elements and those other Elements have certain materials close to them. Gold also may have black Earth holding it, so the chemistry or patterns of the Earth that is close to gold may have a crack or fracture that affects the gold pattern (silver or just about any material). So there are other ways to see deep objects in the Earth by their relation to other materials /elements because each object has certain patterns that affect its adjacent materials. By the way, VLF ULF of a lower power signal so it can be sent through the Earth, via a (1)-foot rod, this goes in a rod that goes to the ground and this can aid the Vac Mag-Type-device to work better, pulling more data. This very small, microcontroller, uses software to see the gold differentials (cracks & fractures) in the rocks and elements deep in the Earth, and this includes all of the 118 elements. All 118 elements have a cracked set of patterns or a fracture that can be detected. Using the right equipment these fractures and cracks can be seen from outer-space also.

Who Uses This New Technology the E1 Wave Detector Device (WDER)? What are some other Applications Available?

There is a group of people that want to find materials, gold, silver, and objects, and use this New and Improved ***Rotational Device (E1. Barrel)*** as it **has never** been done before. It rotates in an elliptic rotation and gathers Earth Waves, along with other data **that is stored in magnetic waves stored in the Earth**. So this device is a rotating collector with a sub-component to help make it work utilizing electronics & sensors. Of course, these groups of people want to remain anonymous and rightly so don't want anyone to know what they have found. They are also looking for hidden treasures and an artifact, doing this in a very large group helps everyone, so the total group works as a collective consortium, around the world. I will **try and** talk a little about this later, of course, this paragraph **is also very important, as it has** many advanced technologies. "It is very hard to explain the Spherical Transformer, and only 3D equipment can manufacture it".

JUMP CODE #67

"ICC CCI" Encrypt-Images, Hardware and Software" "AI"

Many Users and groups can use these technologies & methods & encryption So this Rotational (sphere-shaped) Device collects data, many types of data motion fields, and other hidden data/locations. The AI algorithms that the hardware uses in this paper are in a blockchain sequence and are in motion continuously. The AI code loads pieces of data/information from around the world. The "ROBB", (a Bio-logical Robot) is the working and motion code machine that makes everything happen, it stores *numbers and symbols* in this rotational database that is moving around the World Wide Web, in live streaming, and some time loaded on a HOST when it can find one. The data in the database is in cryptographic form and is also broken into small pieces, always rotating from server to server, an AI blockchain.

JUMP CODE #68

"Artificial Intelligence algorithms", AI "BOTT, BOBB", But the kicker is it is a "Bio-logic AI"

Many Users and groups can use this device and methodology to pass data/images/code/encryptions, "For the Layman". So this Rotational Device collects data (many types of signals), and the code (AI algorithms) that the hardware uses is a blockchain in always in motion an AI block of code, that loads pieces (parts) from around the world. The "BOTT, BOBB" works with motion codes, and it stores *numbers, symbols, and images* in this rotational-rotating Database. It is in cryptographic form and is also broken into little pieces, always rotating from server to server. Here is a glimpse of how it works. And don't forget textual code can be transported in this chemical written book (using a hand chemical scanner), pictures within decryption in a picture, video, and even in an animal can be seen. What do these people (hackers) who investigate rotational-rotating Database miss? The natural rotation of frequencies and overlooking of the Natural code and encoded pieces (important text and images) as frequencies,

and these images/text have a rate of change (RofC), Rise/Fall where all of the code lives as a living instance that occurs extremely fast, and these frequencies are in short chunks of Rise and Fall frequencies, they also change rapidly. “this description is like taking a drop of oil and moving it around the world and get the same shape, color, size, and composition back, almost impossible, even if you know the frequencies and RofC codes (+ the algorithms). The RofC codes (+ the algorithms) consist of complex encrypted binary codes. The text or images are a little skewed just a little, they are hard to notice, but AI can find them, this too is also encryption in another form. Many Users and groups can use this device and methodology to pass data/images/code/ encryptions, “For the Layman”. So this Rotational Device collects data (many types of signals), and the code (AI algorithms) that the hardware uses is a blockchain in always in motion an AI block of code, that loads pieces (parts) from around the world. The “BOTT, BOBB” works with motion codes, and it stores *numbers, symbols, and images* in this rotational-rotating Database. It is in cryptographic form and is also broken into little pieces, always rotating from server to server. Here is a glimpse of how it works. And don’t forget textual code can be transported in this chemical written book (using a hand chemical scanner), pictures within decryption in a picture, video, and even in an animal can be seen. What do these people (hackers) who investigate rotational-rotating Database miss? The natural rotation of frequencies and overlooking of the Natural code and encoded pieces (important text and images) as frequencies, and these images/text have a rate of change (RofC), Rise/Fall where all of the code lives as a living instance that occurs extremely fast, and these frequencies are in short chunks of Rise and Fall frequencies, they also change rapidly. “this description is like taking a drop of oil and moving it around the world and get the same shape, color, size, and composition back, almost impossible, even if you know the frequencies and RofC codes (+ the algorithms). The RofC codes (+ the algorithms) consist of complex encrypted binary codes. The text or images are a little skewed just a little, they are hard to notice, but AI can find them, this too is also encryption in another form.

As a side note: If we use a hardware or software decimator/Shockley device to only look at the RofC (Changing), and the center of the rise and the fall, we can use these levels of the digital signal for encryption, very hard to break this code, hard to understand. This in itself is another way to stop hacking. It also depends on how an author writes their book, Using RofC and other factors, hard to hack this type of Bio-Logical writing.

Here is a glimpse of how it works. And don’t forget textual code can be transported in chemical form within pages and pictures within decryption that are in almost any type of media. What do these hackers do who are examining rotational databases and find that have been encrypted Nothing? They have a false Database, and that is the point, the user has foiled the hackers.

The natural rotation of frequencies and the natural code and the encoded pieces of frequencies particle/ phrase are hard to disseminate. The rate of change (RofC) where all of the code lives as a living instance in time that occurs extremely fast, and these frequencies are in short chunks of the rise *and fall* of the square wave frequencies holding the information, they also change

rapidly. This description is like taking a drop of oil and moving it around the world and getting the same shape, weight, color, size, and composition back, almost impossible, but can be done.

So even if you know the frequencies and RofC codes and algorithms, these variables change constantly. So as you can see, this is a very secure way of hiding where the gold and silver objects are, only the people in the group know where the stuff is. A hacker would have to know the AI encryption algorithm to decypher the whole message/signal, very hard to do.

Who is on First (The User)? The ROBB, Robotic Robot on the Internet

So each user creates their own very large numbers and symbols in a string of characters. This string is loaded into any email (any big 120 characters numbers & symbols or bigger, only the user knows) that is sent around the world. So at this point, the ROBB has no idea about the set of numbers and symbols, only the user knows. This string can be put into a cellphone or computer, preferably using another IP address (computer), so no one knows your location or who you are. If you want, use a burned phone or (throw away cheap) phones, this makes it almost impossible to locate you (move your physical location all the time). So in essence it's just like a set of numbers and symbols that travel around the internet. The Main program is going around the world in a crypto-type format jumping from server to server, and this also makes it almost impossible to decode the messages. The email with the string you created can be sent to yourself or anyone using any service (Google, Yahoo, etc.). As extra information, the IP is your location on the internet of where you are located. For this application, you don't want anyone to know your position, use my procedures to make this happen, and "String length algorithms must be used to decode this paper".

We have millions of users that are comprised of a growing number of treasured hunters. The program, the ROBB (an AI Bio-Logical Robot) is the only algorithm (+Db) that holds these big long sets of numbers and symbols (Long Strings), in the right order. So once more, only the user and the ROBB AI-Robot know these long sets of numbers and symbols. It is designed into the ROBB so that only 7 people can activate the program and tell the ROBB to post these long AI numbers and symbols on the Internet. Then the user (the creator of these long strings) while surfing the internet and doing the right kind of search finds *a their long string*, if they find their special string they know what to do because (the message will be in a long string, and a small program that is on their computer will contain the information that they need to decipher and know. The ROBB will run on the internet almost forever unless stopped. So seven (7) men are given the keys to release this information from the ROBB Database.

As the user surfs the internet or looks at their emails they see their long string of numbers & symbols (it may also) pop up, and what are the messages they are waiting for? So, there are keys to open the message, from a small program (robb1-says) that is running on their machine.

This method of sending messages is better than the Crypto Currency code (Bit-Coin). It is ok to be anonymous as a group; Millions of people could be gathered to find many treasures using this software and get together. The *robb1* keys can be passed from person to person using handheld paper cards if needed, or these keys can be passed over the internet if needed, but not recommended. “This is Block-Chain stuff, and always rotating in pieces”

JUMP CODE #69

New Ideas, “Out of Thin-Air”

Ok, this Technology has a lot of New and Inventive designs, software, hardware, technology, and equipment, a lot of real devices. As of 2025, worldwide locations use these technologies for applications such as Shadow Treasure, Deep Treasure, and Blue Scars Treasure algorithms are a part of “out of thin air” thinking. The name “Out of thin air”, and “Thin-Air is the Atmosphere” and is described below, but still pertinent to this technology and **JUMP CODES**.

A new way of thinking by William B. Gordon and his LLC

The military and commercial concerns are trying to find a new way of communication and data handling, (not using wires, Cable, MW, SAT, or Wi-Fi) that is easy to hack, (drones of course), and other governments are doing the same. Of course, this is common knowledge. The use of this technology not-so-new “out of thin air” technology has been around for a long time, but this phrase “out of thin air”, “is a raw coded Very low frequencies wave signal “. And what makes it so hard to hack is it is a signal that uses the Aether Particles as a carrier. It can be encrypted with the Space Particles and dispersed. These technologies can travel deep into the Earth, a major factor.

Aether Communication

This part of the book starts to talk about theories related to the Earth and Aether (not so encrypted), so almost anyone with a general computer & phone (drones) can use this new technology without a connection to a server (provider), a “Point to Point” or phone to phone using Earth wave and energy would be advantages, but not yet ready. DARPA is working on this technology, and by the way, nearly all people with a little savvy can get some of this new technology data from NASA that I’m talking about, and search the Internet, patents, and paper not published. By the way, long-range drones missiles, and rockets disturb the atmosphere and can be detected miles away, and the target can be cloaked. As a matter of fact, when an explosion is ignited, it can be sensed, and its location and the amount of explosives and the range can be determined. The chemical composition of the Trident solid fuel can be sorted out. This is where the “the DIFFERENTIAL comes into consideration”

Will the Authentic WDER Device Come Forward?

So what can the WDER do, it can be used to capture any coded WIFI in the air and download and upload the data to a special capture transducer in any device and cellphone, while not using Wi-Fi, wires, or microwave. So this device takes data out of thin air, as it is data in the atmosphere using this new magnetic wave technology. So how do commonly known RF signals actually travel around the Earth and also in space? From my research, there is no answer to this question, just a hypothesis. "Not Yet". These "DIFFERENTIAL DEVICE can be very small and piggy-back with star links.

What about RF Wave Differential frequency signals?

So technical RF signal communication must ride on something (carrier), we call this modulation. This, of course, is essentially how RF analog wave works, so RF signal transmits signals through the Atmosphere, and also in the Earth and far space. So, in the atmosphere, analog signals travel like a sign wave going up and down. And we still don't really know how this happened, but using electronic devices we convert raw - analog signals to a digital code for the internet. But what I'm talking about is RAW RF and not WI-FI, like capturing someone talking around the Earth and gathering their voice, amazing technology.

The digital code inside the computer and cell phones only utilizes digital signals. And only the standard raw analog signals are sent in. This is just a short description, and once more too much for this book (too much). I have about four (4) books with illustrations that are available. And why use this newly discovered raw RF analog magnetic wave that has existed for a long time? The reason is that the Earth wave as a transmission line uses no wire, fiber cable, or high-frequency lines that are detrimental to human health; this is a great leap in technology for mankind. And of course, this new type of communication works much faster. Utilizing small devices like a miniature phone is easier and requires less power and goes a long way and uses this new technology. Of course, there will be no cell tower, and this is a great advantage. This new technology can go to the moon or other planets and back to the Earth, making this amazing communication.

Stopping Ultra Low Frequencies (ULF) Signals are Very Hard to stop.

Please note that cellphones are in the 600 MHz to 2.5 GHz range and are easier to stop than the ULF (10 Hz to about 100 Hz) signal. One of the key issues in this book is how to stop or focus ULF frequencies in the medical field. As a reminder, we discuss using frequencies for medical application, detection, and military defense purposes. A secondary feature of these technologies (all related to magnetics) is how to stop any RF signals from emitting from your cellphone or electronic devices; they all transmit RF signals signature recognition codes. It is possible to stop almost any RF signal by disturbing its magnetic wave. So, that means setting up a disruption wall or RF interference anti-signals, a counter magnetic wave to stop unwanted magnetic devices.

This Disruption wave can stop video & high-power cameras, RF, and Infrared. This is one of the devices I have built and am working on; it is very small and fits in the average pocket, or pants, and takes very little power (AA). This device has many features and can be turned On/Off with a flip of a switch. It can make you anonymous and stealthy, even better than a Faraday bag. In fact, vision can be skewed as hiding a person. There are many low-cost electronics to even make just about anything you want.

JUMP CODE #70

“Temporary Conclusion, I think”

Without going into a long dissertation, I will make this short and sweet. So in conclusion we are talking about a new type of magnetic Earth wave, and other new technologies, for many different applications and for almost all technologies and products.

JUMP CODE #71

“Synopsis, of the seismic waves scattered”, Go to the Website

I present observations on a new precursory phase of seismic waves scattered in the deep Earth. This phase arrives before the PKPab wave at epicentral distances larger than 155°, and we call it the PKPab precursor. We show that the presence of the PKPab precursor is a necessary consequence of scattering in D", which is the commonly accepted cause of the PKPdf precursor at distances smaller than 145°. PKPdf waves that propagate through the inner core should arrive before the PKPab precursor but those, are strongly attenuated in the inner core at frequencies between 4 Hz and 8 Hz used here, making the PKPab precursor the earliest teleseismic signal at distances larger than 155°. The calculated PKPab precursor sensitivity kernel shows that this phase is mostly sensitive to scattering along the closest PKPbc path between the source and

receiver. It can help to constrain the lateral distribution of heterogeneity along with D". See at [gfzpublic](#) link.

Additional Info:

<https://ui.adsabs.harvard.edu/abs/2001SPIE.4317..469B/abstract>

Humans have a natural vibration/hum, is this caused by electromagnetic? And also from the Earth, where a person lives can be good or bad health/ all are yes, so many different factors affect us, and the weather is one of the big ones. The magnetic frequencies near and in the Earth affect the tectonic plates shifting, and that means if we see an underwater shift of the tectonic plates shifting, that also means bad weather, and people will be affected, or die, especially animals. Animals can sense these electromagnetic frequencies and in some cases the shifting Earth and plates. The locations of masses of people can also affect these weather factors, fires do affect the Earth and Humans/Animals/Plants, but this is not good. Wars also is a big factor in changing the Earth. Atomic Bomb testing should stop, and even small bombs should stop. Certain people are killing the Earth and all Animals not to say, Humans. This all goes along with the basic subject matter “Frequencies Magnetics”, and all of my writing in this paper relates to what I reference in my second paragraph, of course, many things.

JUMP CODE #72

“The James Web Telescope”

As an investor, Let us assume there is an Aether, then we need to open it up for space travel and much faster, “make a hole (or Open a Tunnel in the magnetic field in space) in the door” Make a channel, crack it open, this is possible with explosive devices and /or other magnetics energies, or the Disturbance Theories (bodies in motion). This is all entirely possible, Study the Atomic Bomb in detail photos and missiles, it is possible to see particles changing colors and shape and being moved.” And Jesus also opened many doors, physically and Mentally, “Don’t discount these facts, “When they get the movement of the stars, each cell”, [James Webb](#) Telescope Amazing Data, what this means when they see behind each start in individual, the rotation will always be in motions, indicating All starts are waves or particles, “pieces of the Cosmos” “The GLUE”, and not a Solid. The rotating barrel actually (one side) picks up the magnetic energy field and drags it along till it gets to the other side which is normally 180 degrees from where it started (standing). So what this means is what you see on the other side of the object if it’s rotating, because all objects in motion gather the magnetic fields so you can actually somewhat see through any objects. In simple terms, this means looking through solid objects that are in motion and allowing a magnetic field to be propelled to other locations. This is a difficult concept to understand but is vitally important in the detection and magnetics focus beams that are used in many different industries. See the URL link for reference: “Oh yes magnetic fields also REFLECT energies, and you can also get a bounce back.

https://www.google.com/search?q=james+webb+telescope&rlz=1C1GCEA_enUS984US984&oq=James+web+&aqs=chrome..69i57j0i10i433l3j0i10i13l433j0i10i457j0i10j0i10i433j0i10i13l433j0i10i433.7112j0j15&sourceid=chrome&ie=UTF-8

“Ether or Aether, in physics and astronomy, a hypothetical medium for transmitting light and heat (radiation), filling all unoccupied space; it is also called luminiferous aether. ... [Eather](#) was held to be invisible, without odor, and of such a nature that it did not interfere with the motions of bodies through space”.

https://www.google.com/search?q=eather+space&rlz=1C1GCEA_enUS984US984&oq=eather+space&aqs=chrome..69i57j0i10i17j0i10i22i30j0i390.10363j0j15&sourceid=chrome&ie=UTF-8

JUMP CODE #73

“The Hypothesis and Supposition of the following”

“The Bottom line”, “Frequencies”, “*The Human EYE*”

“Where and Now to Apply the Magnetic-Focus-Beam Mechanically to the correct position in the Eye to dissolve the bad Drusen, a tricky procedure”

This hypothesis and supposition of luminiferous, “a hypothetical medium for transmitting light and heat (radiation)” is more than just light, it is also an unseen force of energy, and this may be

part of the glue that helps the Earth in its place (location) in the Universe. In fact (light, Water), it may also be the Creator of the Earth and Space and everything we can comprehend. Of course, God is the Creator (Jesus) of this unseen force of energy, but He uses all four (4) elements, and a few others not yet known. "Did anyone think that the tower of BABION was close to heaven and that means the technology was very great, or the heavens were close to the Earth".

The magnetic focus beam machine: A complex machine, but using AI easy to use

So we have a machine that can send a *magnetic focus beam* into the Human Body magnetically, and that also means the aether(particles in the atmosphere) has to be included in the equations for acquiring the correct frequencies (in a Database)that will change organisms in the Human body, at a Sub-Nano-Level. In this case, we are discussing how to use this *magnetic focus beam* to restore the Human Eye. To restore the human Eye, and because the aether may change the trajectory of the *magnetic focus beam*, that means the magnetic entry point to a target (diseased area) will not be correct, out of tune frequencies, and the location coordinates are bad. Please remember *magnetic focus beam is on an X, Y, Z // frequency/color/depth path. Once more we want to remove the Yellow Pigmentation on the Macula*, a very important point to remember, and more than one magnetic focus beam may be needed to alter a big target area. Can this be done, in partial studies that have been done proving magnetic fields affect target areas in the brain, so this is real technology, scientists, researchers, and doctors know this. So 3D printers are in their infancy, but with the right magnetic focus beams and equipment to move the beams to the right location, it is very possible to see this in the near future, which far exceeds any risk to humans of embedded Neural-links implants that may cause infections or destroy blood vessels in the Brain, that may destroy part of the brain (body) and cause death. Embedding any type of foreign object (even chemicals) into the Eye (body) is a great risk, and the long-term effects always exist. "I think it is possible to see the back of the Eye edges".

“A little off the subjects of the Eye”

(sjcs+) So can a **Horse Race** be fixed with magnetic pulses? Yes, just send a magnetic pulse to the horse's front leg muscles, and it slows down the horse, this is an easy fix (deception), and no one knows, and there is no trace because it is just a temporary adjustment of the muscle. And no one can see you do it, all that is needed is a small Radar Detector type of device in your pocket, you need to focus on the horse's leg front muscle. Of course, this is just a supposition, please never do this, but it demonstrates what a magnetic pulse can do to any muscle in the Human/Animal body. **Of course, this could be utilized in the Human body for controlling muscles**, Muscle spasms are involuntary contractions. **(sjcs+/-)**
This paragraph is not in the **BRIEF CONTENTS 18** page.

These details above are too much for this book/paper, but I do have the right frequencies and “magnetic focus beam technology”, and that is the main thing, without a “magnetic focus beam” it may not be possible to use magnetic fields methods for the “EYE” operation, pinpoint

accuracy is mandatory, imperative. Using lights like LEDs (other lights and fields) is a shot in the dark (no pun intended), (wrong thinking) going through the front of the Eye, diffraction, and Eye noise are pervasive and transmissions of the Eye are always in motions, the Eye has to be still, almost perfectly, flawlessly, (anesthetics of the Eye) and the fields are way off and too wide (wrong geometry of the lights) they just don't have the correct techniques and frequencies (of the magnetic focus beam). And the light method techniques and frequencies may be doing more harm than good, in the long run. The REM movement is not an easy task to overcome. Once more this is a complex method and the details and Mathematics Geometry are too much for this book, and the equipment that is needed. We have another book that covers, Mathematics/Geometry. "This is a method to look in the back of the eye and all layers of the eye", *Magnetic Cloud Slicing* it into thin pieces for viewing and operations".

"Preparation is in the Details, *This is a Mandatory Procedure for the team*"

"For the whole surgical Team, All have to follow these guidelines"

Just about any type of light produces "Gas" of dome type, and when working on the critical parts of the Human Eye, the room has to be free from gases; *Special light-emitting (LEDs)* and the surgery almost need to be in a Clean Room, like for manufacturing IC. The doctors and assistants have to have shoes covering. Once perfected, this operation room should be fixed for all EYE operations, A lot of preparation to do this Complex EYE procedure (but it should go very fast), and a lot of setups are high-cost and time-consuming. A longer procedure may take longer if drugs need to be re-directed for blood flow, this type of technology can do that, from a different direction, and for sure a frontal approach straight into the EYE, from the side is possible. All particles (Nano) keep out of the EYE and the Lab coats/ tools have to be in place, This is also a high cost, but well worth it in the long run, and these methods can be used for preventative medicine before the EYE gets too bad, a lesser, less costly cost. AMD can be recovered, moved, and cleaned up, of course, in a few different ways with the New "Magnetic Focus Beam Method, which requires precision technique sequences.

JUMP CODE #74

"Magnetic Focus Beam Methods, for Space & Earth's Salvation"

I also give a reference to this New "Magnetic Focus Beam Method" in some of my other books. Frequencies and Equations are extremely complex, (based on the above "hypothesis and supposition of luminiferous"), and certain motion lights do have effects on all parts of the Human body, as Sounds, Shapes, Colors, and vibration do. So this is all included in the Equations, of course, *aether*. *The applications of these "hypotheses and supposition of luminiferous"*, can be used for many things, not only in the Human Body, but especially for Space travel, and the ***Earth's salvation***, like changing the weather, amazing applications at our fingertips. I have been working on these Frequencies and Equations I need to get them working and a lot of testing needs to be proven, but if the governments of the Earth are doing this (changing weather), it has to be STOPPED it is being utilized for evil purposes.

JUMP CODE #75

“The Great Florida Disaster, Why It Happens, and Is It Coming Again”?

”Money and Time”, as a brief side note: concerning parts of the world that have great disasters like floods and high winds, it is a matter also of the Weight of the continents and tectonic plates in the ocean/seas, and that includes the brass above the Earth and the iron below the Earth (Det:26), and that also includes the amount of weight where masses of people are and their properties with them and the actual shift if the Earth and the rotation of the Earth (a big equation). For example, the US-Mexico border with the shift of people may affect the weather in Florida, or other states, not only causing an economic upheaval but weight to mass in the upper atmosphere and the masses of the Earth (the ground surface and middle atmosphere weights above the surface, from a foot to 2-3 miles. Also, the placement of satellites and Junk around the Earth has a large effect on radiation and this is also a cancer that kills not only people but crops, and animals. All of the above especially the weights changing in the Earth, and above the Earth Heats the total Earth, and that in itself will cause a HEAT DIFFERENTIAL that causes hurricanes tornadoes, and underwater eruptions. Take Florida for instance: the shift of many people coming into the state, and the magnetic interference they all caused, may have changed the balance in that part of the US, thus causing the biggest hurricane in history, and certain types of people makeup also contributed to this weight problem.

That means one group of ethnic people may actually weigh less and this too is a factor in the atmosphere and plates moving in the shorelines. We also have to take into consideration the physical motions of people and cars, and a big factor is the electric cars with their heavy batteries. An in-depth study has to be done concerning the cars and motions of people. Many factors may take effect and the building and removal of big buildings being put up, not including the deforestation of the land, cutting down trees, this is not good, too many density populations in one area is not good, they need to be spread out. One of the most damaging problems is the 5G communication disturbing the magnetic magnets (electromagnets) in the atmosphere, and this is truly a problem with magnetic motions of particles in the Air but also tends to keep up-setting the balance of where many people are staying in one location and also the accumulation of cell phones in groups, that changes the magnetic motions particles above the Earth.

And this paper has not even addressed the waste, garbage, and disposal of waste. The redistribution of cities and people may be needed. The weight of cities on the shorelines all caused a shift in the tectonic plates in and above the Earth. So scientists have not looked at all of these factors, and certainly not the government. And I think if a good study is done these events (*disasters*) *will correlate with time*, which will allow scientists to predict when these events will happen, down to the hour, if done right, that data is there in rocks, sediment, plates, and the atmosphere, of course, amounts of people dating back to the 16 century or more, it is all there for the taking. It would save a lot of lives and land, as well as the seas, fish, animals, and everything else. Oh yes, I didn't forget about the electrical grid, this is a problem of placement and the magnetic flow of CANCER in them, causing many magnetic pulses not to mention chemical poisons.

In my opinion, this can be changed easily by changing and moving the location of people, technologies, hard assets, and a redistribution of wealth, with no exceptions, over a matter of time accomplished slowly, of course very very controversial, and the green New deal has nothing to do with this and is absolutely not the answer, nor climate change theories with AI that are wrong, but these solutions will change the Earth and Cosmos atmosphere environment, back to where it should be.

And I also believe that a Differential between the Earth's surface, a shift in planets/ celeste bodies in space plus the ocean depth plates may have caused the Florida Disasters and set a pattern of destruction up through the eastern coast of America affecting the river, and that means bodies of water in its path and ground iron in addition to other properties would affect these paths. So these differentials would cause an enormous change in heat and pressure thereby creating an eruption causing a hurricane. These differentials not only cause a physical movement, but also a magnetic change in the Earth's groundwater properties (this is not good), and in the long term atmosphere results (space, and satellites) “the Earth was moved, along with people and the health of people” So basically the Earth under the surface was changed, and that an important assumption that also affects the weather, and the total environment (Oxygen, Trees, Crops). One of my goals is to point out where these hurricanes, tornadoes, and typhoons, come from, of course, most logical reports try to explain the pressures and heat, and different weather models, this is great but where do they really come from?

So many factors are responsible for the weather, and one that is overlooked is the magnetic disturbances and disruptions. Of course, these magnetic disruptions can be logged and mapped, and the best news of all is used to forecast weather in the future. Also, these magnetic disturbances have patterns, which are very important because they can show the paths of the next weather disasters and even minor storms. If data analysis is gathered correctly, mudslides and other anomalies (irregularities of the Earth's properties) can be determined. I believe that an equation for the future paths can be developed by using the magnetic signature in the world and water as the magnetic signature starts to point in certain directions, I'm working on this equation, and the rise and fall of the magnetic signature should display these analog/digital pulses. Possibly it is coming in less than five (5) years.

JUMP CODE #76 “ 76 Trombones”

“More on the procedure of AMD drusen, and the cleanup”

“The Surgical team has to follow the Strict Guidelines to use a Focus Beam Device”

(Preparation is in the Details, *This is Mandatory*)

Just about any type of light produces a type of gas, and when working on the critical parts of the Human Eye, the room has to be free from gases special lights (LEDs) are needed and the operation needs to be conducted in a clean room, like for manufacturing IC. The doctors and assistants also have to have shoes covering. Once perfected, this operational room should be fixed for all eye operations. A lot of preparation to do this complex eye procedure but the

operation should go very fast; a lot of setups are high-cost and time-consuming procedures. A longer procedure may take lengthy if drugs need to be re-directed for blood flow, and this type of technology can do that, from a different direction. For a frontal approach straight into the eye, this may take longer but is also possible. All particles (Nano) are kept out of the eye and the Lab coats and tools have to be clean. This is also a high cost but well worth it in the long run and these methods can be used for preventative medicine before the eye gets too bad and less costly. So, AMD drusen can be moved and cleaned up in a few different ways with the new Magnetic Focus Beam method, but requires precision technique sequences.

I also give a reference to this New Magnetic Focus Beam method in some of my other books. Frequencies and Equations are extremely complex, (based on the above hypothesis and supposition of luminiferous), and certain motion lights do have effects on all parts of the Human body, as Sounds, Shapes, Colors, and vibration do. So this is all included in the Equations, and of course, the aether. The applications of these "hypotheses and supposition of luminiferous", can be used for many things, not only in the Human Body, but especially for Space travel, and Earth's applications like changing the weather. These amazing technologies are at our fingertips. I have been working on these frequencies and equations for many years.

JUMP CODE #76-B

Q & A from NOAA

Note: Important, Data from NOAA, All pertinent to this paper

Don't do any of these listed ideas and procedures on Humans or living things, at this time this is just a supposition. And please don't discount this book when I talk about Jesus, you will miss a lot, and read it like a stand-alone JUMP CODE subject, an idea book. It's all about the Frequencies, Motions, and Equations of the Earth and Space.

Q & A from NOAA

These are Q&A from NOAA related to magnetic technology:

Someone with a JUMP THOUGH as me to put this in

Basic Q & A:

- [What is the Earth's magnetic field? WEB](#)
- [What is the Main Field? WEB](#)

- [What are magnetic elements?](#) A magnet is a material or object that produces a [magnetic field](#). This magnetic field is invisible but is responsible for the most notable property of a magnet: a force that pulls on other [ferromagnetic materials](#), such as [iron](#), [steel](#), [nickel](#), [cobalt](#), etc., and attracts or repels other magnets.
<https://en.wikipedia.org/wiki/Magnet>
- [Does the magnetic field change in different locations? WEB YES](#)
- [What is a magnetic pole? WEB](#)
- [Where are the magnetic poles? WEB](#)
- [What is the magnetic equator?](#) An imaginary line roughly parallel to the [geographical equator](#) and passing through those points where a magnetic needle has no dip.
- [How do I calculate the geomagnetic coordinates?](#) When outlining the coordinates of a location, the line of latitude is always given first followed by the line of longitude. Therefore, the coordinates of this location will be 10°N latitude and 70°W longitude. The line of latitude is read as 41 degrees (41°), 24 minutes (24'), and 12.2 seconds (12.2'') north.
- [Has the Earth's magnetic field changed significantly in the last several years?](#) Paleomagnetic records tell us Earth's magnetic poles have reversed 183 times in the last 83 million years, and at least several hundred times in the past 160 million years.
- [Is Earth's magnetic field going to reverse?](#) The reversal was dated approximately 15 million years ago. In August 2018, researchers reported a reversal lasting only 200 years. But a 2019 book estimated that the most recent reversal, 780,000 years ago, lasted 22,000 years.
- [How often does the magnetic field reverse?](#) These reversals are random with no apparent periodicity to their occurrence. They can happen as often as every 10 thousand years or so and as infrequently as every 50 million years or more. The last reversal was about 780,000 years ago Google
- [Will a reversal of the magnetic field affect animal behavior?](#) In the ocean, spiny lobsters, dolphins, and whales are known to use the geomagnetic field for directions. It is thus, possible that a reversal of the geomagnetic field affects the migratory behavior of some animals. YES

- What are some other uses of geomagnetic measurements? A wide range of examples of the application of [magnetic measurements](#) to environmental studies illustrates the advantages of magnetic techniques over conventional methods. Magnetic measurements, in both the field and the laboratory, are particularly useful for reconnaissance work because of their speed and flexibility, Quantification, as well as simple diagnosis of the transformation and movement of magnetic minerals within and between the atmosphere, lithosphere, and hydrosphere, which is practical. Techniques of investigating intrinsic and mineral magnetic properties, in addition to Paleomagnetic remanence, are described in subjects as diverse as meteorology, hydrology, sedimentology, geophysics, and ecology.

Geomagnetic Model Questions:

- [What are magnetic models and why do we need them?](#) The World [Magnetic Model](#) is the standard model used by the U.S. Department of Defense, the U.K. Ministry of Defense, the North Atlantic Treaty Organization (NATO), and the International Hydrographic Organization (IHO), for navigation, attitude, and heading reference systems using the geomagnetic field.
- [How often are new models developed? 3 Years Google](#)
- [What is the actual model range if the decimal year range is between 2020.0 and 2025.0? WEB NOAA](#)
- [Where do I get the old WMM coefficients? WEB](#)
<https://www.ngdc.noaa.gov/geomag/WMM/wmmformat.shtml>
- [NOAA](#)
- [What is the difference between IGRF and WMM models? WEB has too much info for this book.](#) See the difference [here](#)
- [There seem to be many models listed here, WMM, IGRF, EMM, US Historic, etc. What are the differences between them?](#) Magnetic declination is the angle between magnetic north (the direction the north end of a compass needle points) and true north. The declination is positive when the magnetic north is east of the true north. Magnetic inclination is the angle made by a compass needle when the compass is held in a vertical orientation.

- [Why do some of the geomagnetic models \(e.g. WMM, IGRF\) carry a valid time range and some \(e.g. EMAG, MF6, NGDC720\) do not? Movement of the fields](#)
- [Is it possible to calculate declination for dates before 1900 outside of the United States? As of 2022 not sure, hard to find the data need to make my equipment](#)
- [How accurate are the magnetic field models? What is the error of the declination estimates on the online calculators and models? The baseline of the Cosmos and its Planets must be considered](#)
- [Do your models include magnetic fields from power lines or other manmade sources? Yes some are listed](#)
- [Is there a simple formula or lookup table to calculate the declination of the magnetic field? I'm working on this, simple is an understatement it HARD](#)
- [Is there a MATLAB wrapper file for the World Magnetic Model or IGRF? Not used](#)
- [Does your agency still publish the hard copy magnetic declination charts? N/A](#)

Compass Questions:

- [Does the compass needle point toward the magnetic pole? N/A?](#)
- [What happens to my compass at the magnetic pole? N/A Strong](#)
- [What happens to my compass in the southern hemisphere? Strong into space](#)
- [How do I correct my compass bearing to true bearing? WEB](#)
- [What influences the magnetic field measured by my compass? Disturbance in the Aether, I have designed equipment to do this, of course complicated, a very small differential between any two or more bodies can make a disturbance greater than an Atomic Bomb](#)

Geomagnetic Calculator Questions:

- [How is altitude defined in the geomagnetic calculators and software? Is it above mean sea level or WGS84 ellipsoid? Below and Above, Space](#)
- [What is a decimal year and how do I convert the date to a decimal year? WEB](#)
- [Does the latitude/longitude input require geodetic coordinates or geocentric coordinates? Yes for operations on Humans and Animals](#)
- [How do I access your calculators programmatically for my mobile app?](#)
- [Are there any limits to programmatic access on the calculators? No, Hard](#)

- [I do not use C, so how do I calculate magnetic declination for my application C++ Python, Hand calculation in a different programming language? Python Machine code](#)
- [Do you have software for calculating the magnetic field or declination at multiple points? Yes Not listed here](#)

Legal Questions and Technical Data:

- [May I include an image from your webpage in my publication? Coming](#)
- [Are the magnetic models or software copyrighted? Yes](#)
- [William Birchard All code Python Machine Code C++ ©](#)
- [Mostly done in Python, Private, Confidential, Copy Righted, Trade Secret](#)
- [Micro Controllers Private, Confidential, Copy Righted, Trade Secret](#)
- [Books not on the WEB for any Code, Source, machine, pseudo code](#)
- [All mathematical calculations Not on the WEB © William Birchard 1984](#)
- [Almost all drawings not included in this book or other books](#)
- [All hardware boards not described in this book and electronics](#)
- [Almost all components are from the US and a few other countries. OTS](#)
- [Case harden if possible Faraday Cage, special protection](#)

I tried to cite all references in my book/paper, mostly the websites, but I may need more. It is Hard to write when you too much info for this book/paper. Other books/papers are needed to comprehend everything in this book/paper. As I stated school shootings are also at the top of my list. The Eye concerning Macular Degeneration (AMD), so the eye is very important! We have to fix the blindness, NOW! And for the Astronauts, if not no long-range space travel is feasible, my thinking.(bjc)

JUMP CODE #77

“Caterpillar Under-Water Drive No-Noise Propulsion”

(Underwater Submarine Propulsion) & It may seem ODD written, but not A little off-track, but it is related to magnetics as a method to use for Submarine Magnetic Propulsion "Silent running"

Firstly not all frequencies are linear and alike, and this is an important point when it comes to Submarine Propulsion. Frequencies play a significant role in the design and operation of submarine propulsion systems, especially in achieving silent operation. Here's how frequencies are integrated into the design process. If the back of the Submarine were made in a concave

design like hiding the propeller it would not make much noise. “Why is a Russian sub in Cuba waters, and why did Bi... give away U.S. Subs to Aus....? This is not good at all!!

Reducing Cavitation’s Noise:

Cavitation occurs when the pressure of the water drops below its vapor pressure, leading to the formation and subsequent collapse of vapor bubbles. This phenomenon can create significant noise, which can be detected by sonar systems. But heating the water to the propeller, and using 5 feed tubes of hot water to prevent cavitation or *differential pressure*.

Engineers design propeller blades and pump-jet systems to operate at frequencies that minimize cavitation. By optimizing the design and controlling the rotation speed, submarines can reduce cavitation noise levels, but they go slower and still have a signature. *Fig 2.303*

Avoiding Resonance Frequencies:

Submarine structures and propulsion components are susceptible to resonance, where vibrations can amplify due to natural frequencies matching external excitation frequencies. Engineers conduct extensive frequency analysis to identify and avoid resonance frequencies in the design of propulsion systems. This involves structural simulations and vibration testing to ensure that components operate within safe frequency ranges.

Mitigating Propeller Whirling:

Propeller whirling occurs when the blades of a rotating propeller induce a periodic lateral force on the shaft, resulting in shaft vibrations. These vibrations can generate acoustic signatures that may compromise stealth. Yes, this may be true, but what about using Jet Propulsion inside of the Submarine and using the caterpillar I have designed in the diagram below, figure 1029?

Propulsion systems are designed to operate at frequencies that minimize propeller whirling effects. Additionally, advanced materials and damping mechanisms are employed to reduce vibrations and noise. Referring to the NASA tech brief new materials are developed each day. "Flying Subs are coming"

Optimizing Electric Motor Frequencies:

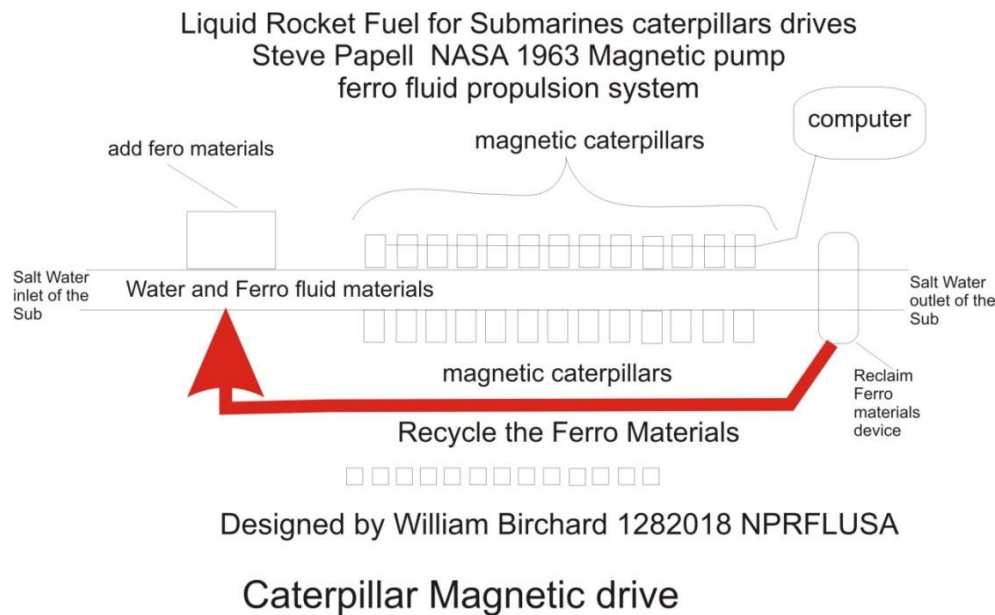

Electric propulsion systems rely on motors to drive the submarine. The frequencies at which these motors operate can impact acoustic signatures. Engineers optimize the design and control algorithms of electric motors to minimize electromagnetic interference and associated noise. This involves selecting appropriate switching frequencies and modulation techniques to reduce audible emissions. That is utilizing special frequencies to run the electrical motors; this is a new way to reduce the noise vibration transferred, by the shaft to the propeller. “There is very little noise in a magnetic-powered sub”

Utilizing Acoustic Cloaking Technologies:

Some advanced propulsion concepts explore the use of acoustic cloaking technologies, which aim to manipulate frequencies to render submarines acoustically invisible. By altering the acoustic signature of the submarine through frequency modulation and phase cancellation techniques, these technologies can enhance stealth capabilities in underwater environments.

In designing submarine propulsion systems for silent operation, careful consideration of the frequencies is essential. By minimizing cavitation noise, avoiding resonance frequencies, mitigating propeller whirling effects, (or using a two-blade design) optimizing electric motor frequencies, and exploring innovative acoustic cloaking technologies, engineers can develop propulsion systems that operate stealthily underwater. Effective management of frequencies plays a crucial role in enhancing the stealth capabilities of submarines, ensuring their effectiveness in strategic missions and defense operations. Putting the propeller deep in a tube, or tunnel may also help the design, and what about putting the propellers in the front of the submarine in a long tube underneath the main hull? The octopus pulls in water and then pushes it out as it moves along the sea. “Pull the Sub, not push it”

See Figure 1029 below, related to the caterpillar water type of drive called the Liquid Rocket Fuel gives it propulsion to the submarines. This basically uses magnetic water to propel the Submarine. This also could be controlled by a type of magnetic frequencies, and in the fact that all matter is made of frequencies. Of course, why doesn't NASA use a frequency magnetic pump?

*Fig 1029: Caterpillar magnetic drive **I have a lot more info in paper #43*

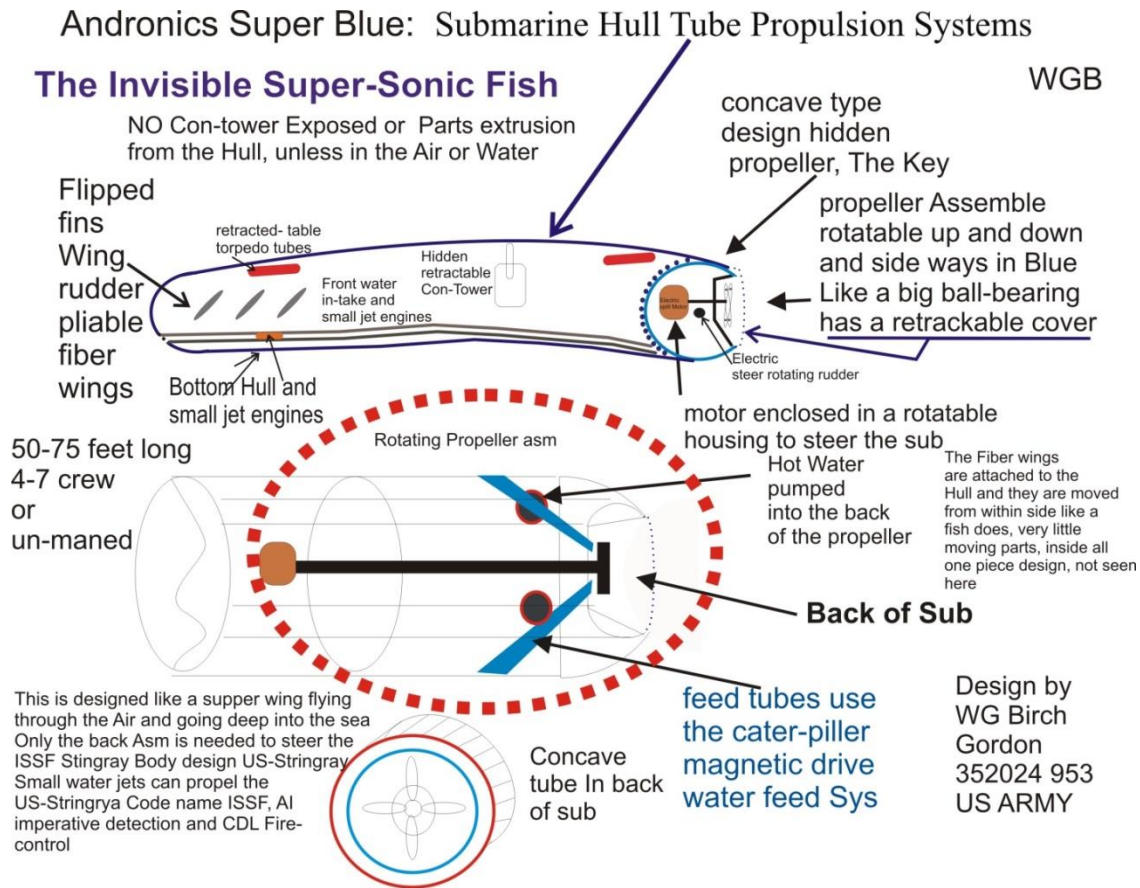

Fig 2.303 I found a number

In designing submarine propulsion systems for silent operation, careful consideration of frequencies is essential. By minimizing cavitation noise, avoiding resonance frequencies, mitigating propeller whirling effects, optimizing electric motor frequencies, and exploring innovative acoustic cloaking technologies, engineers can develop propulsion systems that operate stealthily underwater. Effective management of frequencies plays a crucial role in enhancing the stealth capabilities of submarines, ensuring their effectiveness in strategic missions and defense operations.

See Figure 2.303, on the caterpillar water type of drive called "Liquid Rocket Fuel" This basically uses water to propel boats and subs. This also could be controlled by frequencies, in the fact that all matter is frequencies. Of course, why doesn't NASA use a frequency magnetic pump? "Don't use pumps, use turbo water power jet engines". Also, use a skewer wave on the outside of the tip and read the sub and the sonar will not see the reading sub or skewer wave, which blurs the read location of the sub, use thus making it seem like the water around the sub of like a ripple effect. And that means it is hard to get a real fix on the sub's location.

JUMP CODE #78

“THE ATOMIC BOMB BRAIN JUMP”

“Differential Quantum Electromagnetic Radiation Energies Technology”

Drones are most of the time very small and have electric motors and batteries in them, a lot of plastic that is hard to detect, and also fly low. The way to detect these drones is how they disturb the Magnetic Atmosphere (the Magnetic Rotational Barrel III We have made is the best way), that is the least expensive and best way, also because any type of Drones, Missiles, Jets, Aircrafts, bullets sent through the Aether/Earth and moves these sub-atomic particles in the Aether/Earth and these sub-atomic particles some times do not have to be magnetic, they can be non-ferrous.

And all the sub-atomic particles are in motion all the time in the atmosphere. Drone motors and parts of the drone transmit magnetic waves and have certain frequencies along with their battery, and all of these parts can be detected from a far distance if the right frequencies were known, then they could be guided down, also their data memory could be destroyed and wiped in mid-air if they are very close a high power magnetic-water jet stream could be used to take them down, A point that is missed is a normal small drone can carry only so much weight, Attack from the Top of the Drone “It is possible to draw them down with magnetic beams. A magnetic bullet as described earlier could also be used to disable them, water capsule magnetic is a possibility. Also, know that most drones (small ones) have four (4) motors and if just one DC motor is stopped the drone will crash to the ground, larger drones can also be taken down the same way. A novel idea shoot a bunch of magnetic beads into them.

As a side note: they could be powered by a low-power magnetic focused beam, listed in the IMP PMM #1 paper.

So in some cases, a focus power beam could power and guide them to a target. As a side note: The right magnetic beam pointed toward any drone can slow down the motors, and it can be guided down slowly to the Earth. A 3-barrel Drone Locator can be attached to a drone and used for long-range detection, and how the CIA, FBI, NSA, and other agencies can detect uranium is beyond me, this would be very hard to do unless you got very close, it would also take a lot of equipment, using a smaller drone to find almost anything at a high altitude. Also normally the target material has to be in motion if the drone is in still mode; an infrared camera is needed in most cases, a heat-seeking device. A 3-barrel rotating device is used to spy and detect many different things; it works as a differential discriminator of particles in the atmosphere, moving or stationary objects, not yet invented by NASA or DARPA. How this works is a confidential secret within ASB. The 3-barrel can look deep into the Earth and reveal soil and Earth properties. Once more confidential, this is a passive unit. More info on the IMP PMM #1, 43 papers. So in some cases, a focus power beam could power and guide them to a target. As a side note: The right magnetic beam pointed toward any drone can slow down the motors, and it can be guided down slowly to the Earth. A 3-barrel Drone Locator can be attached to a drone and used for long-range detection, and how the CIA, FBI, NSA, and other agencies can detect uranium is beyond me, this would be very hard to do unless you got very close, it would also take a lot of equipment, using a smaller drone to find almost

Make No mistake, ***Electromagnetic Energies (Technologies) in the Earth's atmosphere and Deep in the Earth*** possess more power and energy than all of the world,(even more than Nuclear, 2025); these technologies are more effective and overwhelming and have the extreme capabilities of utilizing disruptive forces to collective control blocks of magnetic energy (particles block) in the atmosphere and even outer space, and this technology can move Hughes blocks of *Electromagnetic Energies that are invisible, and work as an impenetrable wall stopping all motions, that means things like Drones, F-22 Raptor, or guided missiles and is like* sett up a real-Iron-magnetic dome, and this real-Iron-magnetic dome is a complete shield and stopped anything in the atmosphere/outer space, and some cases physically destroyed the intruder, "This is a real Iron Dome", I call it the **Earth's Magnetosphere Vault (EMV)**", this EMV will also help to protect the Earth's atmosphere from unwanted radiation. The EMV can also be used as long-range magnetic radar providing a very clear image of incoming aircraft or un-seen objects, much better than standard radar, *so how to break into Starlink? "A reduction of Stars ", Small MagNo-Borgs. Flying in configuration attaching to the Starlink cubes, and blocking them. (kfdl)*

Everything and all matter is from JESUS GOD, including all the Cosmos and stars, Thank JESUS you for living in America, the Greatest Country in the Cosmos, Earth, and for the MEGA people, 230 some years ~. And thank JESUS HE did it all.

ATOMIC BOMB

'Disarming the Atomic Bombs Nuclear Weapons'

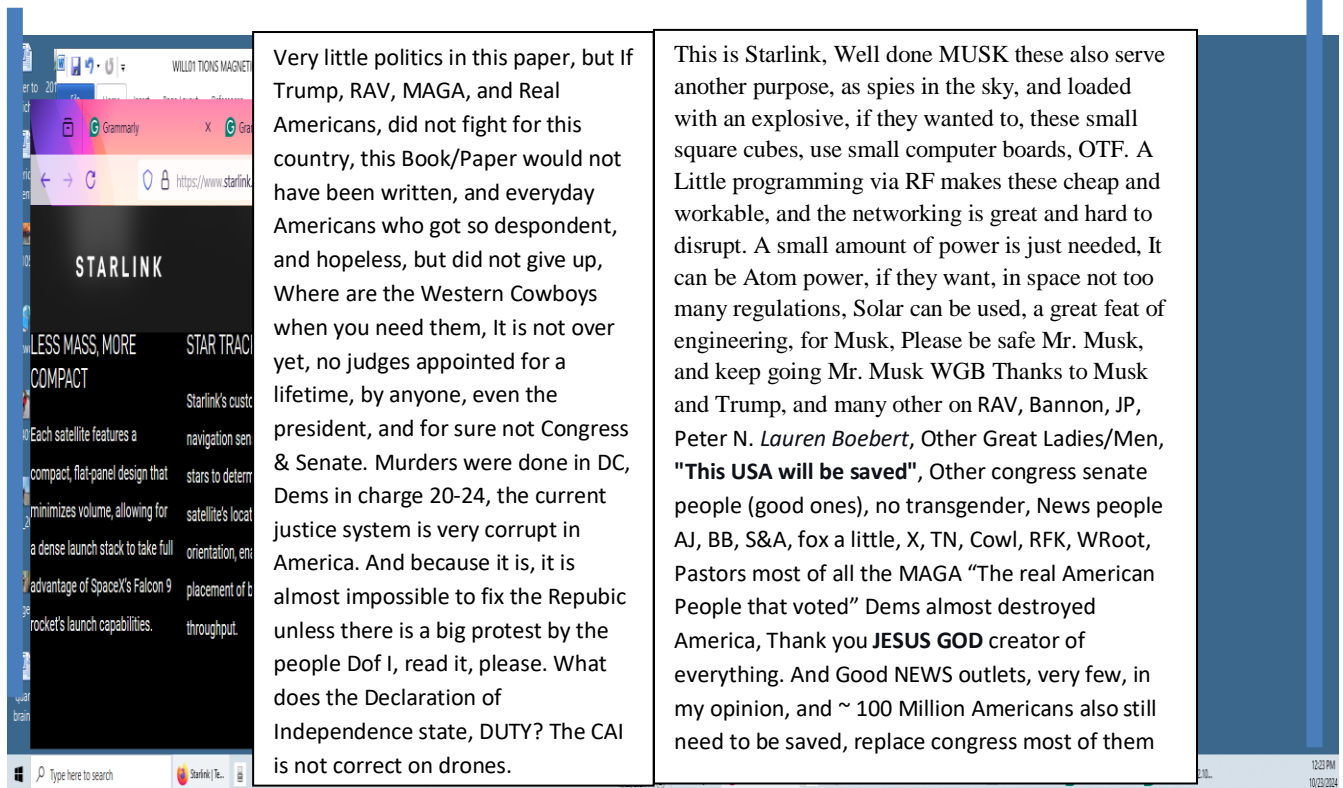

I have a lot more on the A-Bomb, H-Bomb, and how to obtain fusion, all you need is Heat and the right material/chemicals that will go into a Differential Diffusion stste, that means using 235 238 and of course 239. So using the right chemicals and to convert materials to frequencies is the secret of getting a Atomic Bomb made fast. So the model is to do one of two things,

- 1).Embedded a material like 235 238 239 or (a combination of minerals) into chemical-frequencies*
- 2).infuse other materials with the resonating frequencies of the target material*

"Of course more info needs to be added here, and TNT (sub), can be replaced by a chemical reaction/Freq.

"This is a very sensitive subject; I only have data in my IMP PMM Paper #63"

Personal opinion

<https://www.starlink.com/technology> Musk, a Great Man and intelligence way beyond

An example: The Electro Magnetic Voltage (EMV) creates a large dome of magnetic particles around the Earth, and it protects the whole Earth. This technology used in outer space or the Earth creates an invisible protection of atmospheric particles (Solid block of gases and oxygen combined), and this can also be used as a block of energies that also may be used to protect a certain area of particles over the Earth. "And Chase Hughes is not far behind, for sure, read his books and see YouTubes videos. The EMV Dome is only activated when a warning is close

"Earth's atmosphere is composed of about 78 percent nitrogen, 21 percent oxygen, 0.9 percent argon, and 0.1 percent other gases, with trace amounts of carbon dioxide, methane, water vapor, and neon are some of the other gases that make up the remaining 0.1 percent"<https://scied.ucar.edu/learning-zone/air-quality/whats-in-the-air>

This technology (on the negative side) has more potential and unlimited energy than any atomic bomb (nuclear Energy), chemical (germ) biological attack, or supersonic warfare (EMI) that could eradicate all mankind if used to eliminate all living things. It can change the structure of Pu 239 (235-uranium) and other bomb-making materials, rendering it useless. Flying over atomic bomb depots and disarming them, anywhere and even in flight especially from a satellite is possible, this means, nuclear weapons would never be used. What this technology is looking for are patterns of chemicals (isotopes), and if my theories hold, these patterns will show up as a differential set of particles (neutrons). They would be different than their surroundings, in a

nutshell (another way of detection), a differential of potentials (DofP) of perimeters. Everything in the Universe has to have a “the DIFFERENTIAL” , without this no movement.

On the positive side for the good of mankind, these new technologies can stop all atomic bombs, chemical attacks, and biological warfare, these new technologies change almost all matter to frequencies and the dimensions that matter, and this is also one way to disposal of nuclear waste. Of course, supersonic warfare (EMI), and also bacterial warfare, including electromagnetic data analog and digital transmissions are harmful. And these technologies new inventions of super frequency magnetic energies will be used for all space travel, because the speed of light is not a constant in the far universe, only in the nearby Cosmos (close planet), used as calculations. The speed of light changes per their location in space. And also this new type of power does not need oxygen, this in itself is amazing. Also as a benefit, it should detect longer far locations in outer space than we could imagine, or even conceive.

JUMP CODE JUMP CODE #79

“URANIUM”

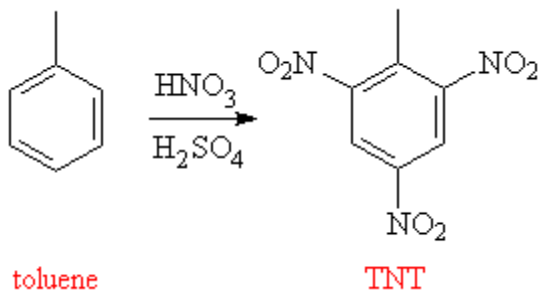

“How to make PU239 in less than 1 hour”

“A work in Progress, 93024 USA”

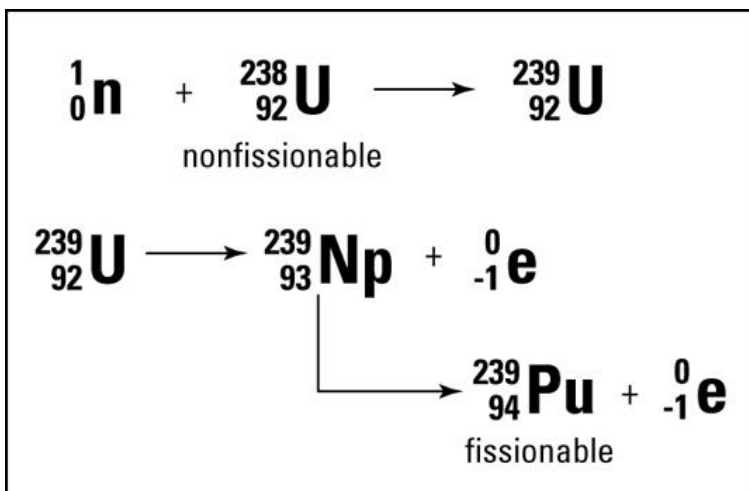

How to formulate PU239 in less than 1 hour: Chemical (#parMetal) > (free electrons lie 235) + Freq. 229 +214 + Heater Trigger chamber Yield >> Pu-239 *UranChem*(1-12) new Elements, Using a Fast barrel chamber and a headed charged particle of 250 ° Degrees in a, the particle is a super headed ChemElem and fired in a ceramic tube/ with magnetic rings wrapped around it to help the acceleration, but this wrap is not necessarily needed if the ChemElem is hot enough and at the correct frequency and speed, the exact equation is not in its completion in the preliminary equation. I will try and submit a paper on this later, but this also means any chemical or Elements can be re-developed, or its atoms can be rearranged, almost impossible, but in the right chamber and supercharged it is easily accomplished Glen S. Atomic Commission ~ 1934 closed docs library of Congress, hard to get access. There are other elements not yet found that can replace PU235-239. Some are not located yet but can be chemically heated using the above methods. Germany in 1930-38 had known of these, in the research, and comic book. So changing PU239 would stop Atom Bombs and this can be done from space. Stop the nuclear wars forever. And if PU235-239 frequencies are transformed the conversion from the Freq. of “*Plutonium-239 is an isotope of plutonium*”. Plutonium-239 is the primary fissile isotope used for the production of nuclear weapons, although uranium-235.., Wikipedia 2024” to a frequency then the frequency can be used to generate a magnetic field and this produces electric, not just heat. Imagine the uses of this technology, and how it can help save the Earth, of course, the Cosmos “A short intro, the Tip” ©WGB 2024. As stated *UranChem is an Element close to 239 is an isotope, and not listed here, for obvious reasons, but one of the most critical pieces of information is what the “Mix frequencies are of 235-239 frequencies, because when a focused rotating barrel receiver beam device locates these critical frequencies, it means the device has founded the 239 is an isotope of plutonium. This also means that a Focus magnetic beam can alter the 239 an isotope*

of plutonium, and make it useless, basically disarming it and changing its chemical structure (Electronics). The focused rotating barrel receiver/emitter beam device (long-range Detection and disarming) can also alter the explosives charges, "The Atomic Bomb Stuff" *kfdl*

"It is made by **combining toluene with a mixture of nitric acid and sulfuric acid**. 2,4,6-Trinitrotoluene is also known by other names such as sym-trinitrotoluene, TNT, and 1-methyl-2,4,6-trinitrobenzene. 2,4,6-Trinitrotoluene is produced in the United States only at military arsenals". ***, Some materials are confidential, "Not all Atomic Bombs need 239.."

All of these chemicals have individual Unique, frequencies, changing their function. Changing PU235 or U235 is plausible and can be done, but not the average frequency waves as thought of. This is a complex mixture of frequencies from a set of Crystals and in some cases have the resonated frequencies of U235. A German Scientist found that Oxygen was changed or the elements in or by **URANIUM** were changed, how he got to this deduction I'm not sure and the process of his thinking is not also clear. But in the summation, other elements can be split other than 235 and by chemicals + frequencies + heat. This means a chemical reaction in a small container and 235 and the right chemical could make a small device that could take out a city block it would be like a small 50-caliber explosion. This is why I invented an explosive detector AGU-900 and XE Detector; this is detailed in the IMP PMM paper #1, 43. "The scientists forget is PU235-239 are Frequencies"

The process to making a 239 Fissionable material, Other materials /elements are close to 238 and these also are Fissionable, and can be used in small reactors and small warheads, most of these materials are classified by AEC head, Glen Seaborg, to be very important data. Here where

scientists miss the boat, as they say, a non-high concentrate of 235 and its adjacent materials are Fissionable, and become that way when mixed correctly, a small grenade can take out 1-2 city blocks. Detecting PU39, 35, 38, Tritium Gas 4 grams (0.14 oz.) per warhead. “W54” warhead from a Drone, unless close very hard to do and take big equipment, if it is truly truthful. This is radioactive gas, and not good near people. I’m not sure it can go into a suitcase, not still hard to make and dangerous. **“I have a chemical diagram, too much for this paper”**

JUMP CODE #80

“Super Detector Complex Mixed Frequencies Device (SDCMFD)”

“How is this done, the mechanics of it?”

All of this new technology is built into the **Super Detector Complex Mixed Frequencies Device (CMFD)**, on the positive side *it can be used for great medical advancements*, but on the negative side, it can also be used as a destructive weapon, and Not for the good of mankind, but can stop the most advanced supersonic missiles at a far range. **(kfdl)**

See more details in book IMP PMM #1-2 (upcoming book), please sign up through the email listed in this book to get an update.” too many updates, don’t use them ” **(bjcai)**

My Thank You Note “An Intelligent Interlude”

Dear Esteemed Readers, who read a lot of science books NASA briefs, and other publications:

I am truly grateful for the time you've dedicated to reading my book. Your interest and engagement mean the world to me, and I wanted to take a moment to express my heartfelt appreciation.

Your support, feedback, and encouragement inspire me to continue exploring new ideas and sharing my thoughts through writing. It's through readers like you that the journey of knowledge and discovery becomes meaningful and fulfilling. As a token of my gratitude, I invite you to explore my other papers, where I delve into various topics with the same passion and dedication. I believe you'll find them equally enriching and thought-provoking. Thank you once again for being a part of this journey. Your readership is invaluable, and I look forward to sharing more insights with you in the future. This book/paper and all of the supporting papers are hard to read and understand, I did not do this on purpose, I'm just not a good writer, but I know my stuff and have ideas and inventions no one else has, and the Administrative from 2020-2024 almost broke the spirit of inventors, and did a lot of hard to inventors in the form of the USPTO that in many ways need to start over from 150 years back from 2025. Many inventors lost money and got

beaten down, and inventions were stolen by the Chinese, and more than the Chinese Big Tech companies, like Raytheon..many more stolen ideas also.

"The American Inventor has lost Heart and Drive, a shame", thanks to the Dems, and the man had knocked at the door, by the FBI and Sheriff.

"Why doesn't the new FBI cash and Pam (DOJ) do something about this"?

JUMP CODE #81

“More Applications of the WDER”

Of course, the E1 *Wave Detector Emitter/Receiver (WDER)* device also has many other applications, like for multi-medical use. Advanced Macular Degeneration (AMD) of the Eye using E1 (as I stated) can be applied to different parts of the Eye (the back and sides of the skull, (cranium) directed by a second and third *magnetic wave focus tunnel beam*), and this technology can also be used on animals with *no anesthesia* (using a *Cartesian coordinate* system, three-dimensional 3D printer as a guide). And this is all available in 2025 (now). One of the main things is to realign cells in the human blood (one application), restore the structure of the cells, and of course increase *blood flow (and/or add (direct) certain drugs so it flows to the target area)*. A key point in using a “wave detector (short name for **WDER**) device” is the frequencies (Ultra Low-Frequencies, ULF pulses frequency/waves) of a very low magnitude wave (low energies) that can reach just about any part of an internal cell and if a *pinpoint focused tunnel beam* is used it can either eliminate a bad cell (pathogen) or in some cases remove the infected cells and replace them with new cells from another part of the body, removing the yellow cover (in-between two layers in the retina) over the Macular, it is possible. Another aspect of this technology/method/technique is not to affect or destroy any cells (organs) as the magnetic focused tunnel beam goes (travels) to the targeted area (cells), very important to take this into account. The frequencies of all the cells (tissue) in the path of the magnetic tunnel beam have to be known, a very difficult task, but can be overcome, and in some cases, the chemistry has to be also known. Of course, this data is the tip of the spear (just an overview); I have three (3) other papers/books that go into detail. The adjacent areas of the infected cells or cancerous cells can help to detect the cancerous cells, this too is critical as the spread of cancer may be pervasive and leaves a path (signature) where and how the cancer is moving and gives a directional location.

Inter-cellular Tracking. *As a minor summation, all differentials have a motion non-magnetic draw, that is $E = mc^2$* (mass and energy are interchangeable, but take different forms), (Mixed frequencies).

The equations $E = h\nu$ (μ) and $E = mc^2$ may be solving for two different energies. $E = h\nu$ refers to the energy of a photon concerning Planck's **frequency**.

$E=mc^2$ uses the mass of an object and the speed of light, $E = hv$ or better seen on the computer as hf (Planck's equation) shows that if the frequency of a wave (light) increases, the amount of energy it has also increases. Through data and calculation, Planck found the relationship to be by a factor of h , $6.626 \times 10^{-34} \text{ J}\cdot\text{s}$. Through this, we can find the energy of all waves, including electrons, which lead to orbitals and energy states in chemical bonding. $E = mc^2$ states that all mass has energy by a factor of the speed of light squared, and all energy has a mass. Energy is $\text{kg} \cdot (\text{m/s})^2$, thus energy is the mass times speed squared of an object. To my understanding, this is the maximum energy a mass can be converted to, and since no mass can achieve speeds beyond the speed of light, that is the maximum energy a given mass can have.

JUMP CODE #82

“Pass-Through Frequencies Switches for RF, RJ45 cable connections”

“The next paragraph is very important”

A significant fact is, that all parts of the body have certain frequencies associated with them, and this is where the problem lies (literally), sending frequencies through different parts (organs, body) to affect a particular targeted organ/body part/blood, or deliver medicines using blood or electrical-chemical pluses are guided by frequencies that can become very dangerous and this procedure is hazardous. Take for example a research doctor who wants to reach the back of the eye, and effectively set up a tunnel, the frequency used, and other factors would have to be taken into account, almost every organ and body part, and would have to be identified as the frequencies pass through them, this is as I said very hard to do, but can be done. In some cases, different types of frequencies at certain energy levels may work, but this is still dangerous.

The “numerous mixed *frequencies occurrences*”

So the *focused tunnel beam device* opens up a magnetic tunnel so chemicals and other drugs can get into the back of the Eye (Macula), in this case, and apply the correct drugs/chemicals, “The magnetic wave focused tunnel beam opens up the frequencies (locked frequencies) and this is like opening a location (hole, aperture), (*un-locking*) in the back of the Eye and this application can be used for other parts of the body, so the *Macular* can be approached from different directions, as with any part of the body (also including animals). This also means that medicine may have to be converted to frequencies to ride as a carried-on electronics plus, this is a type of modulation. (**bjcfb's**), Much more data is needed for this procedure.

JUMP CODE #83

“No. 6-MAA **The EYE Curing AMD method**” (**sje**)

“A second (2nd) method to help cure the AMD / HUMAN EYE”

A very convenient method to administer the correct frequencies to the back of the eye, and to dissolve the drusen is to use a headset, that can be used possibly for a short period during the day or night. So

the Headset (and eye headset) can also use several frequency lenses (magnetic lenses) to see the side of the macula and then refocus the vision to that part of the macular, of course, one method using the 6-MAA Vr Magnetic Headset method. The other method is to send a frequency into the drusen and break it up. A small headset close to the side of the ear can also be used; it uses micro-electronics to induce a frequency signal through the side of the head, with a Passive Barrel Unit (PBU) barrel, or a Magnetic Focus Beam Device, this is more of a pin-point device. Of course, water and frequencies can be mixed as chemicals can also be mixed with frequencies, this is important because blood and magnetic frequencies can be mixed the clean blood, redirecting its flow. So in some applications frequencies can be applied directly into the back of the eye by using water/chemicals with frequencies that penetrate the layers of the retina, this is a very important and easy application of magnetic *water frequencies*. ***.

Astronauts <https://rendia.com/resources/insights/vision-problems-in-space/>

A blood equalizer attached to the correct blood vessels (pulling or pumping up) the blood from the main flow of blood to the head, may help. But if magnetic frequencies were sent to these internal carotid arteries like in a magnetic dog collar that could be used, it could stabilize the pressure and flow of the blood reaching the brain. This same technology can be used to reduce or stop the flow of blood to the drusen (stop wet macular degeneration, pinch the flow of blood and oxygen), thus starving it, this also can be applied to cancerous organs and infected areas. Of course, to be very technical the oxygen in the blood could also be reduced, this has many applications, to increase or decrease the supply of blood, chemicals, fats, and of course oxygen. Once more this is a supposition and not yet proven, Scientists are not sure if it is pressure on the brain/eye or what, at this point, they are not sure why this happens to the eye and vessels/veins in the eye, or even near the eye, but the walls of the veins do get bigger, and move apart in some cases. A more in-depth study has to be done, in space. There are many unknowns at this point. “Of course I know it is a lack of gravity, a differential has to occur in the blood to redirect the flow.

So seeing the interlayers of the retina (all of the total interlayers of the retina), I believe is what you (doctors) want to see and possibly remove the drusen and treat other infections, I think? The layers of the back of the eye (retina) are where the drusen is located (the location listed below in this paper). The veins and content of the Blood/Oxygen Levels, Pressures, Sizes, Shapes, and location of nearby adjacent adjoining cells are also very helpful to know, of course in real-time. And this non-intrusive method is only done with magnetics. The adjacent and adjoining cells to the macular/retina (between the layers) create a differential between all cells in the area, it is a **“different of potential” (DofP)**, this differential needs to be noted and *measured* for the health of the total eye, the retina is always in motion (frequencies). And knowing the precise frequencies is imperative. All of the above is possible with the right Vision AMD Machine, using frequencies that resonate with frequencies of the drusen.

The machine could also be used to see the Optic Nerve and other cells; this technology/machine may help to analyze the NASA Astronauts' vision problems, but not too sure how to cure the gravity issue, I have a few ideas.

Actually, the eye does not have to be dialed to use a Focused Magnetic Beam and the magnetic focused beam can be applied from the side of the head, near the front of the ear. So I do have a paper that lists about 6 different ways to use a magnetic focus beam and other tools and chemistry that can be used in conjunction with the magnetic focus beam. If made correctly (the magnetic focus beam device) using new Micro-Technologies, the device can almost be like a set of small audio headsets, but smaller. It would transmit the results via a Wi-Fi RF (link) signal to a cellphone or over the internet.

JUMP CODE #84

“A note to NASA and Space X”

“The Blood is on your hands if the Astronauts aren't recused”

Magnetics and Gravity are very different concerning the Human/Animals bodies in space, and when the US and other countries sent animals into space they should have discovered that almost all the animals' organs and blood flow (eyes) chemistry did change and did acquire many major health problems. Especially when the first astronauts came back from space years ago (1950-1960) actually German scientists knew this long ago; when working on the V2-Rockets in Germany, they had over 600 scientists working on many problems in OutSpace, and experiments started in 1937 by Germany, and they did send the first monkey in space, many problems did arise. The Germans did solve many problems in space, and to solve this problem a small (base) Earth-like space system has to be employed, that is a miniature universe. This was not documented well and a lot of data was lost, this task was not easy to do, but possible, I think I have an idea of what they did. A mini-parallel-universe = Earth gravity in the spaceship, or a magnetic motion gravity for people, a human collar for the Astronauts, easy to wear, as addressed in one of my first paragraphs (in this paper). And by the way, *Apollo 11*, July 16, 1969, landed a man on the moon, why can NASA/Space X do this now? (get the Astronauts down to Earth, Now) “Once more, understanding Motions and Differentials are the keys to comprehending most of my theories (even going to the Moon, Mars), “By the way they are not back yet until 2/23/2025” The astronaut's eyes have to be ready for a trip to Mars, and his organs/blood. One of the first things is to change the blood, by using a blood type pressure, made just for Space, and when reentry the astronaut's blood has to be converted back, in space traveling at certain speeds and gravity pulls the blood, it is changed, a tricky method. And if they can't see NASA needs to build a Body/Eye balance device, because if they have no or little vision they can't walk. If my theories are correct, there are magnetic particles inside of the

spaceship, and taking these magnetic particles out of the spaceship will be needed, as venting them to outer space, could relieve the pressures in the eye. These problems need a lot of experimental research for space travel and of course the blood /body/and the eyes. The magnetic-water filter has to be used to remove magnetic particles from the inside of space ship and the Astronauts use an electronics filter having a Liquefied water form converted to an electronics frequency to make long far travels, DARPA does not have the answers, not NASA at this time. Astronauts may need a different type of blood additive to reduce the pressure. A Big secondary note: As it stands Electrical Vehicles batteries are very bad for the environment, and cost the lives of many people /children around the world (many die, and Africa and China are not helping), I think a lot of Musk, but he is not helping the world with Electrical vehicle Batteries and pollutes the Earth a lot with rockets, and can make people sick, and this also pollutes the Earth like in Washington State, the food supplies will stop and the big bully Wal-Mart will not be able to deliver food to America.

JUMP CODE #85

“THE JUMPS IN THE HUMAN BRAIN”

“When the BRAIN STARTS JUMPING AROUND & PURE JUMP & Dark Jump occurs”

“And don’t use Jumper Cables, Wires, or Magnetically Physical Probes, Don’t do this”

A Real-Time-Memory-Recall in the Brain, or as I say a recall back in time occurring at different times from many trigger points I.e. “just about anything, Objects, colors, Images, body position, face sizes. Start to think about a time when you wanted to go back in time to a period and wish you could start over, and start to live life from that certain point, many people would love to do this and also change things as they go, is that possible, I think so, in your brain where the End of a **JUMP** happened. And if you can do this JUMP is it real, yes in your brain, or can you just take drugs, or meditation, what? What about not taking any drugs, meditation, or any external things while you're very awake going back in time, in your brain, and of course doing work, playing, or even having a baby? And what if your brain just does it without you trying to return in time? And it just happens, some people have this ability, and can even float around, this is pure science, **Yes** this is all possible while, or without you even knowing it is going to happen, “This is a **PURE JUMP**”, sometimes a **Dark Jump**, this is called by many different medical technical scientific terms. The words you are reading are doing that now and you don’t even know it. Can you make this happen, a **PURE JUMP**, or a **Dark Jump**? I think so and it just may happen an example: I just went into the other room or outside and I saw the cat that I just passed by 1-2 hours before, or a few minutes ago, this is a **REGRESSIVE RECALL JUMP**, sometimes good or bad. When a thought comes into your brain when doing something unrelated, this is a **JUMP CODE**, why? Millions of triggers in the brain are moving, a lot, once more good or bad. That is why I say please write them down, as fast as you can, otherwise, they get stored in another location and you may never recover them, of course, they never get lost, only hidden. Or what

happens if you are walking or doing some sort of motion and you see things walking by or stationary objects, and sometimes people or animals, or you see something in the future and later recall them, what is this, and you never take drugs, or alcohol, or any meds, or just eat regular food, what is this, an Ideas come into your brain it is hard to comprehend them, or can't get the total picture of what you're looking at, is this crazy, **NO** I think some people have this gift. I believe these are certain chemicals in the brain that make you bent a certain way. And this is only a theory of what I call a **JUMP CODE** in the brain, but it does have some merit.

(ljcsf) So, "Train your brain and fight for deep sleep REM, By all means, use "Rise & Fall" music, because music changes your connective links and can regenerate patterns and bring them to the frontal lobe, but the right music, so why talk about the Rise & Fall, because what really affects your brain is the leading edge of the musical notes that create a driving force of in-fluctuations of neurons of anticipations and excitements in the brain and thereby releasing electrical impulses. The last sentence is to reiterate that the real power of any differential happens on the differential (Rise and fall period) of one or more edges of any object in motion, and this is very critical to understanding physics/chemistry, and the disturbance theories. ***, if you play an instrument, play all the time, or even a video, "Be wise" and focus on stopping the torture in your Body. IMP PMM Paper #1, 43 ***.

JUMP CODE #86

"jump-start your brain". (jkjvde:28,38-41.11) , (KJV JOB 38-41.11)
"jump code memory cells in the body"

Of course, this is a very complex subject, but I'm talking about memory in the Human Brain, how the **BRAIN JUMPS** around, and how thoughts happen. Of course, there are many cells and connections in the brain and I will not go into this, it is too big for this paper, but I believe that we also have many memory cells throughout the Human body, as do animals, and even birds/plants. And in some cases rocks ("the Rocks will cry out" KJV). So what is a good short definition of memory?

Memory is the process of taking in information from the world around us, processing it, storing it, and later recalling that information, and sometimes many years later recalling it.

<https://www.google.com/>

In the human brain, "memory" refers to the cognitive process of acquiring, storing, and retrieving information over time, allowing individuals to recall past experiences and knowledge when needed; essentially, it's the brain's ability to encode, retain, and access data through various mechanisms, including sensory perception, processing, and *recall*.

Today, memory is defined in psychology as the faculty of encoding, storing, and retrieving information (Squire, 2009). Psychologists have found that memory includes three important

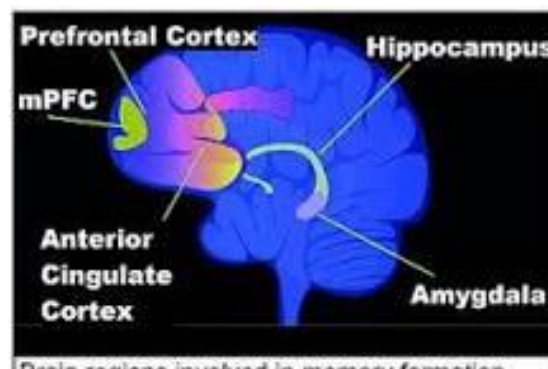

categories: **sensory, short-term, and long-term**. All of which I kind of lack, but we must remember not all memory cells are in the Human Brain. And there are many memory cells in other parts of the body that reach out to sense things far away.

Conceptually, body memory is defined as **the sum of all past bodily experiences that are stored in memory and influence behavior**. This entails tactile, motor, proprioceptive, painful, and interoceptive experiences and accompanying emotions.

<https://study.com/academy/lesson/three-stages-of-memory-in-psychology-explanation-lesson-quiz.html>

Most available evidence suggests that the functions of memory are carried out by **the hippocampus and other related structures in the temporal lobe**, this may not be the only memory ASI sub-brain to store data. "Eat the right foods for this" (rfk)

<https://pmc.ncbi.nlm.nih.gov/articles/PMC9138975/>

See Fig Above

But what about memories that are triggered by some event or just about anything?

Memories that are triggered by a specific event or seemingly random things are called "triggered memories" or "cued memories," and often occur when a sensory experience like a smell, sound, sight, or even a feeling acts as a "trigger" that brings a past memory vividly to the forefront of your mind; these triggers can be powerful when associated with emotionally charged events. OK, but it still does not answer the question, how do other cells besides the Human Brain store information? Such as cells in the skin, muscles, and a very complex question do these sensory cells store anything? And do these cells send data/information only to the Human Brain? And would any of these cells be part of a collective of cells working together? A lot of questions, and not many good answers. So: Does the Eye store memories, and if so how? And what about the nerves that transmit the Electro-chemical impulses, do they retain a timeline, and do they move into a certain pattern as different objects are sensed?

"Flash memory issues" in the human brain refer to problems with recalling vivid, detailed memories of significant events, often associated with strong emotions, known as "flashbulb memories," which can sometimes be inaccurate or deteriorate over time, even when the person feels very confident about the memory due to the emotional impact of the event; essentially, the brain may not store these memories perfectly, leading to inconsistencies in recall.

JUMP CODE #87

Little Jump Codes Shift of Memory **(ljcsom)**

<https://www.google.com/>

I wanted to give the reader a little history of memory and some good definitions of different kinds of memory theories in the Human Brain and the Body, I'm not sure I did that. But why this is relative to parts of the **JUMP CODES** in the Human Brain and Body, is because when different types of magnetic radiation are applied to the Human Brain or the Human Body, they can influence the memory and actually brainwash the memory, and cause permanent damage to correct and logic thinking, and that is a key element of what is going on around the world, "Right is Wrong, and Wrong is Right" and this also diminishes the brain even to make any good decisions. The brain and the body are incapable of coping and the Human Brain starts to have **BRAIN JUMPS THAT ARE UNCONTROLLABLE** and their memory gets lost and they get the **BLUE SCREEN OF DEATH**, screen crash, just like a computer algorithm code does. So this still does not answer many of the questions I proposed, but it is a start. The main point is Magnetic and Electronic therapy and different magnetics in the medical field are not good, even a PET scan for cancer is not good, and of course, the high power lines are also not good. But when these magnetic forces affect the Human/ Animal brains to the point where their cognitive and reasoning minds are going wild and killing people, it becomes a Big problem.

These human health and social issues need to be solved and examined, this brainwashing has been going on for many decades in America and the world, and the *media* are a big factor regarding these problems even films and documentaries laced with mind control and drive people to the brink of insanity. The vaccines and other lockdowns kill the health of mankind and the spirit of people and creativity and do change world powers, this is *Communism* in its best form, but now it is very high-tech, and Technology can become a monster, and never be controlled. **(jjchs) (ljcsnm1)**

Oh yes, I forgot, what about recursive flashbacks of things that were not seen before and seem like it is following you, or a microsecond back in time, a very strange phenomenal, phenomenon event, while you are walking or even talking to the cat, or something triggers it. Or even a side of your Eye has a flash and the doctors can't figure that out, Ok: where does this flashback come from, and what did I talk about? Or your turns and movements bring a flashback up, is it diet, the heart, the mind, or the stuff you drink (I never drink or smoke, No sugar, or carbs) but still this happens. Is it not enough sleep, so what? A message from JESUS, who is sending these visions (messages), and this is not out of "thin Air" They all have a purpose, a warning, I'm not sure what (man up Defiantly beings). Is this science, paranormal, or the "War-Room" RAV, not to be sure? Do you talk to JESUS every day? Do you read the Bible, NIV Old Testament? Are you

saved by the **Blood of JESUS** on the cross? When you die where will you go? Think about this. What is J6, Lawfare is this in America? What a shame, the politicians have killed many people, and are still doing it, what can be done? What does the Bill of Rights say about your duty? Many people have died from Governors isolating people, the day of their demise is coming, and bad people will be judged by GOD here on Earth and in Haven. The anger and total frustration from the left (Communism) has caused many people to be taken away, and just the TV commercials are an abomination to JESUS, how long will JESUS allow this; everyone will answer to GOD, almost all media have squashed the spirit of free man and women in the world (some have given up Not MA.... people), and for certain in American, The only way is to stay close to JESUS every minute of the day, and FIGHT FIGHT FIGHT.

(ljcsnm1)

So Communism has to be eradicated from America (without a war) and the World as it is, it is failing and will enslave the total population of the world, the Bible talks about this in KJV Revelations. When the Euphrates River dried up, it was getting close, because of troop movements in the 100s of 100,000, is this a sign from GOD, follow the “Bill of Rights, the U.S. Constitution”, mass deportation is a must, and Follow the rule of U. S. Law not, NATO, a corrupted body of people. (sjcs) And the great land grab in Florida, like Pasco County, condemning and the demolishing of Houses on or near the water, forces people to lose their homes, if the structural damage is over 49 % it is mowed down, and people lose their homes and land, “How can Pasco County take their land and homes, agonist the US constitution, and makes the 49 % call, the Pasco county board of commissioners. And burning down many acres on a little road in Pasco (FL), and destroying the land, who did this? So the two (2) Hurricanes hit Pasco, and basically, the big money people wanted to take the Land and houses and develop them, and the little people fought them but had no money, and left no trees and polluted the land with big fires, I was there. So Pasco will condemn the houses so the developers can buy the land and home cheaply, this is what’s going on in Pasco Countries and along the coast. People are ready to go to court and fight them. Oh, they have no money what to do, what did that kid in NY do, not good but Pasco County is pushing people to the breaking point. If we do not want to see any violence, they may want to consider not destroying the country/republic.

Follow a leader in America who wants peace, not war, and supports The **Real Israel** people. (jhs) JESUS and of course, RAV Trump, The Democrat's **Marxism**, have to be replaced, for America to go forward. The people of America, and also We the people have to get right with JESUS and stop the killing of babies, JESUS judgment will be on America, or any country the leader of the free World, and the Cosmos needs to stop these killings Once more REPENT, this goes for all people of the World “Is **Israel** people under judgment?.

Notes: The *** means this section requires a lot more work and detailed information, and those details are in the PMM IMP paper #1,43.

JUMP CODE #88

Mapping Tunnels in Gaza and other parts of the world, To be added later

JUMP CODE #89

The Addendum

“Some of this material is taken from my IMP PMM #1 Book/Paper and Not in the Brief Content”

“TIME”

The thoughts listed below are in **JUMP CODE FASHION** “Faster than the speed of light”, an imaginable span of what we call time, Man; Humans don’t even have a definition for that span”, and in the Human Brain and the total body, that span is always faster than the speed of light, of course taking into account the paths and impulses sizes-energies of magnetics always associated with colors. “One could say *afterthoughts*, but not such a thing because the Brain and Body perform a “Look-Ahead” function, better than the bipolar transistors in any electronics/computers identified to Humans and Man, **some expertise in science may be needed in the Bible/Math/Chemistry/Physics/Cosmos/Common Sense**. “A lot”

Spiral Super Nano Cylinder

Let me draw your Brain/Cells, in motions as a spiral Super Nano cylinder spun by the chemical “an EMF” creating energy, exhaling power, and using Oxygen, Hydrogen, and almost all of the 118 Elements we know of, and connecting to other cells doing the same thing, and more amazing is they all physically fit together to form the Human Brain and Body, Only from JESUS who is GOD, one and the same. These combinations of Super Nano cells can be manipulated and twisted and crushed, and still work, and repair themselves, (cells have to have a differential to work) still amazing, and inhale and exhale oxygen and electrochemicals. A problem is Inflammation (bad pathogens..)And sugars get in the way, this is just a very very short definition of Human cells, and this also happens in Animals (living plants). “America could become a second Communism state if the coup is successful, support **DJT**, and **RAV**”. So Cells are making movements in the body, some while you are dead for a while, like a spinning turning barrel, also producing electrical chemical energy, this is the New internet. (Font change, think? Then **JUMP**, around the cortex). “Move your thoughts to the hippocampus”, not the African animal”

<https://www.google.com> (jjchs)

Oh, a mind-interconnection with another human or animal, or even a plant, is this possible, “Yes KJV, the rocks will cry out”. And how do you emit your magnetic signatures to other humans and animals? And what Oder, scent, do you project? What colors do you see in someone’s Brain/Body, and retain for a flash-back, and how to stop it, this is really overstepping the boundaries of data privacy. But this is all possible, and absolutely with the right equipment, I have a few ideas of how to do this magnetically and never touch the Human/ Animal head. And how close do you need to affect someone from afar, no limits?

A disturbances of magnetic fields In the Cosmos Creates A multi-View Image

How to locate anyone In the Cosmos, and how to find someone on the internet changing the results of an election, very easy to find the disturbances of magnetic fields, not hard with the right equipment. And of course many other evidences. Dr. Patrick Byrne is a true American Patriot, do some research, “enemy within docu-series dot com”, down for the truthful store of a failed coup, we hope. How can all of these types of people be removed? Warroom.film please look and see, other greats of how America was almost overtaken, by *government gangsters*. **(Dof I), and**, “The Voyager missions took advantage of a special alignment of the outer planets that happens just once every 176 years” <https://www.space.com/17688-voyager-1.html> *Revolution Sky*

Socrates in the City “Eric Metaxas, Editor”, Erin Casey” " the 60-minute book, methylene blue, Chase Hughes, I emailed Chase Hughes and “I said this, don’t say a word, WGB”, a must-watch video on YouTube, “Methylthioninium chloride, commonly called methylene blue, is **a salt used as a dye and as a medication**. As a medication, it is mainly used to treat methemoglobinemia by chemically reducing the ferric iron in hemoglobin to ferrous iron. Look up the WHO website, https://en.wikipedia.org/wiki/Methylene_blue, amazing the metal particles in the blood, there are many ways to manipulate the Human/Animal/Plant brain and body. “Who are you at 7-9 years of age, brainwashing and not knowing it, Chase Hughes”, Business Secret book, find it. “Is the Human Body an electromagnetic receiver and transmitter?

Read Overrun, the book, and all cells in the Human body/animals/plants work on the differential; of course, everything has to have a differential, No differential, and NO motions, No life “WGB paper IMP PMM #1”, not in print yet, but only in the **JUMP CODE** paper. Oh yes once more cells are differential and never the same, all cells are different. Cells can talk to other people’s cells through the Atmosphere, Shedding of Spike Proteins, is not good, and other means of transmission, just like energies through the Air, and other materials, and I transmitted electrical power in the Aether (Air) years ago in my lab in Texas.

JUMP CODE #89-A

Some good Inventions “The List”

A Commercial Killer Device (CKD): The CKD can squeeze the TV Screen into a small thine line so the viewer does not have to see bad commercials, but with a remote the controller can bring it back to Full Screen when the screen looks Ok, or the CKD can also use AI to scramble the screen and rearrange bad commercials, this CKD device can also work with any TV or Display and can even stop the microphone and camera from hearing and seeing you, this can also apply to a Smart Phone. This CKD device does not need any electronics from a TV or Display and is completely autonomous from the electronics of the TV/Display/Smart Cell Phone. The RJ45 can be switched to another port and you can do a split screen and watch another program.

A Faraday Bag to detect ferrous particles

Stop the Bullet from firing out of a Gun.

Stop the Smell Killer, and especially a Garbage Dump.

Tracking Down and mapping tunnels with ULF is Just like in a Submarine using ULF / Impulse to track other sub

How about a D9 Cat with sensors and small ULF receivers/transmitters on a small robotic device that follows an underground tunnel and is always transmitting its GPS/RF location, up to the D9, and depth using a small Wave Electromagnetic Generator with properties that match the Earth's properties? These are just a few good ideas.

JUMP CODE #90

“The **Deep-Web** Concealed and Detailed”

How to circumvent The **Deep-Web**, Yes, but is it really deep, consider the four (4) other wires of the RJ45. And Reprogramming the NIC card, and the TCP/IP software, many other ways to make it impossible to track any down and never to see what they wrote, or said. And also use EZP off-the-shelf electronics to do this, I would say it is almost impossible to trace the signal because you can use AI (it too is off the shelf) to always change the location around the world and actually use the Government servers as a carrier (relay), or a local police station. The TCP/IP is a protocol and can be changed in NIC card and browser software too, and using the other 4 lines would make it almost impossible to track down communications/code, and adding in an algorithm would take decoding years to figure out. They may see a signal, but very hard to decode and never find your location, or county where you are, and using once more off-the-shelf electronics and very cheap, in fact, Starlink. I’m an expert in hardware and software and actually can get into ICs and change them, I did this in HK. And with the new EZK boards and BB, Raspberry Pie, it is very easy. If a smart person uses RF and converts it back and forth, once more almost impossible to decode, and not even an encryption, and that would even make it impossible. I will not go into detail but an intelligent engineer can figure this out. Oh one more thing AI is not really AI, see my paper IMP PMM #1 paper, the real ASI. I learned Crypto and Hardware in the ARMY (and Radar Gov. Contractor), was a HAM operator at 16, and ran the

LOC, in Germany, I made my own equipment. This is not hard stuff; I just know how to put things together. “READ THE KJV of the BIBLE, become very smart, Know JESUS. “If Man does not have a purpose they lose everything. Make JESUS #1” “I modified ICs Hardware by hand using a microscope so they can changed, I did it in HK, years ago. (mvoo)

So using Windows 10-11 there are two main running spy programs, COM Surrogate, and Runtime Broker, they are always looking at your data, and maybe others. I tried to delete them but had no luck I looked all over the internet and they say you cannot get rid of them, and when I write or code I see them active, so unless these two programs are doing something different there is a way to beat them. 1.) First disconnect from the internet using an RJ45 switch. 2.) Connect the external drive via the USB. 3.) When you write in Word or another editor always use the external drive, and not on the local drive. 4.) When you save your files always save to the external drive. 5.) Open another Word doc and write a bogus doc/code. 6.) Try and save it (you will see COM Surrogate come up in the task manager), at this point, I believe they have saved your work in a buffer, and also Firefox does the same thing, do a mouse click and COM Surrogate and Firefox will come up, so although they are offline they are saving your data in a buffer. I don’t know where this buffer is but I will find out, it has to be stored in RAM someplace. So when you reconnect to the internet this is when they sent it out to their server. So assuming this is correct, you can make sure your external drive has all the good data/code/doc on it, DISCONNECT the external hard drive from the machine, and pull out the USB cable. Then save your current file/code that may be on the local hard drive and if it comes up, load it with a lot of trash data/code/docs. My idea is to let them (Microsoft Firefox.. Whomever) come into the server, this even works for Grammarly, (I do this whole process while in Grammarly) a pain in the butt, but I believe it works; you need access to an RJ45 switch you can move manually. Of course, there are a few other ways, I have a new switch that will do all of this for you, I need to build it.

JUMP CODE #91

“The Best **HACKSWITCH** Ever”

This is my latest (HACKSWITCH) it is even better because it presents a dummy set of files and a fake Operating System, and the Microsoft Com Surrogate and Runtime Broker are working in a virtual machine and they don’t even know it. In the meantime, you are writing away on another machine, the real machine. I coming out with this soon and most of this virtual machine is all hardware and controlled by you, the user, manually. Of course, there are many ways to check this out, but even without the virtual machine I will make it still possible to beat the Surrogate and Runtime Broker, or even more spying on people and getting their data that was given to CN..... ‘Use Linux, if possible”

Beware of NATO and super alliances of other nations, “The weapons DARPA and Langley bases are working, and a few un-named universities (SAS. NASA, C..., Company..., are working on and developing a device (design) to Kill masses of people and stop weapons like these from being used, and that means weapons in a “Magnetic Dome will automatically self-destruct”, this is still not good, and missiles can *disrupt the Atmosphere, this also is not good*. It is very hard to

stop these weapons like nuclear weapons unless their chemical composition is changed. Some of these agencies are needed.

(mvoo)

The **Fourth Turning (actually the final turning)**, a mixing and remapping of All minds, and an AI degradation of the physical brain and removes any spiritual thoughts of JESUS; that is no remembrance of JESUS GOD and possibly no other GOD/GODS. And then comes a man/ that takes the place of any supreme leader, (being, creature), this is the antichrist talked about in Revelation (the Bible, KJV). Many will be deceived, for sure the intellect. And we are in a spiritual war, soon it will become a nuclear war, of course, the Israel people will remain, ready for the Great War “Armageddon”. But as of 1/3/2025 150, all the signs have not been fulfilled, (see the scriptures in the KJV bible). As a side note, the Democrats (Communism) in the last four years (actually for the last 100 years ~) have almost broken the Human spirit (the anger and despair of all people in the world of overwhelming hate for them has happened) in America and around the world. So why are Humans and Animals going wild? Are the Democrats (Communism) trying to start a shooting war, We now have a leader in America; President Trump, and their staff may change things, and there is still a lot to do, America's bad agencies and some in Congress/Senate have not helped, a complete revamp of America and the world needs to come about, soon, once more my opinion, with corruption in the world, it is hard to tell the good from the bad. (mvoo), John Radcliffe is not good for FISA, and Trump should leave Israel alone, and finish the war, but help them and not dictate.

The Democrats (Not all believe in Communism 1/16/2025 1033 PM) and the current president (White House, 1/16/2025 1033 PM) are trying to take your land, rights, and ridiculous lawfare to kill America. People in America have to fight this at the local level which is going to regional meetings and speaking up. I hope Trump will enforce the Anti-trust laws and right America; this is just a start and stops the Big Tech companies from lying and destroying people. And people, I don't want to see a civil war, of any kind. The Fourth Turning is in the Bible, but it is not necessarily the Fourth Turning, The Fourth Turning or other Turnings also have a geological and magnetic, cosmic occurrence, in the Earth's rotation controlled by JESUS GOD. I actually call these turnings a Shift in the Universe/Cosmos/ and possible only in the Milk Way. I only count Three (3) shifts as of 12/20/2025 1139. I have more research to do on this WGB. (mvoo)

I WANT TO SERVE JESUS, and I'm not faultless by any means. “Be Kind”

These are my opinions in this paper. America still has the vote, let us use it and thank GOD, *Serbia and the Machines and interconnections did not control the last big election/vote (a lot more foul play was at hand), and GOD is still in control.* (jcp), this is just a starter paper WGB. Oh, Microsoft copies everything you write using Windows 10-11 and more, or any Microsoft product. (mvoo) “Once more my opinions”

So I don't memorize much at all, I look for a differential in what I'm trying to find or what I see, like looking for something close and comparing, associating something different, and then I can locate just about anything and find anything I may have stored in the Body, so “ I have more knowledge in my little finger than you have in your brain” yes, True in some cases, because not all memory cells are in the brain, actually, they span through the total body, and in some cases in

organs. A little hard to understand, but what the electromagnetic pulses travel through the nerves, and cells of the body, so at any given point in that instant the data is being transported throughout the body, and it makes sense that it can be captured and this is also a memory storage location. More in my IMP PMM #1, 43, “I did a demo of the DBD, see Fig 1.303

So the Brain is not just in the Head/Brain but in all parts of the body that have many functions we do not know about, there is a lot to learn, and when using acupuncture (This is a new **BRAIN JUMP CODE**) use a needle that has an analog signal connected to it and send an elector-chemical code of mix frequencies and see what happens, a lot, you will be astonished to see the results. And Chase Hughes is a *Harvard-educated neuroscientist*, very smart He should know all of this. I’m just getting started, “I know nothing”, WGB 12/21/2025 149 Earth Milky Way Galaxy USA. (mvoo) (mvnrfc)

“Believe in JESUS GOD and you shall be saved, and only ONE (1) way to GOD through JESUS, that is it. Where will you go when you die? “This is my thinking and soon to be a novel, possibly a film.

Corruption in the US government is a very big problem, Only JESUS can solve it. But I do believe the Woarl needs a reset, but to JESUS.

JUMP CODE #92

“THE *MORGUE*”

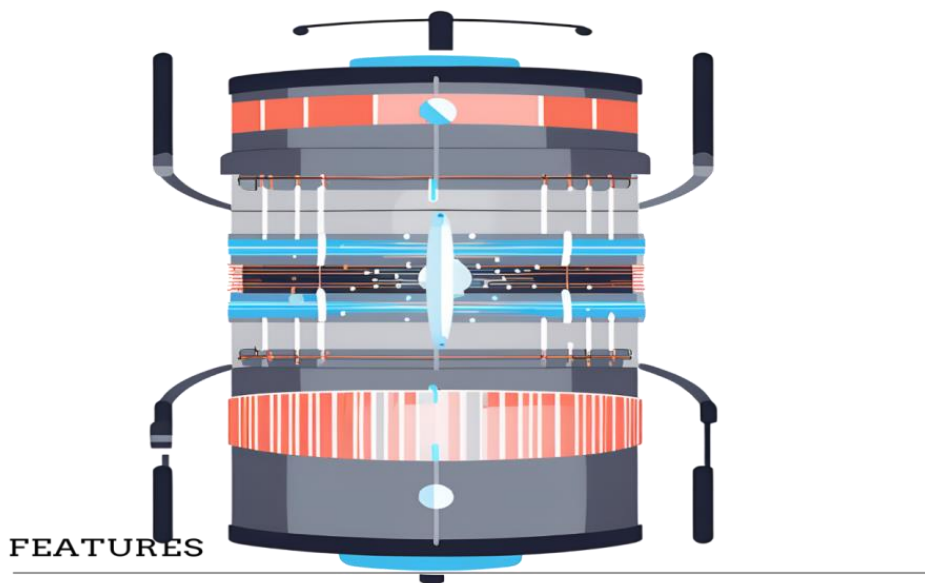

The **Death Barrel Device (DBD)** Converts Electricity to a waveform signal and combines it with the Magnetic Particles in the Atmosphere, creating an Electrified Magnetic Dome, It is only activated when it detects disturbances in the sounding atmosphere, so very little power is utilized only when it is in use. It actually charges the atmosphere with an electrical-magnetic field, and when any object is close to it, the **DBD** hits it like a bolt of High Voltage Electricity, completely destroying it, we call this the **Death Barrel Device**, and I call it the **Death Morgue Machine**. This machine literally kills everything in its reach (Path) and a few meters before it ever reaches the Electrified Magnetic Dome. It is very safe and can be adjusted for different types of objects, and only kills on Demand. The **DBD** covers the entire Atmosphere from the surface of the Earth to a predetermined height (top of the Dome Sphere) that is determined by the power used and how it is controlled, this is truly a **Real Death Dome (Magnetic Vault)**. The **DBD** works in conjunction with the **Passive Barrel Unit (PBU)**, the **DBD** is normally set at the perimeter base, of the surface. Depending on the spherical needed (areas) it may take several **DBD** to convert the area desired, like the U.S., or it can be set up in localized locations, creating a **DBD** that can be of just about any size. The way the **DBD** works it can adjust to the irregular cost line or even a perimeter above a large ship, making it almost invisible, this is another feature of the DBD. This is not activated by radar signals/signatures of Heat, Chemical, or Magnetics; it discovers a certain flow of disturbances in the Atmosphere Magnet and partly utilizes the Rotation of the Earth. The **DBD** can be placed in a fixed position or on a moving platform; it can also be used below the Earth, or almost any body of water, making it useful for deep water exploration. The size and far-reach of the DBD once more depends on the application needed. I also call it “**The Morgue**”; it is extremely hard to defeat this device, Oh yes, it could also use Starlink as a com-center. See the picture below (Fig 1.303), I did not put the real picture in as of yet, a

complex device. The intelligent Scientists of this world have not mastered the Mixing of Frequencies and how to use the Magnetic fields of the Earth's Rotation and the frequencies of PU239 can be changed, and nuclear devices can be disarmed, from afar. "A true hardware device is hard to hack" "the ASOCT",

"The DBD, "named the *Morgue* Technologies", and ASOCT are the REAL iron dome (that completely cover the total spherical geographical area, like a Magnetic Electrified Lid Closure, and are only active when anything comes to disrupting the Atmosphere/Aethea. *What they call the Iron Dome (2025) can be defeated.*" The DBD covers the Atmosphere above and below the Earth, consider how disruptions can come from below the surface of the Earth, and are almost impossible to detect or defeat. In fact, the Earth has many more of the 118 elements that can be used as a transporter of destructive device signals (Internal Radio Frequencies (IRF), this can also apply to Medical applications. See Fig 1.363 Below

More info in the IMPPM 43 Book/Paper WGB 1984-2025

DEATH BARREL DEVICE

360 Degree Rotation, Spherical
Detect All 118 Elements
Capable of Flying Drones, Detection & Destroy Them
Area of Detection: In & below the Earth, also the Upper Atmosphere
Detect Any Disturbance in the Aether
Can be Use as a Magnetic Shield Protector Dome - National Security use

BY WILLIAM BIRCHARD

Fig 1. 363 "Once more just a few ideas", A original novel if you like"

“This is a spherical omni-sphere actually not seen here, only in IMP PMM Paper #43”, Gather all RF, AC-DC, and Pulsed Wave signals in and above the Earth, capturing the Disturbance In the Aether.

“the **ASOCT Device and technologies** is the **THE MORQUE**”

A Spherical Omni-sphere Conversion Transformer (ASOCT), a spherical omni-sphere within the outer omni-sphere, is floats in an induction cage that transfers the energy/signals to the outer layers of the omni-sphere. The omni-sphere is rotated magnetically, or uses a high-powered Air cannon, with no magnetic particles in the air, this is also an isolated omni-sphere from all outside interference. All points of the omni-sphere are also in motions and gathering and /or sending data/power spherically out into the Atmosphere (Aether). The omni-sphere has to be made by using a 3D printer and using magnetic threaded materials. The **ASOCT** is complex, but it sees and hears and senses all signals, even in the Seas or upper Atmosphere, It is a Passive or Active **ASOCT** unit, working deep in the Earth, or just about any place, NASA should build on and used it in Space, self-contained for power consumption. “Very hard to draw” This **ASOCT** can be utilized as a weapon or a Super Materials Detector, Disruptor, Disarming device, stopping explosives. More in IMP PMM Paper #43-83 PBU “Speak in Tongues, know JESUS GOD” **(Jjes)**

For Jesus: Savior of the Universe

Thank you, Jesus, for guiding me through the journey of writing your book. Your inspiration and guidance have been my source of strength and wisdom. I am grateful for the creativity and insight you've blessed me with. May this work bring glory to GOD?

The Author Profile

William B. Gordon is a retired US ARMY veteran & engineer. His previous work was with different well-known government & private defense companies in the United States as well as the major communication companies, including NASA, Raytheon, IBM, Hughes, Motorola, and many others. As an Army veteran turned engineer, He has navigated two distinct yet interconnected worlds—where discipline, precision, and adaptability learned in the military seamlessly blend with innovation, problem-solving, and technical prowess. His journey has been a dynamic fusion of service, leadership, and a relentless drive to engineer solutions that make a real-world impact. This unique combination has not only shaped his professional path. Still, it has also instilled in him a profound commitment to excellence and a passion for contributing to the betterment of society through technology and engineering (**KFDL**). As an ex-NASA, (pentagon), (UofM, CNN, Design News, Langley, Rensselaer Polytechnic, Dr. Frank V), Hughes, Lockheed, Vough, LOC, JPL, Firecontrol, F-16, Radar, Westinghouse, Robotic Muscles, Crypto Coding Training, and Patents, to name a few) as a scientist and engineer, his life's work has been a captivating fusion of cutting-edge technology and relentless pursuit of discovery. His expertise lies at the intersection of electromagnetic energy, robotic systems, and artificial intelligence, where he has relentlessly focused on developing innovative solutions for a wide range of challenges, with a particular emphasis on explosive (materials) detection, Frequencies of the Human Body (EYE), and Artificial Intelligent (AI), that should be called **Artificial Space Intelligent (ASI)**, or Artificial Frequency Intelligent (AFI), all related to Motions Magnetic Frequencies. Once more this is just a brief overview, the real theories and methods are in the “Rate Of Change”, (RofC) of matter, and this is where motions magnetics conversions happen (Rise/Fall); So the scientists are just not looking in the right place and at the right *timing, that means timing is everything, this written paper is not intended to be read from page to page, thought to thought.*

“The Final **JUMP CODE** Mission, Summation”

“The Last **JUMP CODE** is #93”

JUMP CODES in the Brain/Body can come at any time in the least expected places, and are stimulated/motivated by many things, write them down, and tell someone about them. In the case of what you just read, it is extremely hard to explain, but reading words or art/pictures on paper sends back to you an idea from the words on that paper, this is very different than reading words on the TV or electronic devices, Read books and papers and make things. The color of the words/art/pictures is very important because your eye perceives them at different rates meaning that it uses neurons to get them to the brain (cortex), and even simulates the body functions. “Please don’t forget words and images are magnetic waves and have different effects on human brains (eyes), and not all human brains are the same.

“**JUMP CODES** can come from the reader or the writer, of course”. “Never use strong drinks, drugs, the cannabis plant, THC, LSD, fentanyl, opioid analgesic, alcohol any mind-altering

device, or chemicals, they can be attached to almost any cell and kill you, including the Eye, Ears, Mouth, Tongue, Skin, and even your lower parts, Amazing. Also, your *eyes* and brain can be hypnotized, so be careful who you let into your mind and psyche, and guard your distance, and location”.

“The Age of Living Machines” Susan Hockfield , A fantastic book

Many Ref. are in my IMP PMM Book/Paper

The “So Called End” Paper #1 **JUMP** Org. 2/7/2025 135 AMUS AFL305CDX

Note: This book/paper really needs to have the IMP PMM book/Paper alongside you to make some sense of this text and also the necessary drawings. And knowing that GOD said “four corners of the Earth and laid the foundation of the world, did anyone think GOD could have been talking about a magnetic foundation, and the shoes of the Israelites did not wear out because the atmosphere differed from the crust of the Earth, and also gravity? This changes all physics we know of 2025. Also, the IMP PMM paper has all the data on the *hypnotic and magnetic info* in it; I need to add it to this paper. Who are the real Israelites, and are they all REPENTING? Where is God's judgment? And how can the *normal brain* JUMP from many subjects to other subjects without breaking the connections (Synapses) in the brain? This is killing all of mankind, “Cell Phones, and TV are all destroying our minds, so the *normal brain* is infected with a virus, or a super disruption, it can’t distinguish God's word from Evil. Pray and saved people are holding the Evil back, at least for now (2025). “America supports real Israelites”.

A small visual of the Human BRAIN HOT

This manuscript is about **Magnetics and Frequencies** and their many applications, and how to combine **Magnetic Pulses, Frequencies Waves, and Hypnosis to Simulate and Train your Brain**, and to help accept positive internal/external suggestions. This paper also explores the relationship between magnetics (magnets) and frequencies, as well as their numerous applications. It discusses how to combine manmade and natural magnetic pulses (frequencies) with hypnosis also to investigate brain activities, and magnetic implants. Additionally, it examines other methods involving magnetic fields to create a Magnetic Entry Point into the brain cortex (body) without any physical contact. A significant emphasis is placed on the human Eye frequencies and of course, many other subjects like “Magnetic Hypnosis” and ‘Brain Rot”, and don’t forget this also includes what foods you need to eat to become Super Intelligent (Avoid Sugar Carbs) “. And even reading Horrible/Evil-types of books is bad; don’t let anything take over your Mind. I have a few Military designs and unrelated subjects, but all are needed to help explain these amazing ideas, I try and include pictures and descriptions of many of my inventions.

“This is a collection of Theories and Methods” Somewhat disorganized, but important for the near future”, this is just my opinion.

Key: Can the hacker play Hopscotch? When will the Calvary come?

This is just a minute small part of my IMP PMM books/papers, and of course my

THANK YOU JESUS

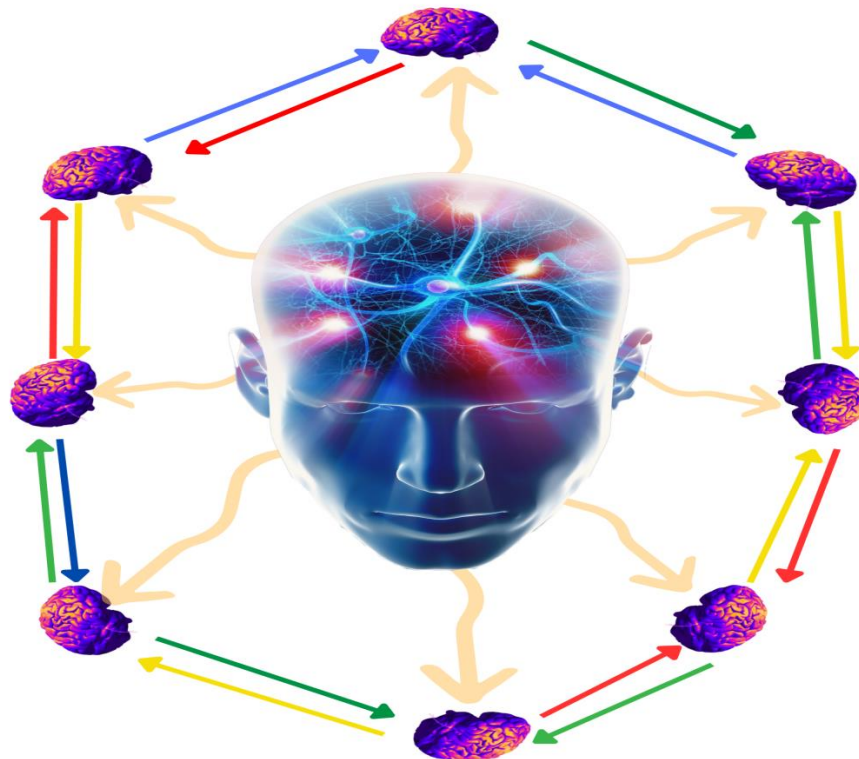

My Thank You Note to GOD who is JESUS, the Holy Ghost, Spirit, and people that LOVE JESUS, and as of 2/25/2025 9:59 PM Florida's ground is shifting, per strain gauge WGB, this is not good, and another storm may be close: So as of today ~1/32 inch the space in the floor: Indo is shifting 2 Feet in some places, The Earth it tiling and this is not climate change, a natural event.

(The End)

“Oh a little more in statement form, not complete, but you the reader should read it”
“For now”, “ 99.. Bottles of Bears on the Bus, it shows how the US is in decline and we all need JESUS”

Read the Big ~423 Page Book/Paper IMP PMM #43
 Also read “Socrates In The City” E.Metaxas, Business Secrets” Listen to the TRUTH, Machines That Think T.Walsh, and see the paper “satire, jump start your brain 2132025 1226 AM Fla,wgb”, ask for it.

The Extra Back Cover “The Human Brain Rot” JUMP CODE

“A little Extra”

“This is part of my story” 2024 USA.

A Wild Bill Investigation, Pardon the English, I’m Not the Best Writer, but this Book/Paper is intended to get your Brain to JUMP around, Think a Lot and Read Books/Papers. Also read the KJV of the Bible, Talk and read aloud to other people, stay near Intelligent people, live in the right place, give knowledge, and Talk to JESUS, Listen, and Learn.

“Super Human Intelligent Brain, “ The BRAIN JUMP CODE”

Brain Rot Too much input (TV Media Screens) into the Human Brain through the Eye and other parts of the Body. This also covers foods and chemicals, RF frequencies 5G and Radio Stations, and certain voices from people that surround us. Also, where we live and the work environments matter. So the BRAIN ROT can influence everyone, and Never let anyone or any government break your spirit, this almost happened in America, the Democratic Party, called the Communist Party almost did this. The Democratic Party, called the Communist Party is still knocking on doors and this is the FBI, Sheriff, and others, I hope Trump stops this, many people have died because of this, and the FISA warrants are not good in many ways.

The Fourth Amendment of the United States Constitution protects people from unreasonable searches and seizures and requires warrants to be based on probable cause. The Fourth Amendment is part of the Bill of Rights.

What is wrong with the Bill of Rights?

“The US Congress is still very corrupt dishonest, and morally wrong”

The FISA warrants are just part of the above problem (miss use of power many doors were knocked on) and why is it needed, The president needs to stop the FISA stuff, They did it to him, Be a man who stands up for justice, but I will have to say JESUS and the President is saving America, just don’t go too far, and get the wrong people, and of course many people like S, K. Bannon to name a few (RAV, OAN). And there are (and were) so many Democrats & Republicans in power that directly Killed many people during Covid19, J6 people, for the last 12 years and they are rich, and get off free, find them and give them a trial and off to jail or take all their wealth away, or both. And many others, and why is the US government not enforcing the antitrust laws? Mr. President right the wrong. And how about the poor people who voted for you?
